

#### Key Investor Information for Investors in the United Kingdom

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

## Xtrackers MSCI Europe Consumer Discretionary ESG Screened UCITS ETF

**Share class: 1C, ISIN: IE00BNKF6C99, Security code: DBX0AB, Currency: EUR**

a sub-fund of Xtrackers (IE) plc. The management company is DWS Investment S.A., a member of the DWS Group.

### Objectives and investment policy

The fund is passively managed. The aim is for your investment to track the performance, before fees and expenses, of the MSCI Europe Consumer Discretionary ESG Screened 20-35 Select Index (index). The index is based on the MSCI Europe Consumer Discretionary Index (Parent Index), which is designed to reflect the performance of certain shares in large and medium capitalisation companies across 15 developed markets in Europe which are classified in the consumer discretionary sector as per the Global Industry Classification Standard®. In order to be eligible for inclusion in the index, companies must be eligible for inclusion in the Parent Index and must meet certain ESG screening criteria. Securities which breach the following ESG standards, amongst others, are excluded: (i) are unrated by MSCI ESG Research, (ii) have any involvement in controversial weapons, (iii) breach certain revenue thresholds in controversial activities, including, but not limited to, civilian, conventional and nuclear weapons, tobacco, thermal coal, unconventional and/or arctic oil and gas extraction and palm oil, (iv) are assigned an MSCI ESG Rating of CCC and (v) are not in compliance with the United Nations Global Compact principles, have an MSCI Controversies Score of 0 or have an insufficient MSCI ESG Controversies Score related to certain biodiversity and/or environmental controversies. The index also includes a carbon emission reduction rule, whereby if having applied the above exclusions, the Greenhouse Gas ("GHG") intensity of the index has been insufficiently reduced compared to the Parent Index, constituents are excluded by descending order of GHG intensity until a relevant reduction threshold is achieved. The

weight of the largest group entity in the index is capped at 31.5% and the weights of all other entities are capped at 18% at each quarterly index rebalancing. Where the largest group entity has exceeded 35% or any other entity has exceeded 20% in the lead up to each month-end, such entities will be rebalanced to 31.5% and 18% respectively. The index is calculated on a total return net basis which means that all dividends and distributions by the companies are reinvested in the shares after tax. The index is reviewed and rebalanced on at least a quarterly basis. The index is calculated in Euros on a daily basis. To achieve the aim, the fund will attempt to replicate the index, before fees and expenses, by buying all or a substantial number of the securities in the index. The fund may employ techniques and instruments in order to manage risk, reduce costs and improve results. These techniques and instruments may include the use of financial contracts (derivatives). Certain information (including the latest share prices of the fund, indicative net asset values, full disclosure on the composition of the fund's portfolio and information on the index constituents) are available on your local DWS website or at [www.Xtrackers.com](http://www.Xtrackers.com). Transaction costs and taxes, unexpected fund costs and market conditions such as volatility or liquidity issues may affect the ability of the fund to track the index. The anticipated level of tracking error in normal market conditions is 1 per cent. The currency of the fund is EUR. Returns and gains are not distributed but are reinvested in the fund. You may request the redemption of shares generally on a daily basis.

### Risk and reward profile

The calculation of the risk and reward profile is based on simulated data that cannot be used as a reliable indicator for the future risk profile. This risk indicator is subject to changes; the classification of the fund may change over time and cannot be guaranteed. Even a fund that is classified in the lowest category (category 1) does not represent a completely risk-free investment. The fund is classified in category 6 because its share price may fluctuate strongly and the likelihood of both losses and gains may therefore be high. The following risks could be of particular significance for the fund: The fund will attempt to replicate the performance of the index less costs, but your investment is not expected to match the performance of the index precisely. Exceptional circumstances may arise, such as, but not limited to, disruptive market conditions, additional costs/taxes or extremely volatile markets, which may cause the fund's performance to be substantially different from the performance of the index. DWS entities and related companies may act in several roles in relation to the fund such as distributor and management company which may involve conflicts of interest. The fund is not guaranteed and your investment is at risk. The

value of your investment may go down as well as up. The value of an investment in shares will depend on a number of factors including, but not limited to, market and economic conditions, sector, geographical region and political events. The environmental, social and governance screening criteria are embedded within the index selection process, which seeks to exclude securities issued by companies involved in certain activities. The investment manager and sub-portfolio manager are not responsible for monitoring the screening process or confirming that all securities which pass the screening process are issued by companies with adequate environmental, social or governance standards. The index is rules-based and is not capable of being adjusted to take into account changing market circumstances. As a result you may be negatively affected by, or may not benefit from, the lack of such adjustments in changing market circumstances. The fund has a focus on a single or narrow range of industry, sector or types of companies and performance may not reflect a rise in broader markets. The fund may use derivatives for investment purposes and to try to manage its investments more efficiently. They may not always be successful and may result in greater fluctuations in the value of the fund. This may negatively affect the value of the fund and your investments.

A more detailed description of risks and other general information can be found in the risk section(s) of the prospectus.

### Charges

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

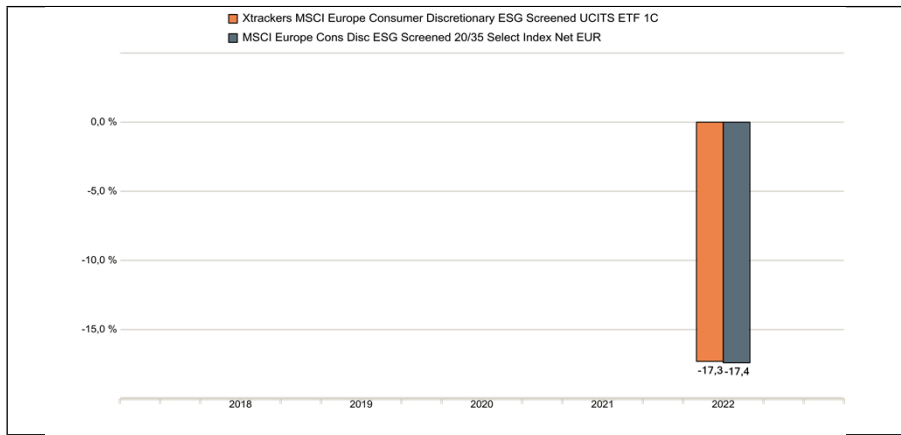

One-off charges taken before or after you invest	
<b>Entry charge</b>	None
<b>Exit charge</b>	None
This is the maximum that might be taken out of your money before it is invested (entry charge) and before the proceeds of your investment are paid out (exit charge).	
Charges taken from the fund over a year	
<b>Ongoing charges</b>	0.17 %
Charges taken from the fund under certain specific conditions	
<b>Performance fee</b>	None

Secondary market investors (those who buy or sell shares on a stock exchange) may be charged certain fees by their stock broker. These charges, if any, can be obtained from such stock broker. Authorised participants dealing directly with the fund will pay the transaction costs related to their subscriptions and redemptions.

The ongoing charges shown here are a cost estimate. It excludes portfolio transaction costs and performance fees, if any.

Additional information on costs can be found in the cost section(s) of the prospectus.

## Past performance

Past performance is not a reliable indicator of future performance. All costs and fees that were withdrawn from the 1C share class of Xtrackers MSCI Europe Consumer Discretionary ESG Screened UCITS ETF were deducted during the calculation. The 1C share class of Xtrackers MSCI Europe Consumer Discretionary ESG Screened UCITS ETF was launched in 2021.
