

MFS MERIDIAN® FUNDS – EMERGING MARKETS EQUITY RESEARCH FUND (Class I1GBP)

a sub-fund of MFS Meridian Funds

This fund is managed by MFS Investment Management Company (Lux) S.à r.l.

ISIN: LU2271366267

KEY INVESTOR INFORMATION

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

OBJECTIVE AND INVESTMENT POLICY

Objective

The fund's objective is capital appreciation, measured in U.S. dollars.

Investment Policy

The fund invests primarily (at least 70%) in emerging markets equity securities. The fund may also invest in developed markets equity securities. The Investment Manager generally manages the fund to maintain allocations across sectors that are similar to the fund's index, the MSCI Emerging Markets Index (net div) (USD), and seeks to add value through stock selection based on fundamental investment analysis ("research"). The benchmark does not otherwise limit investment selection. The Investment Manager may consider environmental, social and governance (ESG) factors in its fundamental investment analysis alongside other factors. The fund falls within Article 6 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial sector ("SFDR") and does not promote an environmental or social characteristic, or have sustainable investment as its objective. The fund may use derivatives for hedging and/or investment purposes but will not primarily use derivatives to achieve the fund's investment objective.

In addition to guiding sector allocation, the fund's benchmark, MSCI Emerging Markets Index (net div) (USD), is also indicated for performance comparison. Although the fund's investments will generally be represented in the benchmark, components are likely to be weighted differently from the

benchmark. The fund is actively managed within its objectives and the investment strategy will not restrict the extent to which portfolio holdings may deviate from the benchmark. It is expected that the fund's deviation from the benchmark will be significant.

Distributions

Income will not be distributed to shareholders but reflected in the assets of the fund.

Redeeming Shares

You may sell your shares on each business day when banks in Luxembourg are open for normal business and the New York Stock Exchange is open for trading.

Terms to Understand

Equity securities represent an ownership interest, or the right to acquire an ownership interest, in a company or other issuer.

Sectors represent an industry or market within the economy in which businesses share the same or common characteristics such as technology, health care, energy, utilities and telecommunications. Each sector has unique characteristics and a different risk profile.

Derivatives are financial contracts whose value is based on the value of one or more underlying indicators or the difference between underlying indicators.

RISK AND REWARD PROFILE

This rating system is based on how much the returns of the class have varied over the past 5 years. Where 5 years' performance history is not available the data consists of historical returns representative of the fund, benchmark returns or returns for another class with the same currency as appropriate. Past returns may not be a reliable indicator of the future risk and reward profile of the class, and the rating may change over time based on the more recent returns. A fund in the lowest category does not mean a risk-free investment.

Lower risk

Typically lower rewards

Higher risk

Typically higher rewards

The fund is in category 6 because there has been high fluctuations in the fund's return historically.

Equity Risk: Prices of equity securities can vary significantly in response to issuer, market, economic, industry, political, geopolitical, public health, and regulatory conditions. This risk may be higher where the fund invests in a specific country or region or invests in a smaller number of companies.

Emerging Markets Risk: Emerging markets can have less developed markets and legal, regulatory, and accounting systems, and greater political, social, and economic instability making them more volatile and less liquid than more developed markets.

Currency Risk: Changes in currency rates can significantly affect the value of your investment, and may also affect the financial condition of the issuers in which the fund invests.

Derivatives Risk: Derivatives can be highly volatile and can involve leverage. Gains or losses from derivatives can be substantially greater than the derivatives' original cost.

Other Risks

The rating does not reflect the risk that these factors, as well as other factors such as liquidity, counterparty, and operational risks change over time and can affect the fund's returns differently in the future.

The fund may not achieve its objective and/or you could lose money on your investment in the fund. For more information about the fund's risks, please see "Fund Profiles" and "Risk Factors" in the prospectus.
