INTERIM REPORT AND UNAUDITED FINANCIAL STATEMENTS

For the financial period ended 30 June 2023

Background to the ICAV

Amundi Fund Solutions ICAV (the "ICAV"), was authorised on 8 October 2020, is an umbrella fund with segregated liability between Sub-Funds registered as an Irish Collective Asset-management Vehicle ("ICAV") pursuant to the Irish Collective Asset-management Vehicles Acts 2015 - 2021 (as amended) (the "ICAV Acts 2015 - 2021") on 8 October 2020 with registration number C434076. The ICAV is established as an undertaking for collective investment in transferable securities pursuant to the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 (as amended), (the "UCITS Regulations") and Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 (the "Central Bank UCITS Regulations").

The ICAV had nine active sub-funds at the reporting date ("Sub-Fund(s) or 'Fund(s)"):

- Select Investment Grade Bond which was authorised by the Central Bank of Ireland on 8 October 2020 and launched on 31 March 2021.
- Sabadell Urquijo Acumulación which was authorised by the Central Bank of Ireland on 3 November 2020 and launched on 14 December 2020.
- Sabadell Urquijo Crecimiento which was authorised by the Central Bank of Ireland on 3 November 2020 and launched on 14 December 2020.
- Global Multi-Asset Growth which was authorised by the Central Bank of Ireland on 25 January 2021 and launched on 28 April 2021.
- Multi-Asset Vario which was authorised by the Central Bank of Ireland on 11 May 2022 and launched on 8 June 2022
- Protect 90 which was authorised by the Central Bank of Ireland on 30 June 2022 and launched on 11 August 2022.
- Planet ESG Balanced which was authorised by the Central Bank of Ireland on 15 July 2022 and launched on 5 August 2022.
- Planet ESG Conservative which was authorised by the Central Bank of Ireland on 15 July 2022 and launched on 5
 August 2022.
- Planet ESG Dynamic which was authorised by the Central Bank of Ireland on 15 July 2022 and launched on 5 August 2022.

At the financial period end, the following share classes were in operation:

- Classes of shares in issue for Select Investment Grade Bond: EUR QI2, EUR QI2 QTD, EUR QI3;
- Classes of shares in issue for Sabadell Urquijo Acumulación: EUR A2, EUR A2 QD, USD A2, USD A2 QD, EUR R2, EUR R2 QD;
- Classes of shares in issue for Sabadell Urquijo Crecimiento: EUR A2, EUR A2 QD, USD A2, USD A2 QD, EUR R2, EUR R2 QD;
- Classes of shares in issue for Global Multi-Asset Growth: USD A2, EUR A2, EUR A2 QD, EUR A2 QD (HGD), USD I2, EUR I2, EUR M2 USD R2, USD Z2;
- Classes of shares in issue for Multi-Asset Vario: EUR A2, EUR I2, EUR J2, EUR L2, EUR R2;
- Classes of shares in issue for Protest 90: EUR A2;
- Classes if shares in issue Planet ESG Balance: EUR A2, USD A2, GBP A2, EUR I2, USD I2, GBP I2, EUR R2, USD R2 and GBP R2;

- Classes if shares in issue Planet ESG Balance: EUR A2, USD A2, GBP A2, EUR I2, USD I2, GBP I2, EUR R2, USD R2 and GBP R2.

INTERIM REPORT AND UNAUDITED FINANCIAL STATEMENTS

For the financial period ended 30 June 2023

Background to the ICAV (continued)

The Euro ("EUR") is the currency in which the ICAV and all Sub-Funds measure their performance and report their results with the exception of the Global Multi-Asset Growth Fund who measures performance and reports their results in U.S. Dollar ("USD").

Select Investment Grade Bond Investment Objectives and Policies

Investment Objective

The Sub-Fund seeks to increase the value of investment and to provide income over the recommended holding period.

Investment Policies

The Sub-Fund seeks to achieve its investment objective by investing mainly in Euro denominated Investment Grade corporate and government bonds (fixed or floating rate), that are listed or traded on a Permitted Market.

The Sub-Fund may invest up to 10% of its assets in Euro denominated Investment Grade Emerging Markets corporate bonds. The maturity of the above listed instruments will be no longer than 10 years.

The Fund may also hold cash and instruments that may be readily converted to cash (including cash deposits, European treasury bills and government bonds, short-term corporate bonds, commercial paper, short term Money Market Instruments and certificates of deposit).

Sabadell Urquijo Acumulación Investment Objectives and Policies

Investment Objective

The Sub-Fund seeks to increase the value of investment over the recommended holding period. Investors should be aware that there is no guarantee that the Sub-Fund will achieve its investment objective.

Investment Policies

The Sub-Fund seeks to achieve its investment objective through investment on a multi asset basis in the following asset classes: (i) equities; (ii) Equity Related Securities; (iii) bonds (fixed or floating rate which may be rated above or below Investment Grade); (iv) commodities (indirectly through investment in Exchange Traded Commodities or exchange traded funds); and (v) real estate (indirectly through investment in eligible real estate investment trusts (the "Asset Classes").

While the Sub-Fund can invest directly in the Asset Classes, it shall mainly invest through Underlying Funds.

The Sub-Fund will not be confined to any geographical region or industry when making its investments and may invest without limit in Emerging Markets (which in the case of investment in securities that are listed/traded on the Moscow exchange, subject to a maximum investment of 5% of Net Asset Value) and below Investment Grade securities.

In normal market conditions, the Sub-Fund will, in aggregate, invest up to 40% of its Net Asset Value in equities (including Emerging Markets equities), below Investment Grade bonds, Emerging Markets bonds, commodities (which shall for the purpose of this limit exclude gold), and real estate. The balance will be invested in other assets within the Asset Classes.

While the Sub-Fund will typically gain exposure to currencies via currency forwards it may also invest directly in currencies of developed and Emerging Markets countries, in order to allow the Sub-Fund to benefit from perceived mispricing of such currencies against the base currency of the Sub-Fund.

The Sub-Fund may also hold cash and instruments that may be readily converted to cash (including cash deposits, European treasury bills and government bonds, short-term corporate bonds, commercial paper, short term Money Market Instruments and certificates of deposit.

