

Fund Investment Objective

The WisdomTree Cybersecurity UCITS ETF (the “Fund”) seeks to track the price and yield performance, before fees and expenses, of the WisdomTree Team8 Cybersecurity Index (the “Index”).

Index Description

The index is designed to track the performance of companies primarily involved in providing cyber security-oriented products. The index excludes companies which do not meet WisdomTree’s ESG (environmental, social and governance) criteria.

To be included in the Index, companies must meet certain risk management criteria, as well as minimum liquidity requirements, WisdomTree’s ESG screen and be issued by a company involved in providing primarily cyber security-oriented products.

The Index utilises a focus score which is developed by WisdomTree Investments Inc., the benchmark administrator (WTI) in collaboration with third party specialists in the cyber security sector (“Focus Score”), which quantifies and measures of a company’s overall involvement across development themes in cyber security. The Index also screens companies based on a trailing three-year compound annual revenue growth rate (“Revenue Growth”). The weight of each security in the Index is calculated based on the Focus Score and Revenue Growth.

Listing Information

Exchange	ISE, Borsa Italiana, LSE, SIX, Xetra
Listing Currency	USD
LSE Code	WCBR
Bloomberg Code	WCBR LN
Reuters Code	WCBR.L
ISIN	IE00BLPK3577

Use of Income	Accumulating
Distribution Frequency	N/A
Since Fund Inception	25/01/2021
Financial Year End	31 December
UCITS Compliant	Yes
ISA Eligible	Yes
SIPP Eligible	Yes
EU Savings Directive	Out of Scope
Registration	GB, DE, IT, IE, CH, NL, FI, SE, FR, LU, ES
Manager	WisdomTree Management Ltd.
Investment Manager	Irish Life Investment Managers
Administrator	State Street Fund Services (Ireland) Limited
Custodian	State Street Custodial Services (Ireland) Limited

Potential Benefits

- Cyber security has growth potential due to structural drivers such as the digital economy leading to increased demands on cyber security solutions.
- The Fund offers access through direct investment in publicly listed companies, which are primarily involved in providing cyber security-oriented products.
- Focused exposure to businesses that are capitalising on the growth in the adoption of cyber security-oriented products.
- The research for the selection of companies in the Index and, subsequently, the Fund, is conducted by experts in the cyber security space, ensuring the portfolio remains focused and relevant.

Potential Risks

- Although the Index was created to select companies with a relatively higher exposure to cyber security-oriented products, there is no guarantee this objective will be achieved.
- An investment in equities may experience high volatility and should be considered as a long term investment.
- Higher growth companies such as those that play a part in megatrends tend to trade at higher valuations. The investor should consider the risk that comes with higher valuations as part of any investment decision.
- Investment risk may be concentrated in specific sectors, countries, companies or currencies.
- This list does not cover all risks. - Further risks are disclosed in the KIID and Prospectus.

Investors should read the prospectus of the Issuer (“Prospectus”) before investing and should refer to the section of the Prospectus entitled ‘Risk Factors’ for further details of risks associated with an investment in this product.

Glossary

**Dividend Weighted Index:** an index that determines the weight of its constituents using the dividends paid by the security rather than another variable (the most common is Market Cap weighted indices). **Fully Replicated:** assets are invested in securities that match the constituents of the relevant index, in the same proportion. **Fundamentally Weighted Index:** an index that weights securities on the basis of factors such as dividends or earnings. **Large Cap, Mid Cap and Small Cap:** refers to market capitalisation and is calculated by multiplying the price of a stock by the number of shares outstanding. **Listing currency:** the trading currency on the exchange. **Physical (Optimised):** assets are predominately invested in securities that are constituents of the index, but may also hold securities whose characteristics closely resemble the characteristics of the index. **Physically Backed:** securities held by the fund are the actual securities not a derivative. **Rebalance:** An index is created by applying a certain set of selection and weighting rules of countries, sectors and stocks at a certain frequency. A Rebalance is when WisdomTree re-applies its rules based selection and weighting process. **Rebalance Frequency:** The frequency by which the constituents of the index are screened and their weights changed. **Replication Method:** the method by which the fund gets exposure to the benchmark index. **Share class currency or the "NAV currency":** The currency that the fund's NAV is issued in. **Total Expense Ratio (TER):** a measure of the total costs associated with managing and operating a fund. The TER consists primarily of management fees plus other expenses such as trustee, custody and operating expenses. It is expressed as a percentage of the fund's total net asset value.

An investment in exchange-traded products ("ETPs") is dependent on the performance of the underlying index, less costs, but it is not expected to match that performance precisely. ETPs involve numerous risks including among others, general market risks relating to the relevant underlying index, credit risks on the provider of index swaps utilised in the ETP, exchange rate risks, interest rate risks, inflationary risks, liquidity risks and legal and regulatory risks.
