INVESTMENT STRATEGY

Since 2007, ODDO BHF Polaris Dynamic* has offered a global and broadly diversified, dynamic multi-asset investment solution. It is characterized by an equity allocation between 70% and 100% and a bond portfolio that invests mainly in investment-grade bonds. The portfolio may invest in securities listed or traded on regulated markets, primarily in Europe, the US or Emerging Markets. The investment objective is to generate attractive asset growth with reduced fluctuations in value through value-oriented investments, while taking into account environmental, social issues and corporate governance (ESG) criteria.

Sustainalytics provides company-level analysis used in the calculation of Morningstar's Sustainability Score.

(1) The summary risk indicator (SRI) is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the market or because we are not able to pay you. It ranges from 1 (low risk) to 7 (high risk). This indicator is not constant and will change according to the fund's risk profile. The lowest category does not mean risk-free. Historical data, such as that used to calculate the SRI, may not be a reliable indication of the fund's future risk profile. There is no guarantee that the investment objectives in terms of risk will be achieved.

(2) Information on the EU Sustainable Finance Disclosure Regulation (SFDR) can be found in the SFDR classification(2) section of the document.

ASSET ALLOCATION

MONTHLY MANAGEMENT COMMENT

Prices on the stock markets rose across the board in March. Hopes of greater productivity and growth through AI continued to play a role, although traditional companies recently caught up with technology stocks. Both the US Federal Reserve and the ECB left key interest rates unchanged, but signalled their willingness to cut rates if the trend towards falling inflation rates is confirmed by further data. On the bond markets, the trend towards rising yields on safe government bonds continued. Spreads on corporate bonds narrowed further. We managed the portfolio with a steady hand and left its basic orientation unchanged. The net equity allocation is around 88 per cent. We added a smaller position in BE Semiconductor to the portfolio. The company specialises in systems to produce particularly powerful semiconductor chips, which are therefore required for AI applications. The share has recently come under pressure because the latest production technology developed by BE Semiconductor is not penetrating the market as quickly as expected. However, we are convinced of the long-term growth opportunities and took advantage of the price decline to build up an initial position in the stock.

SUSTAINABLE REPORT – METHODOLOGY

ODDO BHF AM considers that measuring the environmental, social and governance impact of an investment is an essential step in disseminating good practices in ESG integration. To do this, it is imperative to have reliable, simple quantitative criteria (no reprocessing) and to allow comparison between portfolios regardless of their composition (large vs midcaps, geographical and sectoral diversity).

The choice of indicators is therefore crucial for the relevance of impact measurement. The data for the environmental indicators come from our external non-financial analysis provider, MSCI. We systematically indicate the availability of the data at the level of the portfolio and its benchmark.

ESG integration at ODDO BHF Asset Management | 3 systematic steps

Exclusions

- **Norm-based:** exclusion of companies that do not comply with certain international standards.(chemical weapons , anti-personnel mines, violation of the principles of the Global Compact, etc.)
- **Sector-based:** total or partial exclusion of sectors or activities based on ethical considerations (tobacco, gambling, weapon, adult entertainment / pornographie and Coal...)

ESG ratings

- Usage of MSCI data based on a « Best-in-Class » approach: a bottom-up, stock-picking approach that favors top-rated companies in their peer group.

Dialogue and engagement

- Systematic dialogue with low-ESG rated issuer
- Engagement for upgrade

If ODDO BHF Asset Management GmbH receives any rebates on the management fee of target funds or other assets, ODDO BHF Asset Management GmbH undertakes to fully remit such payment to the investor or the fund. If ODDO BHF Asset Management GmbH performs services for an investment product of a third party, ODDO BHF Asset Management GmbH will be compensated by the relevant company. Typical services are investment management or sales activities for funds established by a different investment management company. Normally, such compensation is calculated as a percentage of the management fee (up to 100%) of the respective fund, calculated on the basis of such fund's assets managed or distributed by ODDO BHF Asset Management GmbH. This may result in the risk that the investment advice given may not be consistent with the investor's interest. The amount of the management fee is published in the prospectus of the respective fund. Further details are available upon request.