INTERIM REPORT AND UNAUDITED FINANCIAL STATEMENTS

For the financial period ended 30 June 2023

Background to the ICAV (continued)

Sabadell Urquijo Crecimiento Investment Objectives and Policies

Investment Objective

The Sub-Fund seeks to increase the value of investment over the recommended holding period. Investors should be aware that there is no guarantee that the Sub-Fund will achieve its investment objective.

Investment Policies

The Sub-Fund seeks to achieve its investment objective through investment on a multi asset basis in the following asset classes: (i) equities; (ii) Equity Related Securities; (iii) bonds (fixed or floating rate which may be rated above or below Investment Grade); (iv) commodities (indirectly through investment in Exchange Traded Commodities or exchange traded funds); and (v) real estate (indirectly through investment in eligible real estate investment trusts (the "Asset Classes").

While the Sub-Fund can invest directly in the Asset Classes, it shall mainly invest through Underlying Funds.

The Sub-Fund will not be confined to any geographical region or industry when making its investments and may invest without limit in Emerging Markets (which in the case of investment in securities that are listed/traded on the Moscow exchange, subject to a maximum investment of 5% of Net Asset Value) and below Investment Grade securities.

The Sub-Fund aims to achieve equity-like returns by investing in the Asset Classes but with reduced volatility over the longer term. In order to seek to achieve this, in normal market conditions, the Sub-Fund will, in aggregate, invest between 40% and 80% of its Net Asset Value in equities (including Emerging Markets equities), below Investment Grade bonds, Emerging Markets bonds, commodities (which shall for the purpose of this limit exclude gold), and real estate. The balance will be invested in other assets within the Asset Classes.

While the Sub-Fund will typically gain exposure to currencies via currency forwards it may also invest directly in currencies of developed and Emerging Markets countries, in order to allow the Sub-Fund to benefit from perceived mispricing of such currencies against the base currency of the Sub-Fund.

The Sub-Fund may also hold cash and instruments that may be readily converted to cash (including cash deposits, European treasury bills and government bonds, short-term corporate bonds, commercial paper, short term Money Market Instruments and certificates of deposit.

Global Multi-Asset Growth Objectives and Policies

Investment Objective

The Sub-Fund seeks to increase the value of investment and to provide income over the recommended holding period. Investors should be aware that there is no guarantee that the Sub-Fund will achieve its investment objective.

Investment Policies

The Sub-Fund seeks to achieve its investment objective by investing mainly in a broad range of global equities, equity related securities and government and corporate Investment Grade bonds (fixed or floating rate).

The Sub-Fund may also invest up to 20% of its Net Asset Value in below Investment Grade government and corporate bonds fixed or floating rate) and up to 10% of its Net Asset Value in convertible bonds, which shall not embed FDI and/or leverage (the Sub-Fund shall not however invest in contingent convertible securities).

Such securities are listed or traded on a Permitted Market and may be from anywhere in the world, including up to 50% of its Net Asset Value in Emerging Markets. The Sub-Fund will not invest more than 5% of its Net Asset Value in securities that are listed/traded on the Moscow exchange.

INTERIM REPORT AND UNAUDITED FINANCIAL STATEMENTS

For the financial period ended 30 June 2023

Background to the ICAV (continued)

Global Multi-Asset Growth Objectives and Policies (continued)

Investment Policies (continued)

The Sub-Fund may also have indirect exposure to commodities (up to 20% of its Net Asset Value) through investment in other collective investment schemes and Exchange Traded Commodities and real estate investment trusts (up to 10% of its Net Asset Value) through investment in such collective investment schemes.

While the Sub-Fund will typically gain exposure to currencies via currency forwards it may also invest directly in currencies of developed and Emerging Markets countries, in order to allow the Sub-Fund to benefit from perceived mispricing of such currencies against the base currency of the Sub-Fund.

The Sub-Fund may also hold cash and instruments that may be readily converted to cash (including cash deposits, treasury bills and government bonds, short-term corporate bonds, commercial paper, short term Money Market Instruments and certificates of deposit).

Multi-Asset Vario Objectives and Policies

Investment Objective

The Sub-Fund seeks to increase the value of investment while closely monitoring the targeted yearly risk budget over the recommended holding period. Investors should be aware that there is no guarantee that the Sub-Fund will achieve its investment objective.

Investment Policies

The Sub-Fund seeks to achieve its investment objective by investing mainly in government and corporate Investment Grade bonds (fixed or floating rate) as well as up to 20% of its Net Asset Value in a broad range of global equities and Equity Related Securities.

The Sub-Fund may also invest up to 20% of its Net Asset Value in below Investment Grade government (fixed or floating rate) and up to 10% of its Net Asset Value in convertible bonds, which shall not embed FDI and/or leverage (the Sub-Fund shall not however invest in contingent convertible securities).

Such securities are listed or traded on a Permitted Market and may be from anywhere in the world, including up to 30% of its Net Asset Value in Emerging Markets, subject to a limit of 10% of its Net Asset Value in Mainland China through the Bond Connect.

The Sub-Fund may also have indirect exposure to commodities (up to 10% of its Net Asset Value) through investment in other collective investment schemes and Exchange Traded Commodities and real estate (up to 10% of its Net Asset Value) through investment in eligible real estate investment trusts.

The Sub-Fund may also hold instruments that may be readily converted to cash (including Treasury Bills and Government Bonds, short-term Corporate Bonds, Commercial Paper, short term Money Market Instruments and Certificates of Deposit) and up to 20% of its Net Asset Value in cash (including cash deposits).

Protect 90 Objectives and Policies

Investment Objective

The Sub-Fund seeks to increase the value of investment, while providing Shareholders with permanent partial protection of their investment. Specifically, the Sub-Fund is designed to ensure that the Net Asset Value per Share of a Class does not fall below 90% of the highest Net Asset Value per Share of a Class recorded, commencing from the launch date of the Sub-Fund.

INTERIM REPORT AND UNAUDITED FINANCIAL STATEMENTS

For the financial period ended 30 June 2023

Background to the ICAV (continued)

Protect 90 Objectives and Policies (continued)

Investment Objective (continued)

The Sub-Fund does not provide full capital protection but rather aims to provide permanent partial protection on a Class by Class basis of 90% of the highest Net Asset Value per Share of the relevant Class achieved on any day recorded, commencing from the launch date of the Sub-Fund. Depending on the performance of the Sub-Fund, the Repurchase Proceeds payable to a Shareholder of such Class upon a redemption of its Shares may be less than the amount originally invested by such Shareholder but will be at least 90% of the highest ever Net Asset Value achieved by those Shares.

