KEY INVESTOR INFORMATION

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

UBAM - Global Responsible Convertible Bond, a sub-fund of UBAM

Class: AC EUR (Capitalisation) LU2256753257

UBAM is managed by UBP Asset Management (Europe) S.A.

Objectives and investment policy

The Fund seeks to grow your capital and generate income by investing primarily in worldwide convertible bonds or equivalent with a minimum rating of B- (S&P or FITCH) or B3 (Moody's) or an equivalent internal rating determined by the Investment Manager.

The Fund is actively managed.

The currency risk is limited to 10% of the net assets of the Fund.

The Fund offers exposure to convertible bonds meeting environmental, social and corporate governance (ESG) criteria. The integration of ESG considerations is done at 3 levels:

- ESG exclusion criteria (negative screening);
- ESG inclusion approach (positive screening), based on qualitative ESG assessment of issuers and underlying equities;
- Portfolio construction.

A qualitative sustainability analysis is performed on each selected security and is based on the evaluation of 4 pillars: climate risk, environmental strategy, social capital and corporate governance.

The Fund has two sustainability objectives :

- maintain a higher average ESG score than the Refinitiv Global Hedged Convertible Bond Index (EUR) ("the Benchmark") at all times, as measured by the average Industry-Adjusted Score computed by MSCI ESG Research
- maintain lower carbon footprint than the Benchmark measured by MSCI ESG Research with the weighted average carbon intensity.

The ESG analysis covers at least 90% of the Fund's portfolio.

The Fund uses the Benchmark for performance objective. The Benchmark is representative of the investment universe and of the risk profile of the Fund. Although the Fund's securities will primarily correspond to those of the Benchmark, the Investment Manager has significant discretion to deviate from the Benchmark's constituents in respect to countries, sectors, issuers and instruments, in order to take advantage of specific investment opportunities.

The Benchmark is not aligned with the environmental and/or social characteristics promoted by the Fund.

The Fund may invest its net assets up to:

- 100% in High yield (including non convertible bonds or similar up to 20%)
- 50% in Emerging countries
- 10% in equity (excluding preferred shares).

The equities held by the Fund will only be the result of bond conversions and will be sold within a period of maximum 6 months.

The Fund will not invest in Contingent Convertible bonds (CoCos).

High yield bonds are issued by entities whose activity is more sensitive to the economic cycle and pay higher interest. The return on such securities, in the same way as their level of risk, is therefore higher than traditional bond products.

The equity sensitivity of the Fund shall not exceed 70%.

The Fund may use derivatives such as but not limited to futures, swaps including Credit Default Swaps (CDS), options and foreign-exchange forward contracts in order to hedge the portfolio and under exceptional and temporary circumstances to expose it to equity, interest rate, credit, foreign-exchange and volatility risk.

The use of derivatives on single names could only be done on companies eligible according the ESG strategy above.

The Fund's base currency is EUR.

Any income received by the Fund is reinvested (capitalisation share class).

Investors in the Fund can subscribe and redeem units on any business day in Luxembourg except days where the decisive market is closed: Luxembourg (LU).

Details of the closing days are available here: <https://www.ubp.com/en/our-offices/ubp-asset-management-europe-sa>.

The recommended holding period is minimum 3 years.

Risk and reward profile

With lower risk, With higher risk,
potentially lower rewards potentially higher rewards

This indicator represents the annual historical volatility of the Fund over a 3-year period.

Risk category 5 reflects a high potential gain and/or loss in the value of the portfolio.

Historical data such as that used to calculate the synthetic indicator cannot be considered as a reliable indication of the Fund's future risk profile.

The risk category associated with the Fund is not guaranteed and may change over time.

The lowest risk category does not mean "risk free".

Your initial investment is not guaranteed.

Significant risk(s) for the Fund not taken into account in this indicator include the following:

Counterparty risk: The use of over-the-counter derivatives exposes the Fund to a risk that the counterparty to the transactions will fully or partially fail to honour its contractual obligations. This may result in a financial loss for the Fund.

Credit risk: The Fund invests in bonds, cash or other money market instruments. There is a risk that the issuer may default. The likelihood of this happening will depend on the credit-worthiness of the issuer. The risk of default is usually greatest with bonds that are rated as sub-investment grade.

Emerging countries risk: The Fund invests in overseas countries which carry a higher risk than investing in larger established countries. Investments in Emerging countries are likely to experience greater rises and falls in value and may suffer trading problems. A Fund which invests in Emerging countries rather than more developed countries may encounter difficulties when buying and selling investments. Emerging countries are also more likely to experience political uncertainty and investments held in these countries may not have the same protection as those held in more developed countries.

ESG and Sustainability risk: It may result in a material negative impact on the value of an investment and performance of the Fund. Assessment of sustainability risks is complex and requires subjective judgments, which may be based on data which is difficult to obtain and/or incomplete, estimated, out of date or otherwise materially inaccurate. All or part of said data may come/originate from third parties.

Liquidity risk: Liquidity risk exists when particular investments are difficult to purchase or sell. This can reduce the Fund's returns because the Fund may be unable to trade at advantageous times or prices.

Full details of risks are disclosed in the chapter "Risk Factors" in the prospectus.

Charges

The charges and commissions are used to cover the Fund's operating costs, including marketing and distribution of shares. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge	3.00%
Exit charge	0.00%

This is the maximum that might be taken out of your money before it is invested / before the proceeds of your investment are paid out.

Charges taken from the Fund over a year

Ongoing charges	1.53%
-----------------	-------

Charges taken from the Fund under certain specific conditions

Performance fee	Not applicable
-----------------	----------------

The entry and exit charges shown are maximum rates. In certain cases, the charges paid may be lower. Your financial advisor or distributor can inform you of the associated entry and exit charges.

Ongoing charges are based on the charges for the previous year, ending on 31 December 2022. This percentage may vary from year to year. It excludes outperformance charges and intermediation charges, with the exception of entry and exit charges paid by the Fund when it buys or sells shares of another fund.

For more information about Fund charges, please refer to the relevant sections of the prospectus, which is available at www.ubp.com.
