## CS (Lux) Floating Rate Credit Fund DBH CHF

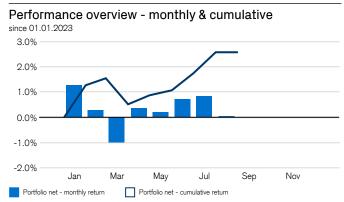

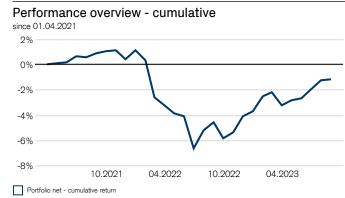

Fund details	
Investment Manager	Romeo Sakac, Harald Kloos
Fund launch date	01.04.2008
Share class launch date	04.03.2021
Share class	DBH
Share class currency	CHF
Distribution policy	Accumulating
Fund domicile	Luxembourg
ISIN	LU1007181891
Benchmark	No benchmark

#### Investment Policy

The fund invests predominantly in fixed income securities, with strategies rotating between various areas of the fixed income market, including developed and emerging markets, securitized bonds and sub-investment grade, to exploit changing opportunities, while seeking to minimize duration risk. It may apply derivative instruments to reduce the interest rate risk of debt instruments with extended maturity, targeting a duration between zero and one and a half years. The fund seeks to achieve a target return of SOFR plus 250 basis points p.a. on average over the full credit cycle.

Investing involves risk including the risk of loss of capital. Past performance does not predict future returns. Neither simulated nor historical performance is a reliable indicator for current or future performance.

Percentage of top 10 positions

The Fund's risk and reward profile does not reflect the risk inherent in future circumstances that differ from what the Fund has experienced in the recent past. This includes the following events which are rare but can have a large impact.

- Credit risk: Issuers of assets held by the Fund may not pay income or repay capital when due. The Fund's investments generally have low credit risk.
- Liquidity risk: Assets cannot necessarily be sold at limited cost in an adequately short timeframe. However, this Fund's investments
- should generally have good liquidity. Counterparty risk: Bankruptcy or insolvency of the Fund's derivative counterparties may lead to payment or delivery default. The
- Subfund will endeavor to mitigate this risk by the receipt of financial collateral given as guarantees.
- Operational risk: Deficient processes, technical failures or catastrophic events may cause losses.
- Political and Legal risks: Investments are exposed to changes of rules and standards applied by a specific country. This includes restrictions on currency convertibility, the imposing of taxes or controls on transactions, the limitations of property rights or other
- Sustainability risks: Sustainability risks are environmental, social or governance events or conditions that can have a material negative effect on the return, depending on the relevant sector, industry and company exposure.

The product's investment objectives, risks, charges and expenses, as well as more complete information about the product, are provided in the prospectus (or relevant offering document), which should be read carefully before investing.

Investors may lose part or all of their invested amount.

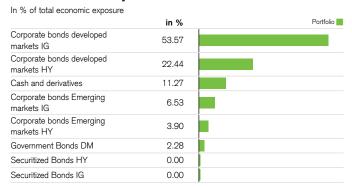

The full offering documentation including complete information on risks may be obtained free of charge from a Credit Suisse client advisor, representative, or, where applicable, via Fundsearch (credit-suisse.com/fundsearch). The investment promoted in this marketing material concerns the acquisition of units or shares in a fund and not of any underlying assets. The underlying assets are owned by the fund only.

<sup>&</sup>lt;sup>2</sup> The actual risk can vary significantly if you redeem at an early stage and you may get back less. The Summary Risk Indicator is a guide to the level of risk of this Product compared to other products. It shows how likely it is that the Product will lose money because of movements in the markets. Be aware of currency risk if your reference currency differs from the currency of the Product. You may receive payments in a different currency, so the final return you will get depends on the exchange rate between the two currencies. Investors shall note that the Product may be exposed to further risks such as operational, counterparty, political, sustainability and legal risks that are not included in the Summary Risk Indicator. This Product does not include any protection from future market performance so you could lose some or all of your investment.

#### Performance review

The fund's current yield to maturity is at 7.24% with a modified duration of 0.42 and a spread duration of 2.57. At the asset allocation level, the largest positive contributors were investment-grade (IG) corporate bonds with an overall contribution of +14 basis points (bps), followed by high-yield (HY) bonds with +7 bps and government bonds with +4 bps while emerging markets (EM) bonds were the underperformer with -1 bps. The contribution of the interest-rate swap overlay was flat in August. At the sector level, banks and in particular subordinated financials were the predominant positive contributor with +10 bps, followed by sovereigns with +3 bps, and health care with +3 bps. Within the rating buckets, BBB-rated bonds had the strongest positive performance with +12 bps, followed by BB-rated bonds with +5 bps. The fund further reduced exposure to sectors that are most affected by consumer-led recession; for example, cyclicals, consumer products, and health care may be areas to underweight, while banks, telecom, and utilities might be more favored given their all-weather qualities.

