

KEY INVESTOR INFORMATION

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Fisher Investments Institutional US Equity ESG Fund (the "Fund") a sub-fund of Fisher Investments Institutional Funds plc B Class Shares (IE00BYVJ8P49)

The Fund is managed by Carne Global Fund Managers (Ireland) Limited (the "Manager"), with Fisher Investments acting as the Fund's investment manager (the "Investment Manager")

OBJECTIVE AND INVESTMENT POLICY

Investment Objective

The investment objective of this actively managed Fund is to outperform the S&P 500 Index (the "Benchmark"). There is no guarantee the investment objective will be achieved. The Fund is actively managed by the Investment Manager, meaning that investment decisions are made on a fully discretionary basis. Accordingly, the portfolio holdings may deviate from the Benchmark. This deviation may be limited.

Investment Policy

The Fund invests:

- Primarily in equities and equity-related securities of issuers that are in the United States.
- Up to 10% of its total assets in unlisted equities.

The Fund may, in circumstances of extreme volatility or if market factors require and if considered appropriate to the investment objective, invest on a short term basis in cash, cash equivalents and money market instruments, or government or corporate bonds. Investments in other funds will not be more than 10% of the Fund's total assets.

The Investment Manager considers Environmental, Social and Governance ("ESG") factors throughout the investment and portfolio construction process. ESG factors are among the many drivers considered by the Investment Manager when developing country, sector and thematic preferences. Governmental influence on public companies, environmental regulation, social policy, market reforms impacting private property, labour, and human rights are among ESG factors considered when determining country and sector/industry allocations and shaping an initial prospect list of portfolio positions.

The Investment Manager performs fundamental research on prospective investments to identify securities with strategic attributes consistent with the Investment Manager's top-down views and with competitive advantages relative to their defined peer group. The fundamental research process involves reviewing and evaluating a

range of ESG factors prior to purchasing a security, seeking to identify securities benefitting from ESG trends and avoid those with underappreciated risks. These factors include, but are not limited to, shareholder concentration, corporate stewardship, environmental opportunities and liabilities, and human or labour rights controversies.

Also, the Investment Manager seeks to narrow the security selection universe by applying comprehensive and robust ESG screens without compromising the Investment Manager's broader market outlook and themes. The ESG screens are intended to prevent the Fund from investing in companies with significant exposure to categories such as, but not limited to, tobacco, gambling and alcohol. In addition, the ESG screens exclude companies with any ties to cluster munitions or landmines, or that derive any revenue from nuclear or bio-chemical weapons. The ESG screens also are intended to prevent the Fund from investing in companies that fail compliance with the U.N. Global Compact principles, companies with ties to child labour, and companies that violate the International Labour Organization's fundamental principles.

The Fund may use investment techniques (known as derivatives), but only to reduce or protect against risk, reduce costs, and generate income or capital with appropriate risk. Furthermore, the Fund may use these techniques if controlled by the Fund's risk management process.

Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within 3 to 5 years.

For full investment objectives and policy details, please refer to the Prospectus and Supplement.

Income

Income from the Fund's investments will not be paid out in dividends.

You may sell your shares on any bank business day in Dublin, Ireland.

RISK AND REWARD PROFILE

The risk category shows how much the Fund has risen and fallen in the past 5 years, and therefore how much the Fund's returns have varied. It is calculated using historical data and may not be a reliable indicator of the Fund's future risk profile. To the extent this share class has no or limited historical data, Benchmark performance data is used to supplement such historical data. The risk category is not guaranteed to remain unchanged and may shift over time. The lowest category does not mean risk-free.

The Fund is ranked 6 due to its exposure to equity markets, which means the Fund may experience significant volatility.

Currency Risk: The base currency of the Fund is US Dollars. The non-US Dollar share classes of the Fund may be affected unfavourably by fluctuations in currency rates.

Liquidity Risk: Some of the Fund's investments may be difficult to buy or sell. This might affect the price at which the investments can be sold, which would affect the Fund's value.

Counterparty Risk: There is a risk that counterparties to some of the Fund's investments may not perform their obligations and that transactions may not settle.

For a more detailed explanation of these and other risks, please refer to the Prospectus and Supplement.

CHARGES

The charges you pay are used to pay the cost of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge	None
