

Allianz Green Transition Bond - WT6 - USD

Bond fund following a green transition strategy

Investment Objective

The fund invests primarily in the global bond markets. Its focus is on issuers which provide positive contribution to sustainable and environmental-friendly solutions and the transition into a low-carbon economy ("Green Transition Strategy"). Up to 30% of the fund's assets may be invested in high-yield bonds, the exposure to the emerging markets is limited to 40%. The fund's investment objective is to generate capital growth over the long term.

Fund Manager

Julien Bras
(since 12/14/2021)

Giulia Pellegrini

Key Figures

Effective Duration (%)	7.51
Average nominal return (%)	2.82
Yield to worst (%) ⁶	3.25
Average rating	BBB

Opportunities

- + Interest income from bonds, capital gains opportunities on declining market yields
- + Enhanced return potential through addition of emerging markets and high-yield bonds
- + Prospect of positive impact on the environment through the Green Transition Strategy
- + Currency gains possible in unhedged share classes
- + Broad diversification across numerous securities
- + Potential additional returns from security analysis and active management

Risks

- Interest rates vary, bonds suffer price declines on rising market yields
- Increased risk of price fluctuations, market illiquidity and losses of emerging markets and high-yield bonds
- Positive impact on the environment through the Green Transition Strategy not guaranteed, this approach additionally narrows the investment universe.
- Currency losses possible in unhedged share classes
- Limited participation in the potential of individual securities
- Success of single security analysis and active management not guaranteed

FOR FUND DISTRIBUTORS AND PROFESSIONAL INVESTORS ONLY

- 1) Calculated at the net asset value, excl. front-end load, distributions reinvested. Calculation according to method as defined by BVI, the German Fund Companies Association. **Any front-end loads reduce the capital employed and the performance.**
- 2) SFDR: EU Sustainable Finance Disclosure Regulation. Information accurate at time of publishing.
- 3) This is for guidance only and not indicative of future allocation.
- 4) Breakdown based on best available rating for each security. Data published by index provider are based on average ratings and may be different.
- 5) The all-in fee includes the expenses previously called management, administration and distribution fees. Any payment of a trail fee by the management company to a distribution partner will be effected from the all-in fee.
- 6) Represents the lowest potential yield that an investor could theoretically receive on the bond up to maturity if bought at the current price (excluding the default case of the issuer). The yield to worst is determined by making worst-case scenario assumptions, calculating the returns that would be received if worst-case scenario provisions, including prepayment, call or sinking fund, are used by the issuer (excluding the default case). It is assumed that the bonds are held until maturity and interest income is reinvested on the same conditions. Calculation is before currency hedging. The yield to worst is a portfolio characteristic; in particular, it does not reflect the actual fund income. The expenses charged to the fund are not taken into account. As a result, the yield to worst is not suitable as an indicator of the future performance of a bond fund. Forecasts are not a reliable indicator of future results.

Disclaimer

Investing involves risk. The value of an investment and the income from it may fall as well as rise and investors might not get back the full amount invested. Investing in fixed income instruments may expose investors to various risks, including but not limited to creditworthiness, interest rate, liquidity and restricted flexibility risks. Changes to the economic environment and market conditions may affect these risks, resulting in an adverse effect to the value of the investment. During periods of rising nominal interest rates, the values of fixed income instruments (including positions with respect to short-term fixed income instruments) are generally expected to decline. Conversely, during periods of declining interest rates, the values of these instruments are generally expected to rise. Liquidity risk may possibly delay or prevent account withdrawals or redemptions. Allianz Green Transition Bond is a sub-fund of Allianz Global Investors Fund SICAV, an open-ended investment company with variable share capital organised under the laws of Luxembourg. The value of the units/shares which belong to the Unit/Share Classes of the Sub-Fund that are denominated in the base currency may be subject to an increased volatility. The volatility of other Unit/Share Classes may be different and possibly higher. Past performance does not predict future returns. If the currency in which the past performance is displayed differs from the currency of the country in which the investor resides, then the investor should be aware that due to the exchange rate fluctuations the performance shown may be higher or lower if converted into the investor's local currency. This is for information only and not to be construed as a solicitation or an invitation to make an offer, to conclude a contract, or to buy or sell any securities. The products or securities described herein may not be available for sale in all jurisdictions or to certain categories of investors. This is for distribution only as permitted by applicable law and in particular not available to residents and/or nationals of the USA. The investment opportunities described herein do not take into account the specific investment

objectives, financial situation, knowledge, experience or specific needs of any particular person and are not guaranteed. The Management Company may decide to terminate the arrangements made for the marketing of its collective investment undertakings in accordance with applicable de-notification regulation. The views and opinions expressed herein, which are subject to change without notice, are those of the issuer companies at the time of publication.
