

Key Investor Information

This document provides key information for investors in this Sub-fund. It is not marketing material. The information it contains is required by law to help you understand the features of the Sub-fund along with the risks and other related information, should you decide to invest. You are advised to read it so that you can make an informed decision about whether to invest.

AZ Bond - Renminbi Fixed Income (the “Sub-fund”) is a sub-fund of AZ Fund 1 (the “Fund”)

A-INSTITUTIONAL USD (ACC) class - ISIN LU2238328574

The Fund is managed by Azimut Investments S.A. (the **Management Company**).

OBJECTIVES AND INVESTMENT POLICY

Objectives

The Sub-fund’s investment objective is medium- and long-term capital growth.

Investment policy

The Sub-fund seeks to achieve its investment objective by actively managing a portfolio composed of debt securities and money market instruments denominated in US dollars or offshore renminbi (CNH).

The Sub-fund invests between 60% and 100% of its net assets in debt securities and money market instruments issued by the Chinese government, supranational institutions and/or government bodies, and/or Chinese companies, denominated in US dollars or offshore renminbi (CNH). These securities will be traded on the Hong Kong market as well as on other markets around the world.

The Sub-fund invests up to 100% of its net assets in debt securities that have a sub-investment grade rating at the time of acquisition.

The Sub-fund uses the main financial derivatives for investment purposes and/or to hedge against risks. Leverage calculated based on the sum of notionals method: maximum 200%.

The Sub-fund is actively managed and is not managed in relation to a benchmark index. For the purpose of calculating the performance fee, the following benchmark is used: FTSE Chinese Government and Policy Bank Bond 0-1 Year Select Index in USD.

Specific information on units

You may request the sale of your units on a daily basis, except in certain circumstances (see the prospectus).

Dividend payments are not expected. Any income from the portfolio is reinvested.

This unit class is reserved for institutional investors.

Recommendation: this Sub-fund may not be appropriate for investors who plan to withdraw their money within five years.

Definitions

Actively managed Sub-fund: a Sub-fund for which the manager has the flexibility to select the securities that make up the portfolio, in line with the objectives and investment policy laid out.

RISK AND REWARD PROFILE

Definition of the risk and reward indicator

The aim of the risk indicator is to provide you with an evaluation of changes in unit prices. Risk category 3 means that the unit price fluctuates moderately. As a result, the risk of loss and the expected return may also be moderate. However, even the lowest category does not mean that the investment is “risk free”.

Historical data may not provide reliable information about the future. The displayed risk indicator is not guaranteed and is likely to change over time. There is no capital guarantee and the value of the Sub-fund is not protected.

Reason why the Sub-fund is classified in this risk category

This Sub-fund’s risk level primarily reflects the investment positions in bonds and derivative instruments depending on market volatility within the predefined margin.

Particular risks for the Sub-fund not included in the indicator:

Credit risk: issuers of debt securities, even those with a very high rating, may not be able to make payments to investors, or the fear associated with this risk may result in a decrease in the value of their debt securities.

Concentration risk: when the Sub-fund invests heavily in a company, sector or country that is significantly affected by an adverse event, its unit price may fall.

Currency risk: the Fund invests in other currencies. Fluctuations in exchange rates will therefore have an impact on the value of the investment.

Risks associated with investing in debt instruments denominated in offshore renminbi: investing in offshore renminbi (CNH) exposes the sub-fund to a higher level of currency risk and liquidity risk, given that the external renminbi bond market is still in the development stage.

Other investment risks are specified in the risks section of the prospectus.

CHARGES

The charges you pay are used to cover the costs of running the Sub-fund, including marketing and distribution costs. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest:	
Entry charge	2.00% of the amount invested for subscriptions made in single solution.
Exit charge	None
The percentage indicated is the maximum that may be taken out of your capital before it is invested and/or before the proceeds of your investment are paid out. Please contact your financial advisor or distributor for the actual charges.	
Charges deducted from the Sub-fund over a year:	
Ongoing charges	1.92%
Charges deducted from the Sub-fund under specific conditions:	
Performance fee	<p>The management fee is increased or reduced on a straight-line basis by a variable management fee, up to a maximum of 20% of the amount of the management fee, based on the difference between the performance of the class and the performance of the FTSE Chinese Government and Policy Bank Bond 0-1 Year Select Index in USD benchmark index over the same performance period (so-called “fulcrum” variable management fee).</p> <p>The actual amount of fees charged to the Sub-fund during the last financial year was 0.11%. This amount was calculated using a calculation method that is no longer in force. Since 01/04/2022, a “fulcrum fee model” has been applied.</p> <p>In some cases, a performance fee may be levied even when the performance of the Sub-fund is negative.</p>

The amount of ongoing charges indicated is an estimate because there has been a change in the charges. This amount may change from year to year.

Ongoing charges do not take into account the following:

- performance fees and
- costs of portfolio transactions, unless the Sub-fund pays entry or exit charges when it buys or sells units in another undertaking for collective investment.

To find out more about the charges, please refer to the prospectus available at www.azimutinvestments.com.

PAST PERFORMANCE

- The graph shown is not a reliable indication of future performance.
- The annual performance is calculated after deducting the fees charged to the Sub-fund.
- The Sub-fund was created in 2020.
- The A-INSTITUTIONAL USD (ACC) class was launched in 2020.
- Past performance is calculated in USD.
- The performance of the Sub-fund is not linked to that of the benchmark index. The latter is intended to be used to calculate the performance fee (fulcrum).

A*: The Sub-fund received the merged AZ Multi Asset - Renminbi Opportunities - Fixed Income on 11/12/2020. Performance prior to this date was achieved under different circumstances.

B*: Since 01/04/2022, a “fulcrum fee model” has been applied. Benchmark index up to 01/04/2022: 3M Libor USD (US0003M) + 2.5%.