Shareholders benefit from a daily protection representing 90% of the highest-ever Net Asset Value per Share of a Class recorded since the Sub-Fund launch date regardless of their subscription date. A legally enforceable agreement has been put in place between the ICAV and the Protection Provider (the "Protection Agreement") under which the Protection Provider undertakes to pay the outstanding amount in order for the relevant Class to reach the Floor NAV (the "Protection Amount").

When the protection feature is triggered, the Directors shall call upon the Protection Provider to pay to the Sub-Fund the Protection Amount and shall terminate the Sub-Fund in accordance with the Instrument of Incorporation. The initial term of the Protection Agreement is five years beginning from the launch of the Sub-Fund.

Investment Policies

The Sub-Fund seeks to achieve its investment objective through investment on a multi asset basis in the following asset classes: (i) equities; (ii) Equity Related Securities; (iii) bonds (government or corporate, fixed or floating rate which may be rated above or below Investment Grade); (iv) convertible bonds which shall not embed FDI and/or leverage (the Sub-Fund shall not however invest in contingent convertible securities); and (v) commodities (indirectly through investment in Exchange Traded Commodities or exchange traded funds) (the "Asset Classes").

The Sub-Fund will not be confined to any geographical region or industry when making its investments and may invest up to 30% of its Net Asset Value in Emerging Markets.

In normal market conditions, the Sub-Fund will invest up to 30% of its Net Asset Value in equities and Equity Related Securities. The Sub-Fund may invest up to 10% of its Net Asset Value in below Investment Grade bonds, and up to 5% of its Net Asset Value in commodities.

Planet ESG Balanced Objectives and Policies

Investment Objective

This Sub-Fund seeks to achieve capital appreciation and income over the recommended holding period. Investors should be aware that there is no guarantee that the Sub-Fund will achieve its investment objective.

Investment Policies

The Sub-Fund seeks to achieve its investment objective through investment on a multi-asset basis in the following asset classes: (i) equities; (ii) equity related securities; (iii) bonds (government or corporate, fixed or floating rate which may be rated above or below Investment Grade); (iv) convertible bonds which shall not embed FDI and/or leverage (the Sub-Fund shall not however invest in contingent convertible securities); and (v) commodities (indirectly through investment in Exchange Traded Commodities or exchange traded funds) (the "Asset Classes").

While the Sub-Fund can invest directly in the Asset Classes, it shall mainly invest through Underlying Funds.

The Sub-Fund will not be confined to any geographical region or industry when making its investments and may invest up to 20% of its Net Asset Value in Emerging Markets.

INTERIM REPORT AND UNAUDITED FINANCIAL STATEMENTS

For the financial period ended 30 June 2023

Investment Manager's Report

Market Environment 2023:

Year To Date ("YTD") summary: Global equities gained in the first six months buoyed by receding recession worries in developed markets. Within equity markets, the big growth stocks, which fell sharply last year bounced back strongly, returning 27% year to date and 11% over the quarter. Value stocks lagged, up only 5% year to date. Bonds were also hit hard last year but are yet to recover meaningfully with global government bonds only up 1% YTD. Commodities, which were last year's star performer, gave up some of those gains this year, down 3% for the quarter and 8% for the year.

Equity market

The strong return for stocks so far this year has been helped by the fact that the much anticipated rise in developed world unemployment is yet to materialise, along with optimism that US inflation might be able to moderate significantly without the need for a rise in unemployment. Positive sentiment around artificial intelligence has also driven spectacular performance for some of the world's largest stocks. The best performing major equity market in local currency terms, both over the quarter (up 14%) and the first half of the year (up 23%), was Japan. The yen weakened versus other major trading partners as interest rates remained low in Japan and the Bank of Japan maintained its yield curve control policy to anchor government bond yields, while interest rates ratcheted higher in most other countries. This weakness in the yen helped support Japanese stocks, many of which earn a significant proportion of their profits abroad. Of course, the yen weakness would have reduced the extent of the equity gains for unhedged foreign investors. US stocks were the next best performing market in local currency terms, up 9% over the quarter and 17% for the year to date. These gains were driven almost entirely by the largest growth stocks (think "mega-cap tech") which are disproportionately found in the US, with the rest of the market delivering much more muted returns so far this year.

Outside Japan and the US, equity returns were less exciting this quarter. Over the year to date though, European stocks remain up a healthy 14%. EM stocks were held back by fading optimism over China after its initial reopening-driven rally.

Global bonds

Within fixed income, the best performing assets so far this year have been high yield credit and Italian government bonds, both returning about 5%, while the worst performing has been UK Gilts, down just under 4%. High yield credit and Italian debt benefitted from their higher starting yields and economic resilience. UK Gilts, on the other hand, suffered in the face of ongoing inflation headwinds that led markets to price an even higher interest rate peak of around 6% and for rates to stay higher for longer.

US inflation fell sharply from a peak of 9% down to 4%, largely due to favourable base effects from oil prices, which peaked last June and have come down significantly since. Core inflation remained stickier but may also be helped by a moderation in shelter inflation ahead, as the material slowdown in house price and rent growth starts to be reflected in the official core inflation numbers. That said, the Atlanta Fed's median wage growth tracker continued to show wages growing at 6%. This is not surprising given the low unemployment rate but is clearly not consistent with inflation falling sustainably to 2%. Retail sales growth remained in positive territory, but the decline in business investment intentions and weak corporate loan demand pose risks to the economy going forward. Risks to small bank lending, particularly linked to potential losses on commercial real estate loans – to which small banks are disproportionately exposed – are also worth monitoring closely. Wage growth in the UK came in even hotter than in the US, rising by 7% year on year. Core services inflation also accelerated, reflecting the pick-up in wage growth. This led the Bank of England to raise interest rates rapidly to 5%. So far, not that many households have felt the pain of higher rates thanks to their fixed-rate mortgage deals, but 2.4 million more households will see their cheap fixed-rate deals expire over the next 18 months.

