KEY RISKS

Emerging Market Risk: Risks associated with investing in emerging markets. Due to their political instability, the volatility of the exchange rate of their currencies, and the limited number of investment opportunities, the risk of these markets is greater than in countries considered as developed.

Credit Risk: Risks associated with issuers of debt securities, even those with a very high rating, may not be able to make payments to investors, or the fear associated with this risk may result in a decrease in the value of their debt securities.

Leverage Risk: Risks associated with the use of leverage. The Sub-fund may achieve some leverage by using derivative financial instruments to implement its investment strategy. The use of leverage creates particular risks and may significantly increase the Sub-fund's investment risk.

For full disclosures on all key risks, please refer to the Key Investor Information Document (KID).
