

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Mirabaud - Global Climate Bond Fund

(the "Sub-Fund") is a sub-fund of Mirabaud SICAV ("the Fund")

Class IH cap. USD (the "Class") – ISIN: LU2351104828

The Fund is managed by Mirabaud Asset Management (Europe) SA (the "Management Company").

The Fund is authorised in Luxembourg and regulated by the Commission de Surveillance du Secteur Financier (CSSF).

Objectives and Investment Policy

- The objective of the fund is to deliver an attractive above index yield and capital appreciation by providing a globally diversified bond fund using a multi sector approach. The focus will be on issuers engaged in energy transition and climate change mitigation. The fund will invest across fixed income securities and sectors and is designed to provide investors with diversified exposure to global credit and explicitly targeting companies with strong commitments to emission reductions and positive environmental impacts.
- The Sub-Fund has an explicit sustainable/environmental objective with an aim to reduce carbon emissions in line with the Paris Agreement. Other extra financial considerations (Environmental, Social and Governance ("ESG")) are also fully integrated in the investment process of the Sub-Fund. Therefore, the Sub-Fund will focus on green bonds and on companies with clear emissions reduction targets. An Extra-financial analysis process is also used to assign an ESG score based on an internal analysis and/or on the data provided by an extra-financial rating agency in order to define the eligible investment universe.
- The Sub-Fund offers daily liquidity, whereby you can subscribe to the Sub-Fund or redeem your assets on any business day in Luxembourg with the exception of any Business Day which follows a Business Day during which the New York Stock Exchange is closed.
- The Sub-Fund is actively managed. The Benchmark of the Class is the Bloomberg Global-Aggregate Total Return Index Hedged USD and is shown for comparison purposes only, without implying any particular constraints to the Sub-Fund's Investments.
- The Class is not entitled to any dividend distribution. This Class is a hedged share class, which means that the currency risk between the Sub-Fund currency and the Class currency is reduced, but not completely eliminated.

Risk and Reward Profile

- This synthetic risk and reward indicator is a risk indicator based on historical volatility and may not be a reliable indication of the future risk profile of the Class.
- The Risk and Reward Category shown is not a target or a guarantee and may shift over time.
- The lowest category does not mean a risk-free investment.
- The Risk and Reward Category shown indicates that the Sub-Fund invests mainly in securities which may experience sharp rises and falls in value, resulting from the evolution of the issuers' financial situation, but also from political and economic developments in the countries where the issuers are located or have significant activities.
- Risks to which the Sub-Fund may be exposed and which may not be reflected in the indicator:
 - Debt instruments and deposits credit risk: The Sub-fund may invest in debt instruments and deposits. They are subject to the risk that their issuer may not be able to meet its obligations.
 - Derivatives counterparty risk: If a derivatives counterparty defaults and is unable to meet its contractual obligations, its value may become nil.
 - Liquidity risk: Risk that a position cannot be liquidated in a timely manner at a reasonable price, especially in the particular case where financial market trading volumes are very low.
 - Third parties risk: The failure of the third parties on which the Sub-Fund's operations depend may cause disruptions and losses.
 - Contingent convertible bonds risk: The Sub-Fund may invest in contingent convertible bonds. Their value may become nil if the financial position of their issuer deteriorates below a pre-specified trigger or if the regulator considers that their issuer has reached a point of no viability. Their coupon may also be cancelled at any point in time. As these instruments are recent, they may also experience significant losses in stressed market conditions.

For more details about other risks associated with the investments of this Sub-Fund, please refer to the Risk Factors section of the Fund's prospectus.

Charges

Entry and exit charges

The entry and exit charges shown are maximum figures that might be taken out of your money before it is invested or before the proceeds of your investment are paid out. In some cases you might pay less. The entry and exit charges actually levied on your investment can be obtained from your financial advisor or distributor.

Ongoing charges

The charges levied on your assets are used to pay the costs of running the Sub-Fund, including the marketing and distribution costs. These charges reduce the potential growth of your investment.

The ongoing charges figure is estimated and may vary from year to year.

It excludes portfolio transaction costs.

For more information about charges, please refer to the "Charges and Expenses" section of the Fund's prospectus.