Multi-Asset Vario

Performance: June 30th, 2023

• Amundi Fund Solutions ICAV – Multi Asset VaRIO®: (Class EUR I2) - 0.66%

• BM: Euribor 3 Months: 1.52%

The portfolio underperformed index and peers (78th percentile YTD and 68th percentile). Performance improved during the second quarter, but still lagged the cash benchmark. The market environment is very difficult for risk adjusted return strategies, when risk on asset classes are leading the market and "safe haven" asset classes are significant lagging. Developed equites had double digit returns, whereas global agg index returned a meagre 1.4%. Even in the fixed income universe, risk asset classes as high yield (US and $\mathfrak E$) and emerging market debt significantly outperformed "defensive" asset classes as US Treasuries and Euro government bonds.

The collapse of Silicon Valley Bank introduced a level of volatility back into markets. Equities initially reacted with a sharp sell-off as fears of financial contagion grew. A strong policy response from regulators restored a level of confidence to the banking system and calm to equity markets, which rebounded over the subsequent weeks. The VaRIO® model reacts to volatility and cut risk immediately. Therefore, the cautious asset allocation detracted from positive performance, overall. The equity allocation is beyond 10%. Duration is very short, commodity allocation did not pay off, either.

Security allocation in the bond universe was the main contributor of the strategy. Equity allocation, especially IT and CD stocks also contributed positively to the performance. The five best performing securities were Meta Platforms (former Facebook) (+35.4%), Microsoft (+18.4%), Alphabet (former Google -15.4%), Adobe Inc (26.9%), and semiconductor Advance Micro Devices.

Index futures in the bond and equity space (used for hedging purposes) detracted from performance. Overweight positions and stock picking in such defensive sectors as healthcare (Pfizer) and utilities were also main detractors. Estee Lauder and ATandT (both defensive stocks) and financial stocks such as Chubb Ltd. and Cigna were lagging the markets. CDS (used again to hedge risk) was also a main driver for negative performance.

Investment Manager's Report (continued)

Select Investment Grade

Performance: June 30th, 2023

• Amundi Fund Solutions ICAV – Select Investments Grade Bond Class EUR QI3: 2.68%

The Portfolio is managed as buy and maintain with no hedging allowed (100% €). Duration has been reduced to 3.56 years with an average rating of BBB, the portfolio is highly sensitive to rate and spread volatility. The portfolio changes during the year have been small and insignificant. The performance was mainly achieved in early Q1. In Q2, overall performance was flat. With a recovery across all sectors, the biggest return drivers were the largest positions. Real Estate (1.05%), Auto (0.40%) and Utilities (0.32%) were the top three sector performers and Germany (0.9%), UK (0.46%) and US (0.46%) the top contributors by country. Swedish (-0.14%) and Czech (-0.03%) Real estate names were the two bottom contributors by country. In terms of Issuers, all names with the exception of three issuers delivered positive return. Heibos, CPI property and Unibail Rodamco were the three bottom names. The main focus over 2023 is on de-risking the portfolio while maintaining the same level of yield. The large flattening of the Euro curve meant that similar or higher yields could be obtained from short-dated maturities. Also, the portfolio manager improved the rating by adding higher rated (A or A-) names, such as ESB Ireland and French Post. She took opportunities to reduce concentration in sectors such as real estate and REITs, and where possible, move into short-dated maturities of the same issuer. This was done with Vonovia in particular, as well as selling out of Immofinance.

Global Multi Asset Growth

Performance: June 30th, 2023

Amundi Fund Solutions ICAV – Multi Asset Growth Class USD I2: 5.39%

• Benchmark: 70% MSCI ACWI and 30% Bloomberg Global Aggregate Bond Index: 10.12%

The fund has underperformed benchmark and peers (70^{th} percentile YTD and 87^{th} percentile last quarter). The process is based on 4 pillars: three alpha-generating strategies (Macro Strategy, Satellite and Security Selection) as well as a Macro Hedging strategy, which aims to mitigate risk. Three out of the four pillars detracted from performance and only one strategy contributed. Both quarters had similar negative results.

The selection pillar is responsible for 65% of the significant underperformance. The US equity selection (last year's number one contributor) was the main detractor for performance. The value tilt (growth stocks outperforming value securities by 22%) was the main driver of negative performance. The value tilt is also responsible for the underweight in IT (especially non-investment in AI-securities), which was the best performing sector YTD. To make matters worse, the portfolio managers had an overweight position in financials. Bank stocks were under pressure, following the collapse of the Silicon Valley Bank and Signature Bank in March. The fund never had an exposure to US regional banks. The size tilt (mid-cap tilt) did not help either, as giant stocks outperformed small caps by a significant margin. While there was broad market strength over the quarter, index performance was driven by a narrow selection of "Big Tech" stocks, particularly those most exposed to the long-term secular trend of artificial intelligence.

The macro pillar is another detractor of positive performance. The cautious asset allocation (underweight of equity exposure, off-benchmark commodities) is due to recession fears in US and Europe, but is partly responsible for the significant underperformance in a risk-on market. The duration management (especially the short US stance) and underweight of US and European stocks were the main drivers of negative performance within the macro strategy. Both off-benchmark commodities allocations (gold and oil) were another main detractor, as oil and gold prices declined during the first half year.

The hedge strategy, especially of US equities (recession fear), negatively contributed to performance. The aggressive hedge strategy is in line with the cautious asset allocation. Risk mitigating measures cost money in a risk-on environment (developed markets performed 15.4%).

INTERIM REPORT AND UNAUDITED FINANCIAL STATEMENTS

For the financial period ended 30 June 2023

Investment Manager's Report (continued)

Global Multi Asset Growth (continued)

The satellite strategy performed positively. The currency – (long US\$/short €) and the equity strategy (long NASDAQ®/short Russell 2000) were the main contributors within the pillar.

