Fidelity Funds - Strategic European Fund

a sub-fund of Fidelity Funds

Fidelity Fund - Strategic European Fund Y-ACC-Euro
(ISIN:LU2342928202)

This fund is managed by FIL Investment Management (Luxembourg) S.A.

Objectives and Investment Policy

Objective: The fund aims to achieve capital growth over the long term.
Investment Policy: The fund invests at least 70% of its assets, in European equities, and euro denominated cash and instruments that may be readily converted to cash. The fund invests primarily in Europe and may invest across different countries in this region, which may include emerging markets.
The fund may invest in the following assets according to the percentages indicated:
European equities: up to 100%
Cash and related instruments: up to 50%.
The fund's portfolio may be concentrated in exposure to a limited number of companies accounting for more than 50% the fund's net assets.
Investment Process: In actively managing the fund, the Investment Manager considers valuation metrics, company financials, return on capital, cash flows and other measures, as well as company management, industry, economic conditions, and other factors. Allocation by the Investment Manager is made across three core investment strategies. These core investment strategies comprise a long equity strategy, a market neutral equity strategy and a cash allocation strategy.
The long equity strategy is comprised of long equity positions in European companies that the Investment Manager considers to be good quality businesses at attractive valuations.
The market neutral strategy is comprised of long and short equity or equity index futures positions in European companies. The Investment Manager will gain long exposure to those companies considered to be attractive while maintaining short exposure, through the use of derivatives, to those companies considered to be unattractive.
The cash allocation strategy is comprised of Euro denominated cash and instruments that may be readily converted to cash (including cash deposits, treasury bills and government bonds, short-term corporate bonds, commercial paper, short term money market instruments and certificates of deposit). The Investment Manager will allocate assets between the three strategies guided by the number of opportunities and position sizing within the long equity strategy. When this strategy provides insufficient securities, assets will be allocated to the market neutral equity strategy and/or the cash allocation strategy based on the attractiveness of risk adjusted returns and market conditions, with a preference for the market neutral equity strategy in typical market conditions.
The Investment Manager takes into account Sustainability Risks in its investment process. For more information, see "Sustainable Investing and ESG Integration".
Derivatives and Techniques: The fund may use derivatives for hedging, efficient portfolio management and investment purposes (including derivatives which focus on currency, equities or bonds). The fund may use long or short positions.
Benchmark: MSCI Europe Index. Used for: risk measurement only.
Risk Management Method: Relative VaR limited to 150% of the VaR the benchmark portfolio. Expected leverage: 250% (may be higher or lower but not expected to exceed 350%).
Base Currency: EUR.
Distribution: As this is a non-distributing share class, dividends are re-invested.

Risk and Reward Profile

Historical data may not be a reliable indication for the future.
The risk category shown is not guaranteed and may change over time.
The lowest category does not mean a "risk free" investment.
The risk and reward profile is classified by the level of historical fluctuation of the Net Asset Values of the share class, and within this classification, categories 1-2 indicate a low level of historical fluctuations, 3-5 a medium level and 6-7 a high level.
The value of your investment may fall as well as rise and you may get back less than you originally invested.
The fund may invest in instruments denominated in currencies other than the fund base currency. Changes in currency exchange rates can therefore affect the value of your investment.
This Fund is categorised in risk class 6 because, in accordance with the investment policy, the value of the investments may fluctuate considerably. Consequently, both the expected return and the potential risk of loss may be high.
Additional risks: emerging markets, leverage.
