M&G (Lux) Global Dividend Fund

a sub-fund of M&G (Lux) Investment Funds 1

EUR Class J – Distribution shares ISIN no. LU2307576665

Managed by M&G Luxembourg S.A.

Objective and investment policy

The fund aims to provide:

- a combination of capital growth and income to deliver a return that is higher than that of the global stockmarket over any five-year period while applying ESG Criteria; and

- an income distribution that increases every year in US dollar terms.

Core investment: At least 80% of the fund is invested in the shares of companies, across any sector and of any size, from anywhere in the world, including emerging markets. The fund is concentrated and usually holds shares in fewer than 50 companies. The fund may invest in China A- Shares via the Shanghai-Hong Kong Stock Connect and the Shenzhen-Hong Kong Stock Connect.

The fund invests in securities that meet the ESG Criteria. Norms, sector and/or values-based exclusions apply to investments.

Other investments: The fund may invest in other funds and cash or assets that can be turned into cash quickly.

Derivatives: To reduce risks and costs.

Strategy in brief:

- Investment approach: The investment manager focuses on companies with the potential to grow their dividends over the long term and selects stocks with different sources of dividend growth to build a fund that has the potential to cope in a variety of market conditions.

- Responsible investment approach: The fund is categorised as Planet+ / ESG Enhanced, as defined in the fund's prospectus.

Benchmark: MSCI ACWI Net Return Index

The benchmark is a comparator against which the fund's performance can be measured. It is a net return index which includes dividends after the deduction of withholding taxes. The index has been chosen as the fund's benchmark as it best reflects the scope of the fund's investment policy. The benchmark is used solely to measure the fund's performance and does not constrain the fund's portfolio construction.

The fund is actively managed. The investment manager has complete freedom in choosing which investments to buy, hold and sell in the fund. The fund's holdings may deviate significantly from the benchmark's constituents.

The benchmark is not an ESG benchmark and is not consistent with the ESG Criteria.

For unhedged and currency hedged share classes, the benchmark is shown in the share class currency.

Risk and reward profile

■ The above risk and reward indicator is based on simulated historical data and may not be a reliable indication of the future risk profile of this share class. This Share Class is categorised in risk class 6 because its simulated Net Asset Value has shown high rises and falls in value historically.

■ The risk number shown is not guaranteed and may change over time.

■ The lowest risk number does not mean risk free.

The main risks that could affect performance are set out below:

■ The value and income from the fund's assets will go down as well as up. This will cause the value of your investment to fall as well as rise. There is no guarantee that the fund will achieve its objective and you may get back less than you originally invested.

■ The fund holds a small number of investments, and therefore a fall in the value of a single investment may have a greater impact than if it held a larger number of investments.

■ The fund can be exposed to different currencies. Movements in currency exchange rates may adversely affect the value of your investment.

■ Investing in emerging markets involves a greater risk of loss due to greater political, tax, economic, foreign exchange, liquidity and regulatory risks, among other factors. There may be difficulties in buying, selling, safekeeping or valuing investments in such countries.

■ In exceptional circumstances where assets cannot be fairly valued, or have to be sold at a large discount to raise cash, we may temporarily suspend the fund in the best interest of all investors.

■ The fund could lose money if a counterparty with which it does business becomes unwilling or unable to repay money owed to the fund.

■ Operational risks arising from errors in transactions, valuation, accounting, and financial reporting, among other things, may also affect the value of your investments.

■ ESG information from third-party data providers may be incomplete, inaccurate or unavailable. There is a risk that the investment manager may incorrectly assess a security or issuer, resulting in the incorrect inclusion or exclusion of a security in the portfolio of the fund.

Further details of the risks that apply to the fund can be found in the fund's Prospectus at www.mandg.co.uk/literature
