This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

VanEck New China ESG UCITS ETF (the "Fund")
a sub-fund of VanEck UCITS ETFs plc (the "Company")
Share Class: USD A ISIN: IE0000H445G8

This Fund is managed by VanEck Asset Management B.V., a subsidiary of Van Eck Associates Corporation.

Objectives and Investment Policy

The Fund's investment objective is to replicate, before fees and expenses, the price and yield performance of the MarketGrader New China ESG Index (the "Index").

In order to seek to achieve its investment objective, the Manager will normally use a replication strategy by investing directly in the underlying equity securities of the Index, being the stock, American depository receipts (ADRs), and global depository receipts (GDRs). The Index consists of the 100 most fundamentally sound companies (being companies with good financial results based on an analysis of each company's income statements, statements of cash flows and balance sheets) with the best growth prospects in China's new economy sectors. Such equities must be issued by the most financially sound companies domiciled in China that are listed on one or more of the following exchanges: the Mainland China Stock Exchanges, the Hong Kong Stock Exchange and the United States National Exchanges. The companies selected into the Index are compliant (above median performers) with Environmental, Sustainability and Governance (ESG) criteria based on the OWL Analytics consensus ESG Score. OWL ESG covers over 25,000 companies globally, publishing metrics monthly that are aggregated from hundreds of independent ESG data sources. OWL ESG scores and ranks all companies in its coverage universe across thirty core metrics, including 12 key performance indicators (KPIs) that quantify company behaviour across Environmental, Social and Governance factors.

The Manager has categorised the Fund as meeting the provisions set out in Article 8 of Regulation (EU) 2019/2088 on sustainability related disclosures in the financial services sector ("SFDR") for products, which promote environmental and/or social characteristics and invest in companies that follow good governance practices. The Fund does not have sustainable investment as its investment objective.

Where it is not practical or cost efficient for the Fund to fully replicate the Index, the Manager may utilise an optimised sampling methodology.

The Fund may also (or alternatively) invest in financial derivative instruments (FDIs) which relate to the Index or constituents of the Index. The FDIs which the Fund may use are futures, options (puts and calls), swaps (equity swaps and swaps on the Index), currency forwards and non-deliverable forwards (a forward contract that does not require settlement on maturity) (NDFs).

The Fund may invest more than 20% of its Net Asset Value in emerging markets. The Fund may also invest in ancillary liquid assets and money market instruments which may include bank deposits, depository receipts, certificates of deposit, fixed or floating rate instruments (treasury bills), commercial paper, floating rate notes and freely transferable promissory notes. The ancillary liquid assets, money market instruments and FDI (other than permitted unlisted investments) will be listed or traded on the Markets referred to in Appendix II of the Prospectus. Investment in ancillary liquid assets and money market instruments may be utilised in a variety of circumstances, including but not limited to, situations such as managing total exposure to cash and borrowing on a short term basis and in anticipation of participation in a rights offering.

The Fund, using a "passive" or indexing investment approach, attempts to approximate the investment performance of the Index by investing in a portfolio of securities that generally replicates the Index. The Investment Manager will regularly monitor the Fund's tracking accuracy.

Recommendation: This Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

Risk and Reward Profile

The risk and reward indicator is calculated using historical and simulated historical data. Historical data may not be a reliable indication for the future. Therefore, the risk classification may change over time.

Even if the Fund is in the lowest risk category, it does not mean it is risk free or that capital is guaranteed or protected.

This Fund is ranked at 6 because funds of this type have experienced very high rises and falls in value in the past.

The following risks can be materially relevant but are not necessarily adequately captured by the synthetic risk indicator and may cause additional loss:

- Foreign Currency Risk: Because all or a portion of the Fund are being invested in securities denominated in foreign currencies, the Fund's exposure to foreign currencies and changes in the value of foreign currencies versus the base currency may result in reduced returns for the Fund, and the value of certain foreign currencies may be subject to a high degree of fluctuation.

- Emerging Markets Risk: Investments in emerging market countries and China in particular are subject to specific risks and securities are generally less liquid and less efficient and securities markets may be less well regulated. Specific risks may be heightened by currency fluctuations and exchange control; imposition of restrictions on the repatriation of funds or other assets; governmental interference; higher inflation; social, economic and political uncertainties.
- Risk of Investing in China: The information provided to third parties seeking to invest in Chinese domiciled companies might be inaccurate and the review by appropriate regulators of Chinese financial statements may not be adequate.
- Risk of investing in smaller companies: The securities of smaller companies may be more volatile and less liquid than the securities of large companies. Smaller companies, when compared with larger companies, may have a shorter history of operations, fewer financial resources, less competitive strength, may have a less diversified product line, may be more susceptible to market pressure and may have a smaller market for their securities.
