### Objectives and Investment Policy

#### Objectives and Investment Policy

The Sub-Fund is actively managed in reference to a benchmark. The MSCI EMU ND (the "Benchmark") is used for performance comparison and internal risk monitoring purposes, without implying any particular constraints to the Sub-Fund's investments. The Sub-Fund's securities will generally be similar to those of the Benchmark but the security weightings are expected to differ materially. The Investment Manager may also select securities not included in the Benchmark in order to take advantage of investment opportunities. The Sub-Fund's objective is to seek long term capital appreciation and to outperform the Benchmark by investing in a portfolio of equity securities of companies located in the European Monetary Union. The Investment Manager's intention is to focus its selection on mid- to large capitalization companies with solid financial characteristics. The Sub-Fund may hold up to 10% of its assets in Cash and Cash Equivalents. The Investment Manager may also invest up to 10% of the Sub-Fund's net assets in any other securities (such as

convertible bonds and/or bonds with attached warrants) conferring access to the capital of the companies referred to above. At least 75% of the Sub-Fund's net assets are exposed to equity of corporate issuers having their registered office in the European Monetary Union. The Sub-Fund is therefore PEA (Plan d'Epargne en Actions) eligible in France. The Sub-Fund may invest up to 10% of its net assets in UCIs. The Sub-Fund is a product which promotes environmental or social characteristics or a combination of those characteristics for the purposes of article 8 of the Sustainable Finance Disclosure Regulation.

### Risk and Reward Profile

#### What does it mean?

This indicator (SRRI) represents the annualized historical volatility of the Sub-Fund over a 5-year period. Where there are less than 5 years worth of data, missing returns are simulated using an appropriate benchmark. The SRRI may change over time and should not be used as an indicator of future risk or returns. Even the lowest risk classification does not imply that the Sub-Fund is risk-free or that capital is necessarily guaranteed or protected.

#### Category

The sub-fund may exhibit high volatility due to its exposure to developed equity markets which have been subject in the past to elevated price fluctuations.

#### Are there any other particular risks?

The following risks may be materially relevant but may not always be

adequately captured by the synthetic risk indicator and may cause additional loss:

- Concentration risk: To the extent that the fund's investments are concentrated in a particular country, market, industry, sector or asset class, the fund may be susceptible to loss due to adverse occurrences affecting that country, market, industry, sector or asset class.
- Active management risk: Active management relies on anticipating various market developments and/or security selection. There is a risk at any given time that the fund may not be invested in the highest-performing markets or securities. The fund's net asset value may also decline.
- Financial, economic, regulatory and political risks: Financial instruments are impacted by various factors, including, without being exhaustive, the development of the financial market, the economic development of issuers who are themselves affected by the general world economic situation, and economic, regulatory and political conditions prevailing in the relevant country.
