

Fisher Investments Institutional Global Small Cap Equity ESG Fund, USD <sup>1</sup>

**Investment Objective:** The investment objective of the Fisher Investments Institutional Global Small Cap Equity Fund (the "Fund") is to outperform the Benchmark. There is no guarantee that the investment objective will be achieved.

**Benchmark:** MSCI World Small Cap Index. The Benchmark is a free float-adjusted market capitalisation weighted index that is designed to measure small cap equity market performance across developed markets.

**Investment Policy:** The Fund invests primarily in equities and equity-related securities of, or linked to, small market capitalisation issuers included in country indices represented within the Benchmark, but may invest up to 30% of its total assets in equities and equity-related securities of, or linked to, small market capitalisation issuers located in countries not represented within the Benchmark and may invest up to 10% of its total assets in unlisted equities. The Investment Manager considers environmental, social and governance factors throughout the investment and portfolio construction process. The Fund is actively managed by the Investment Manager, meaning that investment decisions are made on a fully discretionary basis. Accordingly, the portfolio holdings may significantly deviate from the Benchmark. Prior to investing in the Fund, you should take into account all characteristics and objectives of the Fund as described in the Fund's prospectus and supplement.

Before investing in the Fund, the Fund's investment objectives, risk, charges and expenses should be carefully considered, including:

**Currency Risk:** The base currency of the Fund is USD. The non-USD share classes may be affected unfavourably by fluctuations in currency rates.

**Liquidity Risk:** Some of the Fund's investments may be difficult to buy or sell. This might affect the price at which the investments can be sold, which would affect the Fund's value.

**Counterparty Risk:** There is a risk that counterparties to some of the Fund's investments may not perform their obligations and that transactions may not settle.

**Market Capitalisation Risk:** The Fund will generally invest in small market capitalisation companies for which effective sales of securities may be more difficult and there may be greater price volatility.

**ESG Risk:** The Fund may be subject to regulatory uncertainty and additional costs in implementing ESG regulations and is reliant on ESG data which may not always be accurate or complete. The Fund might underperform relative to comparable funds that do not incorporate ESG factors or pursue a sustainable investment objective.

As further described in the Fund's UCITS KIID or PRIIPs KID (as appropriate), this Fund has the following risk classification scores (scores may be different due to slightly different risk calculation methodologies for UCITS KIIDs and PRIIPs KIDs) due to its exposure to equity markets, which means the Fund may experience significant volatility:
