## AUGUST 2021 FACTSHEET

Unless otherwise stated, Performance, Portfolio Breakdowns and Net Asset information as at: 31-Aug-2021. All other data as at 08-Sep-2021.

For Investors in the UK. Investors should read the Key Investor Information Document and Prospectus prior to investing.

## FUND OVERVIEW

The Fund aims to maximise the return on your investment through a combination of capital growth and income on the Fund's assets. The Fund invests globally at least 70% of its total assets in fixed income (FI) securities issued or distributed either inside or outside of the People's Republic of China (PRC) and denominated in Renminbi or other non Chinese domestic currencies. These include bonds and money market instruments (i.e. debt securities with short term maturities) which may be issued by governments, government agencies, companies and supranationals (e.g. the Asian Development Bank). The Fund may invest in the full range of FI securities which may include investments with a relatively low credit rating or which are unrated.

Performance is not shown as the Share Class has a performance history of less than 1 year.

**Key Risks:** All financial investments involve an element of risk. Therefore, the value of your investment and the income from it will vary and your initial investment amount cannot be guaranteed. Compared to more established economies, the value of investments in developing Emerging Markets may be subject to greater volatility due to differences in generally accepted accounting principles or from economic or political instability. The fund invests in fixed interest securities issued by companies which, compared to bonds issued or guaranteed by governments, are exposed to greater risk of default in the repayment of the capital provided to the company or interest payments due to the fund.

Holdings subject to change

**Key Risks Continued:** The fund investments may be subject to liquidity constraints, which means that shares may trade less frequently and in small volumes, for instance smaller companies. As a result, changes in the value of investments may be more unpredictable. In certain cases, it may not be possible to sell the security at the last market price quoted or at a value considered to be fairest. The fund invests in fixed interest securities such as corporate or government bonds which pay a fixed or variable rate of interest (also known as the 'coupon') and behave similarly to a loan. These securities are therefore exposed to changes in interest rates which will affect the value of any securities held.