Sabadell Urguijo Acumalacion

Performance: June 30th, 2023

- Amundi Fund Solutions ICAV Sabadell Urquijo Acumalacion Class EUR A2: -0.78%
- Benchmark: 8.5% ICE BOFA Euro Large Cap Corporate Index and 1.4% MSCI Japan and 5.5% MSCI Europe (15) NR and 4% ICE BOFA Euro High Yield Index and 37% Bloomberg Euro Aggregate and 8% JP Morgan EMU Government Bond Index and 10% MSCI North America and 2.2% MSCI EM and 0.9% MSCI Pacific free ex Japan and 1.5% ICE BOFA US Large Cap Corporate Index hedged and 15% ICE BOFA Euro Treasury Bill Index and 0.25% ETFS Hedged WTI CRUDE OIL and 5% Bloomberg US Aggregate hedged and 0.75% GOLD SPOT \$/OZ: -3.68%

The fund has underperformed benchmark and peers (98th percentile YTD and 97th percentile last quarter). The process is based on 4 pillars: three alpha-generating strategies (Macro Strategy, Satellite and Security Selection) as well as a Macro Hedging strategy, which aims to mitigate risk. Three out of the four pillars detracted from performance and only one strategy contributed. Both quarters had similar negative results.

The macro strategy is the number one detractor of positive performance. The cautious asset allocation (underweight of equity exposure, off-benchmark commodities) is due to recession fears in US and Europe, but is mainly responsible for the significant underperformance in a "risk-on" market. The positioning of the fund has changed in June to a slightly more aggressive allocation (overweight equities, but underweight bonds and overweight money market). The change has not impacted performance, so far. Key detractors besides the significant equity underweight position were the allocation to Chinese equities (off-benchmark bet). The short US high yield and the long duration in Japanese bonds were the main detractors in the fixed income universe. The steepening bet on the Canada curve (2Y-10Y) did not help either.

The commodity allocation to gold, oil and absolute return strategy contributed negatively during the equity bull market of the first six months. Gold and oil prices declined YTD. Four of the five largest detractors of the fund were macro strategy bets in the last quarter and YTD: US duration of 2Y, US equity underweight, Japanese equity overweight and off benchmark allocation to Chinese equities. The short duration within Euro fixed income did not help performance.

The hedge strategy, especially of US equities (recession fear), negatively contributed to performance. The aggressive hedge strategy is in line with the cautious asset allocation. Risk mitigating measures cost money in a risk-on environment (developed markets performed 15.4%).

The fund selection detracted, but not significantly. The reduction of US growth funds (last year main detractors) contributed negatively in a strong growth rally. While there was broad market strength over the quarter, index performance was driven by a narrow selection of "Big Tech" stocks, particularly those most exposed to the long-term secular trend of artificial intelligence. As a consequence, the size tilt (mid-cap tilt) did not help either, as giant stocks outperformed small caps by a significant margin.

The satellite strategy performed positively. The currency - (long US\$/short €) bet in the second quarter and the equity strategy (long NASDAQ®/short Russell 2000) were the main contributors within the pillar.

INTERIM REPORT AND UNAUDITED FINANCIAL STATEMENTS

For the financial period ended 30 June 2023

Investment Manager's Report (continued)

Sabadell Urguijo Crecimiento

Performance: June 30th, 2023

Amundi Fund Solutions ICAV – Multi Asset Growth Class EUR A2: 4.05%

• Benchmark: 60% MSCI ACWI and 40% Bloomberg Euro Aggregate Bond Index: 7.72%

The fund has underperformed benchmark and peers (55th percentile YTD and 55th percentile last quarter). The process is based on 4 pillars: three alpha-generating strategies (Macro Strategy, Satellite and Security Selection) as well as a Macro Hedging strategy, which aims to mitigate risk. Three out of the four pillars detracted from performance and only one strategy contributed. Both quarters had similar negative results.

The macro strategy is the number one detractor of positive performance. The cautious asset allocation (underweight of equity exposure, off benchmark commodities and cash position) is due to recession fears in US and Europe, but is mainly responsible for the significant underperformance in a "risk on" market. The positioning of the fund has changed in June to a slightly more aggressive allocation (overweight equities, but underweight bonds and overweight money market). The change has not impacted performance, so far. Key detractors beside the significant equity underweight position were the allocation to Chinese equities (off benchmark bet). The duration management (especially in the US) and short high yield position were the main detractors in the fixed income universe. The steepening bet on the Canada curve (2Y-10Y) did not help either. The commodity allocation to gold and oil and absolute return strategy contributed negatively during the equity bull market of the first six months. Gold and oil prices declined YTD. Four of the five largest detractors of the fund were macro strategy bets in the last quarter and YTD.

The hedge strategy, especially of US equities (recession fear), negatively contributed to performance. The aggressive hedge strategy is in line with the cautious asset allocation. Risk mitigating measures cost money in a risk on environment (developed markets performed 15.4%).

The hedging pillar has been the best performing pillar. Especially the hedging of the US Equity portion, followed by DAX hedges and credit hedges, has helped performance.

The fund selection was the only contributor to performance. The reduction of US growth funds (last year main detractors) has been negative in a strong growth rally. Nevertheless, the aggressiveness (strong growth bias) of the US equities funds could leverage from the bull market of the "Big Tech" stocks, particularly those most exposed to the long-term secular trend of artificial intelligence. The selection in Emerging Markets and Asia ex Pacific funds have been successful and helped performance. The size tilt (mid-cap tilt) detracted from performance, as giant stocks outperformed small caps by a significant margin.

The satellite pillar was slightly negative, especially the gold trade detracted from performance. The FX trades (long HUF/short \in) also did not help.

The positioning of the portfolio is now aggressive. The portfolio management team increased equities, in favour of reducing bonds and commodities. The equity portion slightly over weights US and Emerging Markets. Sector bets are overweight in IT and CD. The modified duration is higher, but credit spread duration is lower than benchmark.

INTERIM REPORT AND UNAUDITED FINANCIAL STATEMENTS

For the financial period ended 30 June 2023

Investment Manager's Report (continued)

Protect 90

Performance: June 30th, 2023

• Amundi Fund Solutions ICAV – Protect 90 Class EUR A2: 1.55%

The fund started well into 2023 in a benign market environment (risk-on). The second quarter continued the positive trend. The portfolio benefiting from the changes of the last year:

- Equity and bond allocation increased, reducing the cash exposure
- Longer duration
- US\$ exposure increased

Most of the risk-on asset classes are responsible for the absolute positive performance (even outperforming Euribor 1Month). The bull market of equities have been leveraged by the portfolio managers. The equity exposure (US, global, Europe and Emerging Markets) has been the main contributor of the portfolio. Even Japanese equities achieved absolute positive performance. Italian BTPs also positively impacted the solid track record. Emerging Markets debt also helped during the first six months.

