Credit Suisse Fund Management S.A., 5, rue Jean Monnet, L-2180 Luxembourg

## Objectives and investment policy

The Fund invests predominantly in equities and equity-type securities of issuers engaged in the "Digital Health" industry worldwide. The Fund promotes environmental, social and governance (ESG) characteristics (within the meaning of Article 8 of Regulation (EU) 2019/2088) through a combination of exclusions, ESG integration and active ownership. The most material ESG factors are combined with traditional financial analysis to make an ESG adjusted risk-return assessment, which serves as the basis for the portfolio construction. This Fund is actively managed aiming to outperform the return of the MSCI World ESG Leaders (NR) benchmark, which is used as a reference point for portfolio construction, as a basis for setting risk constraints, to attain the desired environmental and social characteristics and/or for Performance Fee measurement purposes. The majority of the Fund's equity securities will not necessarily be components of or have weightings derived from the benchmark.

The Investment Manager will use its discretion to significantly deviate the weighting of certain components of the benchmark and to significantly invest in companies or sectors not included in the benchmark in order to take advantage of specific investment opportunities. It is thus expected that the performance of the Fund will significantly deviate from the benchmark. The Fund uses derivatives to reduce the impact of changes in currency exchange rates on the performance for this Share Class. The investor can buy or sell shares of the Fund on a daily basis, as further defined in the prospectus. This Share Class does not make distributions. The Fund shall bear the costs of standard brokerage and bank charges incurred by the Fund through securities transactions in relation to the portfolio. These charges are not included in the "Charges" section of this document.

## Risk and reward profile

### Risk profile

The Fund's risk and reward profile shows the variations in value an investment in this Fund would have undergone over the past five years, whereby simulated performance data is used in the case of missing history. The Fund's risk rating may change in the future. Please note, higher possible gains generally also mean higher possible losses. The lowest risk category does not mean that the Fund is risk free.

- Liquidity risk: Assets cannot necessarily be sold at limited cost in an adequately short timeframe. The Fund's investments may be prone to limited liquidity. The Fund will endeavor to mitigate this risk by various measures.
- Counterparty risk: Bankruptcy or insolvency of the Fund's derivative counterparties may lead to payment or delivery default.
- Operational risk: Deficient processes, technical failures or catastrophic events may cause losses.
- Political and Legal risks: Investments are exposed to changes of rules and standards applied by a specific country. This includes restrictions on currency convertibility, the imposing of taxes or controls on transactions, the limitations of property rights or other legal risks.
- Sustainability risks: Sustainability risks are environmental, social or governance events or conditions that can have a material negative effect on the return, depending on the relevant sector, industry and company exposure.
