

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Man GLG RI Global Sustainable Growth Alternative Class INF H EUR Shares

(ISIN:IE00BNG2T365) Man GLG RI Global Sustainable Growth Alternative (the 'Fund') is a sub-fund of Man Funds VI plc (the 'Company').

Man Asset Management (Ireland) Limited, part of Man Group plc, is the Manager of the Company.

Objectives and investment policy

- The Fund's investment objective is to provide investors with an absolute return (irrespective of market conditions) by taking both long and short positions in equities issued by companies globally.
- The Fund will seek to invest in companies which are industry market leaders with sustainable business models and companies which demonstrate a competitive advantage in relatively new and underdeveloped markets.
- The Fund may increase its holdings of cash and other liquid assets in times of exceptional market circumstances or where it is of the opinion that there are insufficient investment opportunities.
- The Fund will invest principally in equity or equity linked securities (including cash equities) and financial derivative instruments (ie instruments whose prices are dependent on one or more underlying assets ("FDI")).
- The Fund promotes, among other characteristics, environmental and social characteristics within the meaning of Article 8 of the Sustainable Finance Disclosure Regulation (SFDR). The Investment Manager will apply an exclusion list of controversial stocks or industries which may be related to arms and munitions, nuclear weapons, tobacco and coal-oriented activities.
- The Fund is actively managed, no benchmark is used as a universe for selection or for performance comparison purposes. The Fund will seek to achieve returns irrespective of market conditions. The Fund may use currency related transactions to alter its foreign currency exposures.
- The Investment Manager will typically construct a concentrated long portfolio of 25-45 stocks selected from a universe of over 3,000 stocks typically with a market capitalisation of over USD 1 billion. Additionally, the Investment Manager will construct a short portfolio of 250-500 securities selected from a universe of over 3,000 typically with a market capitalisation of over USD 1 billion. These short positions will be selected in order to neutralise or limit any undesired risk factors that are identified in the long portfolio. Separately, the Investment Manager may also select a limited number of short positions (not expected to be more than 10 securities) for stock specific, fundamental reasons, where the Investment Manager believes they are overvalued or expects them to fall in value.
- The Fund's investments will not be limited by geographical sector and may be invested globally, including in emerging markets. Investment in emerging markets is not expected to exceed 20% of the Net Asset Value of the Fund.
- The Fund will actively use FDI to achieve the investment objective, to gain long or short exposure to currencies and markets and for hedging against anticipated movements in a market or security.
- The Fund may also invest up to one third of its net asset value in a number of other assets including money market instruments and debt securities (including government and corporate bonds) and other fixed income investments.
- The Fund will use FDI to provide investors with a similar return to any share class issued in the working currency of the Fund (USD).
- Investment in the Fund is suitable for investors seeking an absolute return. Investment in the Fund should be viewed as a medium to long term investment and therefore investors would be expected to have a reasonable tolerance for volatility of the Fund's Net Asset Value from time to time.
- Any income earned on investments will be added to the value of investors' shares and investors can buy and sell their shares on each dealing day of the Fund.

Risk and reward profile

- The lowest category does not mean 'risk free'.
- The risk and reward profile is not guaranteed and may change over time.
- Historical data may not be a reliable indication for the future.
- The risk category for this share class is 5 as funds of this nature engage in strategies that typically have a moderate to high volatility. The calculation is based on the historical volatility of the Fund's performance. Where there is insufficient Fund performance the calculation is based on either the historical volatility of a relevant benchmark for the investment strategy or the manager's Value at Risk limit for the Fund. Please refer to the prospectus for further information relating to the Value at Risk.

The following risks may not be fully captured by the risk and reward profile:

- The Fund may make investments or hold trading positions in markets that are volatile and which may become illiquid. Timely and cost efficient sale of trading positions can be impaired by decreased trading volume and/or increased price volatility.
- The Fund will be exposed to credit risk on counterparties with which it trades

in relation to on-exchange traded instruments such as futures and options and where applicable, 'over-the-counter' ("OTC", "non-exchange") transactions. OTC instruments may also be less liquid and are not afforded the same protections that may apply to participants trading instruments on an organised exchange.

- The Fund is subject to normal market fluctuations and the risks associated with investing in international securities markets and therefore the value of your investment and the income from it may rise as well as fall and you may not get back the amount originally invested.
- The Fund will invest in FDI to achieve its investment objective. The use of FDI involves additional risks such as high sensitivity to price movements of the asset on which it is based. The extensive use of FDI may significantly multiply the gains or losses.
- The Fund's use of FDI may result in increased leverage which may lead to significant losses.
- Whilst the Fund aims to provide capital growth over 3 years a positive return is not guaranteed over any time period and capital is in fact at risk.
- The value of investments designated in another currency may rise and fall due to exchange rate fluctuations. Adverse movements in currency exchange rates may result in a decrease in return and a loss of capital. It may not be possible or practicable to successfully hedge against the currency risk exposure in all circumstances.
- There is no guarantee that the Fund will achieve its investment objective.

A complete description of risks is set out in the prospectus section entitled 'Certain Investment Risks'.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge	None
Exit charge	None

This is the maximum that might be taken out of your money before it is invested / before the proceeds of your investment are paid out.

Charges taken from the fund over a year

Ongoing charges	0.78%
------------------------	-------

Charges taken from the fund under certain specific conditions

Performance fee	20.00% of the aggregate appreciation in value above Reference NAV. Actual last year fee charged: 1.31%
------------------------	--

The entry and exit charges shown are maximum figures and in some cases you might pay less. Please refer to your financial advisor or the distributor for the actual charges.

As this share class has not had a full year of performance, the ongoing charges figure is an estimated figure.

This figure may vary from year to year. It excludes performance fees (where applicable) and portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling units in another sub-fund.

For detailed information on charges and fees please see the 'Fees and Expenses' section of the prospectus.

Past performance

- The Fund was authorised in 2021. This share class was launched on 13 May 2021.

Practical information

- Man Asset Management (Ireland) Limited may be held liable solely on the basis of any statement contained in this document that is misleading, inaccurate or inconsistent with the relevant parts of the prospectus for the Fund.
- This key investor information document describes one share class of one sub-fund of the Company. The assets and liabilities of each sub-fund are held with BNY Mellon Trust Company (Ireland) Limited and are legally segregated from the assets of other sub-funds of the Company.
- Additional information related to the Fund is located in the prospectus which is produced in an official language of the jurisdictions in which the Fund is registered for public sale. The prospectus is available together with the most recent financial statements, information on other share classes and the latest prices of shares free of charge at www.man.com.
- The Fund is subject to taxation legislation in Ireland, which may have an impact on your personal tax position as an investor in the Fund.
- You may switch shares in the Fund for shares in any other sub-fund of the Company. Further information and provisions are in the prospectus.
- Details of Man Asset Management (Ireland) Limited's Remuneration Policy are available at www.man.com/gpam-remuneration-policy, including: (a) a description of how remuneration and benefits are calculated; and (b) the identity of persons responsible for awarding remuneration and benefits. A paper copy of these details may be obtained, free of charge, at Man Asset Management (Ireland) Limited at 70 Sir John Rogerson's Quay, Dublin 2, Ireland.