The "safe haven" asset classes struggled and reported flat (slightly negative) performance. US (Treasury and IG) bonds detracted from positive performance. Euroland bonds had similar results. Corporate bonds (short- or long term) were insignificant detractors. Nevertheless, the bond portfolio (50%+ allocation) could not wipe out the gains of the equity sleeve (7%).

The positioning (end of June) is still very defensive with a high allocation to cash (\sim 35%) and low allocation to equities (8%). The portfolio is \in centric (close to 90%). Yield, modified and spread duration is a little lower than a \in bond benchmark.

Planet ESG Conservative

Performance: June 30th, 2023

- Amundi Fund Solutions ICAV Planet ESG Conservative Class EUR I2: 2.65%
- Benchmark: 25% MSCI ACWI and 75% Bloomberg Euro Aggregate Bond Index: 4.51%

The fund has underperformed benchmark, but has outperformed peers (43rd percentile YTD and 61st percentile last quarter). The process is based on 4 pillars: three alpha-generating strategies (Macro Strategy, Satellite and Security Selection) as well as a Macro Hedging strategy, which aims to mitigate risk. All four pillars detracted from performance. Both quarters had similar negative results (two pillars underperformed in the second quarter).

The macro strategy was the number one detractor of positive performance and was mainly (two third due to the performance attribution) responsible for the significant underperformance. The cautious asset allocation (underweight of equity exposure, high cash allocation) is due to recession fears in US and Europe, but is mainly responsible for the significant underperformance in a "risk on" market. Key detractors beside the significant equity underweight position were the allocation to Chinese equities (off benchmark bet). The duration management (especially in the US) has significantly detracted from performance. The steepening bet on the Canada curve (2Y-10Y) did not help either. The macro currency bets also contributed negatively.

The hedge strategy, especially of US equities (recession fear), did not help performance. The aggressive hedge strategy is in line with the cautious asset allocation. Risk mitigating measures cost money in a risk on environment (developed markets performed 15.4%).

INTERIM REPORT AND UNAUDITED FINANCIAL STATEMENTS

For the financial period ended 30 June 2023

Investment Manager's Report (continued)

Planet ESG Conservative

The selection pillar had only a small impact on the portfolio. ETFs usually do not significantly deviate from the benchmark. ESG (as a theme - long) is the only major contributor to tracking error. To make matters worse, ESG has lagged and underperformed the broad market. Therefore, ESG US Leaders ETF was one of the top five detractors. While there was broad market strength over the quarter, index performance was driven by a narrow selection of "Big Tech" stocks, particularly those most exposed to the long-term secular trend of artificial intelligence. As a consequence, the size tilt (mid-cap tilt) did not help either, as giant stocks outperformed small caps by a significant margin.

The satellite pillar was slightly negative, too. The currency bets (long NOK/short £ and NZ\$) slightly detracted from positive performance, despite being in positive absolute territory.

The positioning is still defensive, but closer to neutral than at the start of the year. The equity allocation has been increased (still 9% underweight). The bond exposure is also ~2-3% underweight. Cash has been reduced to close to 10%. The portfolio is € centric. The equity sleeve is slightly tilted to quality growth (ESG impact) and has a small negative size bias. Valuation factors are significant negative (sign of premium of the portfolio). The factor is proven by the ratios (especially high P/B, PFCF and P/S) of the fund of ETF portfolio. Modified and credit spread duration is longer (despite reducing in December) than benchmark's duration. The off-benchmark high yield is also risk on.

Planet ESG Balanced

Performance: June 30th, 2023

- Amundi Fund Solutions ICAV Planet ESG Balanced Class EUR I2: 4.03%
- Benchmark: 50% MSCI ACWI and 50% Bloomberg Euro Aggregate Bond Index: 6.79%

The fund has underperformed benchmark and peers (89th percentile YTD and 66th percentile last quarter). The process is based on 4 pillars: three alpha-generating strategies (Macro Strategy, Satellite and Security Selection) as well as a Macro Hedging strategy, which aims to mitigate risk. All four pillars detracted from performance. Both quarters had similar negative results (three pillars underperformed in the second quarter).

The macro strategy was the number one detractor of positive performance and was mainly (two third due to the performance attribution) responsible for the significant underperformance. The cautious asset allocation (underweight of equity exposure, high cash allocation) is due to recession fears in US and Europe, but is mainly responsible for the significant underperformance in a "risk on" market. Key detractors beside the significant equity underweight position were the allocation to Chinese equities (off benchmark bet). The duration management (especially in the US) has significantly detracted from performance. The steepening bet on the Canada curve (2Y-10Y) did not help either. The macro currency bets also contributed negatively.

The hedge strategy, especially of US equities (recession fear), did not help to performance. The aggressive hedge strategy is in line with the cautious asset allocation. Risk mitigating measures cost money in a risk on environment (developed markets performed 15.4%).

The selection pillar had only a small impact on the portfolio. ETFs usually do not significantly deviate from the benchmark. ESG (as a theme – long) is the only major contributor to tracking error. To make matters worse, ESG has lagged and underperformed the broad market. Therefore, ESG US Leaders ETF was one of the top five detractors. While there was broad market strength over the quarter, index performance was driven by a narrow selection of "Big Tech" stocks, particularly those most exposed to the long-term secular trend of artificial intelligence. As a consequence, the size tilt (mid-cap tilt) did not help either, as giant stocks outperformed small caps by a significant margin.

INTERIM REPORT AND UNAUDITED FINANCIAL STATEMENTS

For the financial period ended 30 June 2023

Notes to the Financial Statements

1. The ICAV

Amundi Fund Solutions ICAV (the "ICAV") is an open-ended umbrella Irish collective asset management vehicle with variable capital and segregated liability between Sub-Funds. The financial statements of the Amundi Fund Solutions ICAV have been prepared in accordance with the ICAV Acts 2015 - 2021 (as amended), and the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 (as amended) and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 (the "Central Bank UCITS Regulations").