#### Market Review

In August, the 10-year US Treasury yield reached its highest level in the current cycle at 4.36%, a level last seen in 2007. In parallel, real yields moved higher to a peak of 2%. The moves came days after Fitch Ratings downgraded the US credit rating from AAA to AA+. Moreover, other catalysts were growing skepticism that the Fed was about to cut rates soon and an increased focus on budget deficits. In Europe, renewed concerns about the economy grew on the back of flash PMIs for August falling back to 47, worse than expected and the lowest since late 2020, and resilient CPI readings for the euro zone that came in at +5.3% for August. Lastly, concerns about China's economic outlook continued to grow amid the difficulties in the property sector, and industrial production growth and retail sales growth falling significantly. Global investment-grade (IG) corporate spreads (ICE BofA Global Corporate Index) widened by 4 bps to end the month at 136 bps, yields increased to 5.29%, and total return was at -0.4% in August. Global high-yield bonds (ICE BofA Global High Yield Index) widened 7 bps to 444 bps and delivered a monthly total return of 0.1%.

#### ESG Approach

This fund promotes environmental, social and governance (ESG) characteristics (within the meaning of Art. 8 of Regulation (EU) 2019/2088). It applies the CSAM Sustainable Investing Policy (www.credit-suisse.com/esg), including norms-based, values-based and business conduct exclusions, to combine ESG factors with traditional financial analysis to calculate a CSAM ESG signal, which serves as the basis for a bottom-up security selection process. For further information about the ESG investment criteria and the sustainability-related aspects of the fund please consider the legal and regulatory documents of the fund (such as, e.g., the prospectus) and visit www.credit-suisse.com/esg. In addition to sustainability-related aspects, the decision to invest in the fund should take into account all objectives and characteristics of the fund as described in its prospectus, or in the information which is to be disclosed to investors in accordance with applicable regulations.

Certain data points are provided for mere transparency purposes and are not linked to a specific ESG investment process, nor to CSAM ESG methodology. For details about the fund's ESG decision-making process, please refer to the fund's prospectus.

#### Warning statements

Asset breakdown	Indicative allocation may change over time. All holdings are shown strictly for information purposes only and do not constitute investment recommendations of Credit Suisse. Please note that this does not constitute an offer or a solicitation to buy or sell any interest or any investment.
Swinging Single Pricing	For more details, please refer to the relevant chapter "Net Asset Value" of the fund's prospectus
Performance start date	Performance calculation and presentation start with the first full month of an invested strategy. This can lead to a difference in launch and performance start dates.
PRIIP SRI	The Summary Risk Indicator is a guide to the level of risk of this Product compared to other products. It shows how likely it is that the Product will lose money because of movements in the markets.
Yield to maturity/Yield to worst	The shown yield to maturity/yield to worst is calculated as of 31.08.2023 and does not take into account costs, changes in the portfolio, market fluctuations and potential defaults. The yield to maturity / yield to worst is an indication only and is subject to change.

#### **ESG Notes**

The figures contained in this section are not audited. Where ESG related information, statements and scorings are made in this document, CS may have, partially or entirely, relied on publicly available information, internally developed data and/or information obtained from other third-party sources which CS believes to be reliable. CS' ability to verify such ESG objectives may be limited by the reliability of the data available in respect of the underlying assets and the status of the regulations in relation to tracking and providing such data. CS has not independently verified any information obtained from these public and third-party sources and cannot make any representations or warranties as to its accuracy, completeness or reliability. It is possible that the data from ESG data providers may be incorrect, unavailable, or not fully updated. This is especially true where CS has limited access to data from external parties regarding the underlying elements of an investment, for example due to a lack of look-through data. Such data gaps could result in an incorrect assessment of a sustainability practice and/or related sustainability risks and opportunities. Investors shall not use the ESG disclosures, which remain subject to change and cannot be relied upon. In particular, CS shall not be liable for any errors or omissions in connection with any ESG data herein, or for any direct, indirect, special, punitive, consequential or any other damages (including lost profits). In the absence of a standardized, industry-wide ESG classification system, CS has developed its own ESG framework (the "CS Sustainable Investment Framework"). Therefore, investors should note that the ESG classification of the fund reflects CS' opinion and is based on the CS Sustainable Investment Framework which classification may vary from the classification made by third parties. The fact that a fund follows the CS Sustainable Investment Framework does not necessarily mean that it meets the investors overall investment objectives, nor their
