

KEY INVESTOR INFORMATION DOCUMENT

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Jupiter Strategic Absolute Return Bond Fund

(the “Fund”), a sub-fund of Premium Selection UCITS ICAV (the “ICAV”)

Class: N dis USD (ISIN: IE00BMTVJH70)

This Fund is managed by Three Rock Capital Management Limited (the “Manager”), a wholly owned subsidiary of Julius Baer Group AG

OBJECTIVES AND INVESTMENT POLICY

Objective: The Fund aims to maximise total return, consisting of income and capital appreciation.

Policy:

The Fund aims to achieve its investment objective by investing worldwide primarily in debt securities, bonds and similar debt investments, issued or guaranteed by corporate and/or non-corporate (including government and supranational) issuers. The debt securities into which the Fund may invest include convertible bonds which may lead to a short-term exposure to equities pursuant to a conversion or corporate action. The convertible bonds in which the Fund may invest will not embed leverage. The Fund may invest up to 20% of NAV in emerging markets and up to 15% of NAV in the Chinese Bond Market via the Bond Connect scheme. The debt securities purchased by the Fund will be Investment Grade (BBB- or B3) and/or if unrated (up to 10% of NAV) of a comparable quality or (up to 20% of NAV) below Investment Grade.

Up to 10% of the Fund's NAV can be held in hybrid bonds which may be issued by financial institutions or non-financial issuers, specifically contingent convertible securities (“CoCos”). Additionally, up to 10% of the NAV of the Fund may be invested in collective investment schemes as well as cash and/or ancillary liquid assets. The Fund can take long and

short positions using derivatives, which may result in the Fund being leveraged.

Benchmark: US Federal Funds Effective Overnight Rate

Benchmark Purpose: The Fund is actively managed with reference to the the Benchmark. It seeks to deliver a return net of fees in excess of the Benchmark over rolling 3-year periods. The Benchmark is also used for risk comparison purposes.

Investors may buy and sell shares of the Fund on any bank working day in Ireland.

This share class normally pays an annual dividend based on reportable income.

Recommendation: The Fund should be held for a long-term investment horizon and it may not be appropriate for investors who plan to withdraw their money within five years.

For further information, please see the “Investment Objective” and “Investment Policy” sections of the Fund's Supplement.

RISK AND REWARD PROFILE

The synthetic risk reward indicator (the SRRI) rating shows what risk and reward characteristics the Fund has, based on the Fund's historical performance over the last 5 years. Where a 5-year performance history is not available, the history has been simulated on the basis of representative data.

On a scale of 1 (less risky) to 7 (more risky), this Share Class has a rating of 4 due to its past performance (or representative data) and the nature of its investments which include the risks listed below. These factors may impact the value of the Fund's investments or expose the Fund to losses.

Risk is taken in order to make a higher potential return; the more risk a fund takes, the higher the potential return but the greater the risk of loss. This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund. The risk category shown is not guaranteed and may change over time. The lowest category does not mean risk free.

The Fund does not offer the investor a guaranteed return. Nor does it guarantee the fixed repayment of the money invested in the Fund by the investor.

The indicator takes account of those risks which are entailed in the Fund's net asset value. These mainly involve fluctuations in the value of investments. In addition to the risks expressed through the indicator, the Fund's net asset value may also be significantly affected by the following factors:

Debt securities: There is a risk that issuers of debt securities held by the Fund may not be able to repay the investment or pay the interest due on it, leading to losses for the Fund. Debt securities values are affected by the market's view of the above risk, and by changes in interest rates and inflation. Changes in interest rates may negatively affect the value of the Fund. Typically as interest rates rise, debt securities values fall.

Derivatives: A significant portion of the Fund's assets may be invested in derivatives which can result in greater fluctuations of the Fund's value and may cause the Fund to lose as much as or more than the amount invested.

Currency: The Fund invests in other currencies. Changes in exchange rates will therefore affect the value of the investment.

Emerging Markets: A significant portion of the Fund's assets may be invested in emerging market assets. Emerging markets generally carry greater political, legal, counterparty and operational risk. In exceptional circumstances the Fund may encounter difficulties when buying and selling these investments.

Low rated bonds: The fund may invest in lower rated or unrated bonds of similar quality, which carry a higher degree of risk than higher rated bonds.

Convertibles: Convertible securities are investments that can be changed into another form upon certain triggers. As such, they can exhibit credit, equity and fixed interest risk. Contingent convertible securities (CoCos) are similar to convertible securities but have additional triggers which mean that they are more vulnerable to losses and volatile price movements and hence become less liquid.

For further information on risks, please refer to the Risk Factors section in the Funds prospectus and supplement.

CHARGES

The charges are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

| One-off charges taken before or after you invest | |
|----------------------------------------------------------------------------------------------------------------------------------|-------|
| Entry charge | 5.00% |
| Exit charge | 3.00% |
| This is the maximum that might be taken of your money before it is invested or before proceeds of your investments are paid out. | |
| Charges taken from the fund over a year | |
| Ongoing charges | 0.60% |
| Charges taken from the fund under certain specific conditions | |
| Performance fee | 0.00% |

The entry and exit charges shown are the maximum you will need to pay. In some cases you might pay less - you can find out the actual entry and exit charges from your financial adviser or distributor.

The ongoing charges figure shown here is an estimate of the charges based on a projection of the expenses of the Fund for the first twelve months of operation of the Fund. This figure may vary from year to year. It excludes portfolio trade-related costs, except costs paid to the custodian and any entry/exit charge paid by the fund when buying or selling units/shares in another collective investment undertaking (if any).

A switching charge of up to a maximum of 1.00% of the NAV may be applied.

You will find more details about the calculation of the charges by checking the respective part of the prospectus and of the relevant supplement.