2. Basis of presentation

The condensed financial statements of the ICAV are prepared under the going concern basis and on the historical cost basis, except that financial instruments classified as at fair value through profit or loss are held at fair value.

The condensed financial statements have been prepared in accordance with International Accounting Standard (IAS) 34 Interim Financial Reporting and should be read in conjunction with the annual audited financial statements for the year ended 31 December 2022, which have been prepared under International Financial Reporting Standards ("IFRS") as adopted by the European Union ("EU").

As the Sub-Funds' investors are mainly from the Eurozone, subscriptions and redemptions are denominated in Euros ("EUR") for all Sub-Funds with the exception of Global Multi-Asset Growth Fund which is denominated in United States Dollar ("USD") as the majority of its investors are from the United States of America. All financial information presented in EUR or USD are rounded to the nearest EUR or USD.

3. Significant accounting policies

The same accounting policies, presentation and methods of computation are followed in these condensed financial statements as were applied in the preparation of the ICAV's financial statements for the financial year ended 31 December 2022.

Standards and amendments to existing standards

There are no standards, interpretations or amendments to existing standards that are not yet effective that would be expected to have a significant impact on the ICAV.

INTERIM REPORT AND UNAUDITED FINANCIAL STATEMENTS

Schedule of Investments - Select Investment Grade Bond at 30 June 2023

4. Exchange rates used in this report

The financial statements are prepared in Euro for all sub-funds except in US Dollar for Global Multi-Asset Growth fund. The following exchange rates at the financial year end have been used to translate assets and liabilities denominated in other currencies:

INTERIM REPORT AND UNAUDITED FINANCIAL STATEMENTS

Schedule of Investments - Select Investment Grade Bond at 30 June 2023 (continued)

6. Number of Shares in Issue and Net Assets Attributable to Redeemable Participating and Non-Participating Shareholders (continued)

Capital management:

The authorised share capital of the ICAV is 500,000,000,000 participating Shares of no par value. Non-participating Shares do not entitle the holders thereof to any dividend and on a winding up entitle the holders thereof to receive the consideration paid therefor but do not otherwise entitle them to participate in the assets of the ICAV. The Directors have the power to allot shares in the capital of the ICAV on such terms and in such manner as they may think fit.

The ICAV's objectives in managing the redeemable shares are to ensure a stable base and to manage liquidity risk arising from redemptions.

The ICAV's capital is represented by the redeemable shares outstanding. The ICAV is not subject to other externally imposed capital requirements.

The dealing day for each share class for all four Sub-Funds is each Business Day or such other days as the Directors may determine and notify to Shareholders in advance provided that there shall be at least two Dealing Days per month. All Classes of Shares shall be issued at the Net Asset Value per Share calculated at the Valuation Point being 10:00pm (Irish time) on each Dealing Day, or such other time or Business Day as the Directors may determine and notify in advance to Shareholders, provided that there shall always be a Valuation Point for every Dealing Day.

Protect 90 Fund

Shareholders benefit from a daily protection representing 90% of the highest-ever Net Asset Value per Share of a class recorded since the Sub-Fund launch date regardless of their subscription date. A legally enforceable agreement has been put in place between the ICAV and the Protection Provider (the "Protection Agreement") under which the Protection Provider undertakes to pay the outstanding amount in order for the relevant class to reach the Floor NAV (the "Protection Amount").

When the protection feature is triggered, the Directors shall call upon the Protection Provider to pay to the Sub-Fund the Protection Amount and shall terminate the Sub-Fund in accordance with the Instrument of Incorporation. The initial term of the Protection Agreement is five years beginning from the launch of the Sub-Fund.

Thereafter, the Protection Agreement shall be renewed automatically for further one year periods. Both the ICAV and the Protection Provider may provide written notice to the other party of its intention not to renew the Protection Agreement at least three months prior to the end of either, the initial five year term or a subsequent one year term.

Investors should note that the Floor NAV and the Protection Agreement do not provide complete capital protection and only aim to provide a payment equal to a minimum of 90% of the highest Net Asset Value per Share achieved from the launch of the Sub-Fund onwards. It is important to note that, while a redeeming Shareholder will receive an amount equal to the Net Asset Value per Share on redemption, each share may benefit from limited capital protection only, regardless of the Net Asset Value per Share at which such share was purchased by the Shareholder.

7. Tax

Under current law and practice, the ICAV qualifies as an investment undertaking as defined in Section 739B of the Taxes Consolidation Act, 1997, as amended. On that basis it is not chargeable to Irish tax on its income or capital gains.

However, Irish tax may arise on the happening of a "chargeable event" in the ICAV. A chargeable event includes any distribution payments to shareholders or any encashment, redemption, cancellation or transfer of shares, and the holding of shares at the end of each eight-year period beginning with the acquisition of the shares.

INTERIM REPORT AND UNAUDITED FINANCIAL STATEMENTS

Schedule of Investments - Select Investment Grade Bond at 30 June 2023 (continued)

7. Tax (continued)

No Irish Tax will arise on the ICAV in respect of chargeable events in respect of:

- A shareholder who is neither Irish resident nor ordinarily resident in Ireland for tax purposes, at the time of the chargeable event, provided that appropriate valid declarations in accordance with the provisions of the Taxes Consolidation Act, 1997, as amended, are held by the ICAV.
- Certain exempted Irish resident shareholders who have provided the ICAV with the necessary signed statutory declarations.

Dividends and capital gains (if any) received on investments made by the ICAV may be subject to withholding taxes imposed by the country from which the investment income or capital gains are received and such taxes may not be recoverable by the ICAV.

There were three distributions made during the financial period on the Select Investment Grade Bond Fund, for which no tax has been applied or due.

8. Fair Value Hierarchy

IFRS 13- Fair Value Measurement, establishes a three-tier fair value hierarchy that prioritises the inputs to valuation techniques to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurement) and lowest priority to unobservable inputs (Level 3 measurement). Investments measured and reported at fair value are classified and disclosed in one of the following fair value hierarchy levels based on the significance of the inputs used in measuring their fair value:

Level 1- Unadjusted quoted prices in active markets that are accessible at the measurement date for identical, unrestricted assets or liabilities;

Level 2- Quoted prices in markets that are not active or financial instruments for which all significant inputs are observable, either directly or indirectly. Fair value is determined through the use of models or other valuation methodologies;

Level 3- Prices or valuations that require inputs that are both significant to the fair value measurement and are unobservable. Unobservable inputs are developed based on the best information available in the circumstances and reflect the Sub-Funds' own assumptions about how market participants would be expected to value the asset or liability.

