Global Enhanced Bond 36M, a subfund of the SICAV BNP Paribas Funds, short named as BNP Paribas

Class "Privilege Capitalisation" - ISIN code LU2155809119

This Fund is managed by BNP PARIBAS ASSET MANAGEMENT Luxembourg, part of the BNP Paribas Group.

Objectives and investment policy

The Product is actively managed. The benchmark Daily Capitalized €str is used for performance comparison only. The Product is not benchmark constrained and its performance may deviate significantly from that of the benchmark.

The Product seeks to achieve returns that are higher than the Euro money market over a medium-term investment horizon of around 36 months by using an enhanced bond strategy aims to generate positive returns by utilizing a global, diverse opportunity set of fixed income and money market instruments (and derivatives related to these instruments), while maintaining a very liquid portfolio with low interest rate sensitivity. Most importantly, the Product is guided by the philosophy that no single investment sector, strategy, allocation or theme should dominate over time. It is based on active management based on a systematic and disciplined approach to securities selection, combining extra-financial research, financial research and quantitative analysis. Exposure to currencies other than the EUR will be less than 25%. The Product may be exposed to

1) Investment Grade bonds, in a range between 40% and 100% of its assets, and

2) Non-Investment Grade bonds (including High Yield Corporate bonds and structured debt) in a range between 0% and 60% of its assets.

It may not be invested in equities.

Environmental, social and governance (ESG) criteria contribute to, but are not a determining factor in, the manager's decision making.

Incomes are systematically reinvested.

Investors are able to redeem on a daily basis (on Luxembourg bank business days) as described in the prospectus.

Risk and reward profile

1	2	3	4	5	6	7

- Historical data may not be reliable indication for the future.
- The risk category of a Fund is an indicator but not a target or a guarantee and may shift over time.
- The lowest category does not mean a risk-free investment.
- Why is the Fund in this specific category?
The risk category is justified by the investment mainly in Interest Rate instruments. The investor's attention is drawn to the fact that an increase in interest rates results in a decrease in the value of investments in bonds and debt instruments and more generally fixed income instruments.
- The higher the risk, the longer the recommended investment horizon.

Other risks materially relevant to the Fund which are not adequately captured by the indicator are described below:

- **Credit Risk:** This risk relates to the ability of an issuer to honour its commitments: downgrades of an issue or issuer rating may lead to a drop in the value of associated bonds.
- **Counterparty Risk:** This risk is associated with the ability of a counterparty in an Over The Counter financial transaction to fulfil its commitments like payment, delivery and reimbursement.
- **Operational and Custody Risk:** Some markets are less regulated than most of the international markets; hence, the services related to custody and liquidation for the subfund on such markets could be more risky.
- **Derivatives Risk:** When investing in over the counter or listed derivatives, the Fund aims to hedge and/or to leverage the yield of its position. The attention of the investor is drawn to the fact that leverage increases the volatility of the subfund.
