Quaero Capital Funds (Lux) (the "Fund") Class D EUR (the "Class") - ISIN: LU2173413373
The Fund has appointed FundPartner Solutions (Europe) S.A. as management company.

Objectives and investment policy

The investment objective of the Sub-Fund is to achieve a long-term capital gain. The Sub-Fund is actively managed. The Sub-Fund uses the index Refinitiv Global Focus Investment Grade Convertible Bond Hedged Total Return EUR for performance comparison only. The Sub-Fund does not track the index and can deviate significantly or entirely from the index.

The Sub-Fund, actively managed, will mainly invest in convertible debt securities (including money market instruments) having an investment grade credit rating.

In addition, the Sub-Fund may be invested in equities, cash, money market instruments other than those above-mentioned and undertakings for collective investment (UCIs). However, the Sub-Fund will not invest more than 10% of its net assets in other UCIs and not more than 45% of its net assets in non-investment grade bonds.

The choice of investments will neither be limited by geographic area (including emerging markets), economic sector, nor in terms of currencies in which investment will be denominated. Depending on financial market conditions, a particular focus can be placed in a single country (or some countries) and/or in a single economic sector and/or in a single currency.

For hedging and for investment purposes, the Sub-Fund may use all types of financial derivative instruments traded on a regulated market and/or over-the-counter.

If the investment manager considers this to be in the best interest of the shareholders, on a temporary basis and for defensive purposes, the Sub-Fund may also hold up to 100% of its net assets in cash and cash equivalents,

such as cash deposits, money market UCIs and money market instruments.

- The risk category shown is not guaranteed and may shift over time.
- The lowest category, which corresponds to Number 1, cannot be regarded as being risk-free.

Are there any other particular Risks?

Risks that could affect fund performance and are not necessarily fully reflected in the risk and reward rating include:

- **Liquidity risks:** The Sub-Fund may invest part of its assets in less liquid securities. Those are securities that cannot easily be sold or exchanged for cash without a substantial loss in value in certain market conditions. Those securities also cannot be sold quickly because of a lack of ready and willing investors or speculators to purchase the asset.
- **Counterparty risks:** The Sub-Fund can conclude various transactions with contractual partners. If a contractual partner becomes insolvent, it can no longer or can only partly settle unpaid debts owed to the Sub-Fund.
- **Credit risks:** The Sub-Fund invests a significant portion of its assets in debt securities. The issuers of these debt securities may become insolvent, which will mean that the securities will lose all or some of their value.
- **Risks from the use of derivatives:** The Sub-Fund may use financial

derivatives instruments which may result in the sub-fund being leveraged and may result in material fluctuations in the value of the Sub-Fund. Leverage on certain types of transactions including derivatives may impair the Sub-Fund's liquidity, cause it to liquidate positions at unfavourable times or otherwise cause the sub-fund not to achieve its intended objective.

Leverage occurs when the economic exposure created by the use of derivatives is greater than the amount invested resulting in the sub-fund being exposed to a greater loss than the initial investment.

- **Operational risks:** The Sub-Fund may fall victim to fraud or criminal acts. It may suffer losses as a result of misunderstandings or mistakes by employees of the management company or by external third parties or may be damaged by external events, such as natural disasters.