An investment is always categorised as Level 1, 2 or 3 in its entirety. In certain cases, the fair value measurement for an investment may use a number of different inputs that fall into different levels of the fair value hierarchy. In such cases, an investment's level within the fair value hierarchy is based on the lowest level of input that is significant to the fair value measurement. The ICAV's financial instruments are measured at fair value and it is usually possible to determine their fair values within a reasonable range of estimates. Fair value estimates are made at a specific point in time, based on market conditions and information about the financial instrument. These estimates are subjective in nature and involve uncertainties that may require significant judgement (e.g., interest rates, volatility, estimated cash flows etc.) Actual results could differ from these estimates.

As at 30 June 2023, there were no securities categorised as Level 3, and therefore no table has been presented.

As there were no Level 3 securities held in the Sub-Funds during the financial period, a table of movements in Level 3 investments is not required to be presented.

There were no transfers between levels during the financial period.

INTERIM REPORT AND UNAUDITED FINANCIAL STATEMENTS

Schedule of Investments - Select Investment Grade Bond at 30 June 2023 (continued)

9. Financial instruments and associated risks

The Investment Manager's use the same risk management techniques and continuous risk monitoring as set out in ICAV's audited financial statements for the period ended 31 December 2022. These condensed financial statements should be read in tandem with the audited financial statements.

10. Soft Commissions

There were no soft commission arrangements in place during the period (31 December 2022: Nil).

11. Related party and connected person transactions

The Central Bank UCITS Regulations require that any transaction carried out with the ICAV by a manager or depositary; and the delegates or sub-delegates of a manager or depositary; and/or associated or group companies of these ("connected persons") are carried out as if conducted at arm's length and are in the best interests of the shareholders.

The Directors have approved a Connected Party Transaction Policy to ensure that this requirement is complied with for transactions with connected persons. The Directors will seek to ensure any conflict of interest of which they are aware is resolved fairly.

The Directors and Investment Manager are related parties to the ICAV under IAS 24: Related Party Disclosures.

Christophe Lemarié is a related party as he is head of Cross Border Platform and Deputy Head of Retail Marketing in the Amundi Group, and he is also a Director on other Amundi Funds. Enrico Turchi is a related party as he is Conducting Officer for Amundi Luxembourg, where he also sits in the Board of Directors and acts as Managing Director, Deputy CEO and is a Director on a number of other Amundi Funds.

Fees payable to the Investment Manager and the amounts due at the period-end are included in the accrued expenses on the Statement of Financial Position. The fees earned by the Manager and Investment Manager are included the Management fees in the Statement of Comprehensive Income. The Directors will seek to ensure any conflict of interest of which they are aware is resolved fairly.

At 30 June 2023, the Directors who served at any stage during the financial period held no shares in the ICAV.

Investments held by the ICAV as at 30 June 2023, in other Funds managed by Amundi Entities is identified in the Schedule of Investments (*).

As at 30 June 2023, Investment in the ICAV by other Amundi Managed funds or entities represented the following percentage of the sub-Funds

Select Investment Grade Bond	30.14%
Sabadell Urquijo Acumulación	0.03%
Sabadell Urquijo Crecimiento	0.05%
Global Multi-Asset Growth	98.24%

Supplementary Information

Remuneration policies

Amundi Ireland Limited remuneration policy is compliant with the requirements detailed in the European Directive 2014/91/EU that came into force on 18 March 2016. The remuneration policy is based on Amundi group remuneration framework, and it is reviewed annually and approved by the Board of Amundi Ireland Limited. The policy is subject to independent review by the internal Compliance function.

The remuneration policy and practices objectives are consistent with and promote sound and effective risk management, aligning remuneration with long-term performance and risks in order to avoid conflicts of interest. Fixed remuneration components are linked to the roles covered, the professional services rendered and the scope of responsibilities, reflecting the level of academic qualification, market pay levels, experience and skills required for each position, as well as the level of excellence demonstrated. Variable remuneration is designed to promote a sustainable long-term development of the Management Company and a solid and effective risk management system. Variable remuneration awards consider the performance of the employee, her/his business unit and Amundi group as a whole, and it is based on both financial and non-financial criteria.

Amundi Ireland Limited and Amundi group have defined all identified staff having authority or influence on the funds Amundi manages, and who consequently are likely to have an impact on the performance or the risk profile of the funds.

Note on UCITS requirement

The Sabadell Urquijo Acumulación and Sabadell Urquijo Crecimiento Sub-Funds, as an investor in an Underlying Fund, will indirectly bear a pro rata portion of any fixed management fees payable to an Underlying Fund's manager, and an indirect pro rata portion of any fixed management fees of any collective investment schemes in which the Underlying Funds may invest. It is currently expected that the weighted average management fees payable to an Underlying Fund manager or the manager of collective investment schemes in which the Underlying Fund invests, may range up to 2% of an Underlying Fund's assets.

In addition, a performance fee may be payable to managers of certain Underlying Funds or of the collective investment schemes in which the Underlying Fund invests, and it is currently expected that these will usually range from 0%-20% of the outperformance over a benchmark or hurdle. Such fees are deducted from the assets of the relevant Underlying Funds or collective investment schemes in which the Underlying Fund invests and thereby reducing the actual performance of such Underlying Funds.

The fees payable to the managers of the Underlying Funds and collective investment schemes in which the Underlying Fund invests and described above are estimates only and may vary from time to time without notice to Shareholders.

Securities Financial Transactions Regulations

The following disclosure follows the requirements of EU Securities Financing Transactions Regulation ("SFTR") which came into effect on 13 January 2017.

A Securities Financing Transaction ("SFT") is defined as per Article 3(11) of the SFTR as:

- A repurchase transaction;
- Securities or commodities lending and securities or commodities borrowing;
- A buy-sell back transaction or sell-buy back transaction; or
- A margin lending transaction.

As at 30 June 2023 there were no SFT type transactions held by the ICAV.
