#### Summary of Investment Objective

The Fund's investment objective is to seek to generate attractive risk-adjusted returns over time with limited correlation to other asset classes through investment in a portfolio of natural catastrophe bonds. The Investment Manager seeks to achieve the Fund's investment objective through a systematic, proprietary rules-based process. Return is sought from a managed composition of the portfolio based on a set of rules that narrows the universe of catastrophe bonds through a screening and scoring process.

**Annual VaR 96% (1 in 25 years):** The 96% VaR is defined as the 1 in 25 year Aggregate Exceedance Probability (AEP). It represents the probability of aggregate losses in a simulation period exceeding a loss threshold. The AEP curve is a collection of loss thresholds, each one of them with its corresponding Aggregate Exceedance Probability.

**Annual VaR 99% (1 in 100 years):** The 99% VaR is defined as the 1 in 100 year Aggregate Exceedance Probability (AEP). It represents the probability of aggregate losses in a simulation period exceeding a loss threshold. The AEP curve is a collection of loss thresholds, each one of them with its corresponding Aggregate Exceedance Probability.

**Composition of Fund:**

**Expected Loss Contribution by Peril:** Expected loss is a sum-product of the portfolio weights and individual expected losses. There can be no assurance that any investment strategy will achieve its objectives.

**Historical Event Analysis:** The information presented herein is intended to show the possible impact of certain material historical market events on the performance of the current portfolio, excluding portfolio income. There is no way to verify what the actual effect of such an event on the current portfolio would be, and the impact may have been different than the possible impact presented herein. The historical stress tests are done in the risk system by creating scenario risk profiles which best represent the characteristics of the stress event using events from the RMS stochastic event set. This analysis is for information purposes only, and should not be relied upon in making an investment decision. **Hypothetical performance is not an indicator or a guarantee of future performance.**
