The Sub-fund's risk rating may change in the future. Please note, higher possible gains generally also mean higher possible losses. The lowest risk category does not mean that the Sub-fund is risk free.

Why is the Sub-fund in the specific category?

Amongst other, equity prices mainly reflect the expected prospects of firms, as estimated by market participants. Expectations tend to fluctuate more strongly in times of higher uncertainty. The particularly active management of the Sub-fund may lead to frequent changes of the Sub-fund's risk profile. The Sub-fund may have a low degree of issuer diversification which makes it more vulnerable. The Sub-fund's application of Swing Pricing also impacts its risk and reward profile.

Are there any other particular risks?

The Sub-fund's risk and reward profile does not reflect the risk inherent in future circumstances that differ from what the Sub-fund has experienced in the recent past. This includes the following events which are rare but can have a large impact.

- **Liquidity risk:** Assets cannot necessarily be sold at limited cost in an adequately short timeframe. Part of the Sub-fund's investments may be prone to limited liquidity. The Sub-fund will endeavor to mitigate this risk by various measures.
- **Counterparty risk:** Bankruptcy or insolvency of the Sub-fund's derivative counterparties may lead to payment or delivery default. The Sub-fund will endeavor to mitigate this risk by the receipt of financial collateral given as guarantees.

- **Political and Legal risks:** Investments are exposed to changes of rules and standards applied by a specific country. This includes restrictions on currency convertibility, the imposing of taxes or controls on transactions, the limitations of property rights or other legal risks. Investments in less developed financial markets may expose the Sub-fund to increased operational, legal and political risk.
- **Sustainability risks:** Sustainability risks are environmental, social or governance events or conditions that can have a material negative effect on the return, depending on the relevant sector, industry and company exposure.
