

# Key Investor Information

This document provides key information for investors in this Sub-fund. It is not marketing material. The information it contains is required by law to help you understand the features of the Sub-fund along with the risks and other related information, should you decide to invest. You are advised to read it so that you can make an informed decision about whether to invest.

## AZ Allocation - Italian Trend (the “Sub-fund”) is a sub-fund of AZ Fund 1 (the “Fund”)

A-AZ FUND TW USD hedged (ACC) class - ISIN LU2168563091

The Fund is managed by Azimut Investments S.A. (the **Management Company**).

## OBJECTIVES AND INVESTMENT POLICY

### Objectives

The Sub-fund’s investment objective is long-term capital growth.

### Investment policy

The Sub-fund intends to achieve its investment objective by actively managing a portfolio that is composed mainly of equities issued by Italian companies. Equity exposure is actively managed and depends, among other things, on the overall valuation of equity markets. The lower and more opportunistic the valuation of the overall value of the equity markets, the higher the net exposure of the Sub-fund to equities, and vice versa. Thus, although normally the Sub-fund will be primarily, or even fully, invested in equities and other comparable securities, the Manager may reduce or even remove the equity component and invest exclusively in money market instruments and debt securities during periods when, in the Manager’s view, there are not enough equity investment opportunities.

The Sub-fund invests up to 100% of its net assets in shares issued by Italian companies. By using derivative financial instruments, the overall exposure to equities may be as high as 130% of its net assets.

The Sub-fund may also invest up to 100% of its net assets in debt securities of issuers in European countries, and up to 45% of its net assets in debt securities of issuers in countries outside Europe, including emerging countries.

The Sub-fund invests up to 30% of its net assets in debt securities that have a sub-investment grade rating at the time of acquisition.

The Sub-fund aims to maintain an overall ESG (Environmental, Social and Governance) rating of at least BBB for its portfolio, calculated on the basis of ESG ratings awarded by MSCI ESG Research to each of the securities it holds. More information on the Sub-fund’s ESG strategy is available in the Prospectus.

The Sub-fund uses the main financial derivatives for investment purposes and/or to hedge against risks. Leverage calculated based on the sum of notionals method: maximum 200%.

The Sub-fund is actively managed and is not managed in relation to a benchmark index. For the purpose of calculating the performance fee, the following benchmark is used: 80% MSCI Italy Net TR + 20% Bloomberg Euro Treasury Bills 0-3 Months Index.

### Specific information on units

You may request the sale of your units on a daily basis, except in certain circumstances (see the prospectus).

Dividend payments are not expected. Any income from the portfolio is reinvested.

The USD class is hedged against the Sub-fund’s currency, the euro.

Recommendation: this Sub-fund may not be appropriate for investors who plan to withdraw their money within seven years.

### Definitions

**Actively managed Sub-fund:** a Sub-fund for which the manager has the flexibility to select the securities that make up the portfolio, in line with the objectives and investment policy laid out.

## RISK AND REWARD PROFILE

### Definition of the risk and reward indicator

The aim of the risk indicator is to provide you with an evaluation of changes in unit prices. Risk category 6 means that the unit price is very volatile. As a result, the risk of loss and the expected return may also be very high. However, even the lowest category does not mean that the investment is “risk free”.

Historical data may not provide reliable information about the future. The displayed risk indicator is not guaranteed and is likely to change over time. There is no capital guarantee and the value of the Sub-fund is not protected.

### Reason why the Sub-fund is classified in this risk category

This Sub-fund’s risk level primarily reflects the investment positions in equities, bonds and derivatives according to the volatility of the market within the scope of the predefined margin.

### Particular risks for the Sub-fund not included in the indicator:

**Risks associated with securities:** this refers to the financial risk associated with the direct or indirect holding of financial assets that represent the shares of a company. The value of securities can increase or decrease depending on the particular characteristics of the issuer (profitability, financial capacity) and the general developments of the stock markets.

**Risk associated with derivatives:** some derivatives may be subject to unexpected movements or expose the Sub-fund to losses significantly greater than the cost of the derivative.

**Risks associated with investment policies that take an ESG (Environmental, Social and Governance criteria) approach:** the use of ESG criteria can affect the performance of a Sub-fund, which may, therefore, differ from that of other Sub-funds with similar investment policies but which do not take ESG criteria into account.

Other investment risks are specified in the risks section of the prospectus.

## CHARGES

The charges you pay are used to cover the costs of running the Sub-fund, including marketing and distribution costs. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest:	
Entry charge	5.00% of the amount invested for subscriptions made in single solution.
Exit charge	None
The percentage indicated is the maximum that may be taken out of your capital before it is invested and/or before the proceeds of your investment are paid out. Please contact your financial advisor or distributor for the actual charges.	
Charges deducted from the Sub-fund over a year:	
Ongoing charges	2.81%
Charges deducted from the Sub-fund under specific conditions:	
Performance fee	<p>The management fee is increased or reduced on a straight-line basis by a variable management fee, up to a maximum of 20% of the amount of the management fee, based on the difference between the performance of the class and the performance of the 80% MSCI Italy Net TR + 20% Bloomberg Euro Treasury Bills 0-3 Months Index benchmark over the same performance period (so-called “fulcrum” variable management fee).</p> <p><b>In some cases, a performance fee may be levied even when the performance of the Sub-fund is negative.</b></p>

The amount of ongoing charges indicated is an estimate because there has been a change in the charges. This amount may change from year to year.

Ongoing charges do not take into account the following:

- performance fees and
- costs of portfolio transactions, unless the Sub-fund pays entry or exit charges when it buys or sells units in another undertaking for collective investment.

To find out more about the charges, please refer to the prospectus available at [www.azimutinvestments.com](http://www.azimutinvestments.com).

## PAST PERFORMANCE

- The graph shown is not a reliable indication of future performance.
- The annual performance is calculated after deducting the fees charged to the Sub-fund.
- The Sub-fund was created in 2020.
- The A-AZ FUND TW USD hedged (ACC) class was launched in 2020.
- Past performance is calculated in USD.
- The performance of the Sub-fund is not linked to that of the benchmark index. The latter is intended to be used to calculate the performance fee (fulcrum).

A\*: The Sub-fund received the merged AZ Multi Asset - Institutional Italy T on 18/12/2020. Performance prior to this date was achieved under different circumstances.

B\*: Since 01/04/2022, a “fulcrum fee model” has been applied.
