Multi Manager Access II - Future of Earth, a sub-fund of Multi Manager Access II, class CHF-hedged P-acc (ISIN: LU2307770391)

This sub-fund is managed by UBS Fund Management (Luxembourg) S.A. (the "Management Company"), which is a member of the UBS Group.

Objectives and investment policy

The objective of the actively managed sub-fund is to seek long-term real returns by pursuing a thematic strategy, primarily investing in equities that meet environmental, social and governance (ESG) criteria. No guarantee can be given that this investment objective will be achieved.

The sub-fund focuses on aspects relating to climate change, environmental issues and the global growth in population and increasing urbanisation, and promotes several of the environmental objectives of the UN Sustainable Development Goals.

The sub-fund is a multi-manager portfolio utilizing leading institutional asset managers with proven expertise in the relevant thematic area.

The sub-fund uses the MSCI ACWI Net Total Return index for performance comparison purposes only. The actively managed sub-fund neither intends to track nor is it constrained by the MSCI ACWI Net Total Return index.

The sub-fund is actively managed and as such does not seek to replicate or track any benchmark index. The sub-fund follows a thematic approach with each theme referencing one of the following Reference Benchmark Indices (RBIs) to whose components a minimum of 30% of the equity investments for that theme will be allocated:

- MSCI ACWI IMI Climate Change Healthcare Select Index
- MSCI ACWI IMI Food Revolution Select ESG Index

- MSCI ACWI IMI Efficient Energy Materials ESG Select Index
- MSCI ACWI IMI Water Select Screens Index

The investment policy allows significant flexibility on the extent to which the single stocks may deviate from the RBIs, meaning the portfolio composition of the sub-fund may deviate materially from the RBIs. Therefore, the performance of the sub-fund may materially diverge from the performance of the RBIs particularly during periods of higher market volatility.

The sub-fund will not invest more than 10% of its net assets in units or shares of UCITS or other UCIs.

For liquidity purposes, the sub-fund may also hold money market instruments, cash or cash equivalents.

The sub-fund may enter into securities lending transactions.

The income in respect of an accumulation share class is not distributed but is retained in the sub-fund.

This share class is currency-hedged meaning that, using derivatives, the base currency of the sub-fund is to a large extent hedged into the share class' currency.

Risk and reward profile

More about this rating

- The risk category is based on return volatility over the last five years. The method used for this estimation depends on the type of sub-fund.
- Historical data may not be a reliable indication for the future.
- The risk category shown is not guaranteed and may vary over time.
- The lowest category does not mean 'risk free'.

Why is this sub-fund in Category 6?

This sub-fund invests in stocks across various sectors and may be subject to high fluctuations in value. The risk category is therefore driven by equity market fluctuations.

Further material risks:

- The fund may use derivatives which can reduce investment risks or increase risks (a.o. risk of failure of a counterparty).
- Pronounced fluctuations in price are characteristic of emerging economies. Other characteristics include specific risks such as lower market transparency, regulatory hurdles, illiquidity of markets as well as political and social challenges.
- A portion of the sub-fund could be invested in less liquid instruments whose prices could fluctuate in certain market conditions.
- No capital guarantee exists for this product so investors can lose the whole of their investment.

Charges

The charges you pay are used to pay the costs of running the sub-fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.
