Investors should read the Key Investor Information Document and Prospectus prior to investing.

FUND OVERVIEW

The Fund aims to provide a return on your investment (generated through an increase in the value of the assets held by the Fund) over the long-term (5 years or more). The Fund invests at least 80% of its assets in equity securities (e.g. shares) and equity-related securities of companies domiciled in, or whose main business is in, global developed markets. The Fund may also, when determined appropriate, invest in other equity securities and equity-related securities and other asset classes to seek to achieve its investment objective and for liquidity purposes. The Investment Manager (IM) uses fundamental, company specific research to identify and select securities that, in its opinion, have the potential to produce attractive long-term growth. The Fund's portfolio is expected to be concentrated (i.e. a less diverse portfolio). The Fund has an unconstrained investment style (i.e. it will not take a benchmark index into account when selecting the Fund's investments). The IM takes into account certain environmental, social and governance (ESG) related characteristics when determining whether an investment is appropriate for the Fund (although ESG is not the sole consideration). The IM will do this by seeking to limit and/or exclude direct investment in companies which, in the opinion of the IM, have certain levels of exposure to, or ties with, certain sectors, as summarised in the Fund's Prospectus and set out in full on the Fund's product page at www.blackrock.com. The IM also intends to exclude companies deemed to have failed to comply with the UN Global Compact Principles (which covers human rights, labour standards, the environment and anti-corruption). The Fund may have indirect exposure (e.g. through financial derivative instruments (FDIs) and other funds) to issuers with exposures that are inconsistent with the IM's ESG analysis.

Key Risks Continued: Other influential factors include political, economic news, company earnings and significant corporate events. Investment risk is concentrated in specific sectors, countries, currencies or companies. This means the Fund is more sensitive to any localised economic, market, political or regulatory events. The Fund seeks to exclude companies engaging in certain activities inconsistent with ESG criteria. Investors should therefore make a personal ethical assessment of the Fund's ESG screening prior to investment. Such ESG screening may adversely affect the value of the Fund's investments compared to a fund without such screening.

SUSTAINABILITY CHARACTERISTICS

Sustainability Characteristics can help investors integrate non-financial, sustainability considerations into their investment process. These metrics enable investors to evaluate funds based on their environmental, social, and governance (ESG) risks and opportunities. This analysis can provide insight into the effective management and long-term financial prospects of a fund.

The metrics below have been provided for transparency and informational purposes only. The existence of an ESG rating is not indicative of how or whether ESG factors will be integrated into a fund. The metrics are based on MSCI ESG Fund Ratings and, unless otherwise stated in fund documentation and included within a fund's investment objective, do not change a fund's investment objective or constrain the fund's investable universe, and there is no indication that an ESG or Impact focused investment strategy or exclusionary screens will be adopted by a fund. For more information regarding a fund's investment strategy, please see the fund's prospectus.

MSCI ESG Fund Rating (AAA-CCC)	AA	MSCI ESG Quality Score (0-10)	7.55
MSCI ESG Quality Score - Peer Percentile	83.38%	MSCI ESG % Coverage	99.99%
Fund Lipper Global Classification	Equity Global	MSCI Weighted Average Carbon Intensity (Tons CO2E/\$M SALES)	13.83
Funds in Peer Group	5,427		

All data is from MSCI ESG Fund Ratings as of **21-Jun-2023**, based on holdings as of **28-Feb-2023**. As such, the fund's sustainable characteristics may differ from MSCI ESG Fund Ratings from time to time.

To be included in MSCI ESG Fund Ratings, 65% (or 50% for bond funds and money market funds) of the fund's gross weight must come from securities with ESG coverage by MSCI ESG Research (certain cash positions and other asset types deemed not relevant for ESG analysis by MSCI are removed prior to calculating a fund's gross weight; the absolute values of short positions are included but treated as uncovered), the fund's holdings date must be less than one year old, and the fund must have at least ten securities.

ESG GLOSSARY:

MSCI ESG Fund Rating (AAA-CCC): The MSCI ESG Rating is calculated as a direct mapping of ESG Quality Scores to letter rating categories (e.g. AAA = 8.6-10). The ESG Ratings range from leader (AAA, AA), average (A, BBB, BB) to laggard (B, CCC).

MSCI ESG Quality Score - Peer Percentile: The fund's ESG Percentile compared to its Lipper peer group.

Fund Lipper Global Classification: The fund peer group as defined by the Lipper Global Classification.

Funds in Peer Group: The number of funds from the relevant Lipper Global Classification peer group that are also in ESG coverage.

MSCI ESG Quality Score (0-10): The MSCI ESG Quality Score (0 - 10) for funds is calculated using the weighted average of the ESG scores of fund holdings. MSCI rates underlying holdings according to their exposure to industry specific ESG risks and their ability to manage those risks relative to peers.

MSCI ESG % Coverage: Percentage of the fund's holdings for which the MSCI ESG ratings data is available. The MSCI ESG Fund Rating, MSCI ESG Quality Score and MSCI ESG Quality Score - Peer Percentile metrics are displayed for funds with at least 65% coverage (or 50% for bond funds and money market funds).

MSCI Weighted Average Carbon Intensity (Tons CO2E/\$M SALES): Measures a fund's exposure to carbon intensive companies. This figure represents the estimated greenhouse gas emissions per \$1 million in sales across the fund's holdings. This allows for comparisons between funds of different sizes.

MSCI Weighted Average Carbon Intensity % Coverage: Percentage of the fund's holdings for which MSCI Carbon Intensity data is available. The MSCI Weighted Average Carbon Intensity metric is displayed for funds with any coverage. Funds with low coverage may not fully represent the fund's carbon characteristics given the lack of coverage.
