#### **INVESTMENT STRATEGY**

Since 2007, ODDO BHF Polaris Balanced\* has offered a global and broadly diversified, balanced multi-asset investment solution. It is characterized by an equity allocation between 35% and 60% and a bond segment that invests mainly in investment grade bonds. The portfolio may invest in securities listed or traded on regulated markets, mainly in Europe, the US or Emerging Markets.

The investment objective is to generate attractive asset growth with reduced fluctuations in value through value-oriented investments, while taking into account environmental, social issues and corporate governance (ESG) criteria.

<sup>(1)</sup> The summary risk indicator (SRI) is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the market or because we are not able to pay you. It rangesfrom 1 (low risk) to 7 (high risk). This indicator is not constant and will change according to the fund's risk profile. The lowest category does not mean risk-free. Historical data, such as that used to calculate the SRI, may not be a reliable indication of the fund's future risk profile. There is no guarantee that the investment objectives in terms of risk will be achieved. ### **ASSET ALLOCATION**

#### MONTHLY MANAGEMENT COMMENT

Prices on the stock markets rose across the board in March. Hopes of greater productivity and growth through AI continued to play a role, although traditional companies recently caught up with technology stocks. Both the US Federal Reserve and the ECB left key interest rates unchanged, but signalled their willingness to cut interest rates if further data confirmed the trend towards falling inflation rates. On the bond markets, the trend towards rising yields on safe government bonds continued. Spreads on corporate bonds narrowed further. The portfolio's equity allocation was just under 53 per cent. After the company's shares came under pressure following a court judgement in the USA, we sold our position in Reckitt Benckiser. We reduced our position in the Swedish industrial group Assa Abloy. In return, we strengthened our positions in the catering company Compass Group, the chemicals trader IMCD, the Swedish industrial holding Lifco, the semiconductor company Broadcom and Diploma. In the bond portfolio, we increased corporate bonds from Siemens and Thermo Fischer with long maturities. The duration of the bond section was therefore slightly above 4.

### SUSTAINABLE REPORT - METHODOLOGY

ODDO BHF AM considers that measuring the environmental, social and governance impact of an investment is an essential step in disseminating good practices in ESG integration. To do this, it is imperative to have reliable, simple quantitative criteria (no reprocessing) and to allow comparison between portfolios regardless of their composition (large vs midcaps, geographical and sectoral diversity).

The choice of indicators is therefore crucial for the relevance of impact measurement. The data for the environmental indicators come from our external non-financial analysis provider, MSCI. We systematically indicate the availability of the data at the level of the portfolio and its benchmark.

The Yield to Maturity (YTM) is the estimation at a certain date of the expected rate of return of a bond portfolio if the securities are held to maturity. It does by no means constitute a promised return. It can, therefore, be affected by interest rate risks, default risks, reinvestment risks and the fact that bonds may not be held until maturity.

The Yield to worst (YTW) is the estimation at a certain date of the worst expected rate of return of a bond portfolio of which some of the securities would not be held until maturity but redeemed at the discretion of the issuer (call). It does by no means constitute a promised return. It can, therefore, be affected by interest rate risks, default risks, reinvestment risks and the fact that bonds may not be held until maturity.

If ODDO BHF Asset Management GmbH receives any rebates on the management fee of target funds or other assets, ODDO BHF Asset Management GmbH undertakes to fully remit such payment to the investor or the fund. If ODDO BHF Asset Management GmbH performs services for an investment product of a third party, ODDO BHF Asset Management GmbH will be compensated by the relevant company. Typical services are investment management or sales activities for funds established by a different investment management company. Normally, such compensation is calculated as a percentage of the management fee (up to 100%) of the respective fund, calculated on the basis of such fund's assets managed or distributed by ODDO BHF Asset Management GmbH. This may result in the risk that the investment advice given may not be consistent with the investor's interest. The amount of the management fee is published in the prospectus of the respective fund. Further details are available upon request. It is further intended solely for persons based in countries in which the respective funds are registered for distribution or in which such registration is not required.
