FUND OVERVIEW

The Fund aims to achieve a return on your investment through a combination of capital growth and income on the Fund's assets. The Fund will seek to achieve this by investing globally at least 70% of its total assets in the equity securities and equity-related securities of companies, the main business of which is in the real estate and infrastructure sectors. The real estate sector may include residential and / or commercial real estate focused companies as well as real estate operating companies and real estate holding companies including real estate investment trusts (REITs). REITs are closed-ended investment vehicles that invest in, manage and own, real estate. The infrastructure sector may include companies engaged in the management, ownership and operation of assets that provide essential services to the general public (for example, power generation, utilities, water and waste, energy, transportation, social infrastructure and telecommunications). The equity-related securities may include financial derivative instruments (FDIs) (i.e. contracts the value of which is based on one or more underlying assets). The Fund will utilise a variety of investment strategies and instruments. In particular, the Investment Adviser ("IA") will employ a fundamentally-driven investment process that aims to evaluate the value of an asset by considering qualitative and quantitative factors affecting such asset including macro-economic and financial factors.

Performance is not shown as the Share Class has a performance history of less than 1 year.

% CALENDAR YEAR RETURNS

	2021	2020	2019	2018	2017
Share Class	N/A	N/A	N/A	N/A	N/A
Benchmark	N/A	N/A	N/A	N/A	N/A

Share Class performance is calculated on a Net Asset Value (NAV) basis, net of fees in the dealing currency specified and do not include sales charge or taxes. Returns assume reinvestment of any distributions. Past performance is not a guide to future performance and should not be the sole factor of consideration when selecting a product.

Key Risks: Investment risk is concentrated in specific sectors, countries, currencies or companies. This means the Fund is more sensitive to any localised economic, market, political or regulatory events. The value of equities and equity-related securities can be affected by daily stock market movements, political factors, economic news, company earnings and significant corporate events. Investments in property securities can be affected by the general performance of stock markets and the property sector. In particular, changing interest rates can affect the value of properties in which a property company invests. Derivatives are highly sensitive to changes in the value of the asset on which they are based and can increase the size of losses and gains, resulting in greater fluctuations in the value of the Fund. The impact to the Fund can be greater where derivatives are used in an extensive or complex way. Investments in infrastructure securities are subject to environmental concerns, taxes, government regulation, price, supply and competition. Risk to Capital Growth: The Fund may pursue investment strategies in order to generate income which may have the effect of reducing capital and the potential for long-term capital growth as well as increasing any capital losses. Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.

Capital at risk. All financial investments involve an element of risk. Therefore, the value of your investment and the income from it will vary and your initial investment amount cannot be guaranteed.

The Morningstar Analyst Rating is not a credit or risk rating. It is a subjective evaluation performed by the manager research analysts of Morningstar. Morningstar evaluates funds based on five key pillars, which are process, performance, people, parent, and price. Analysts use this five pillar evaluation to determine how they believe funds are likely to perform over the long term on a risk-adjusted basis. They consider quantitative and qualitative factors in their research, and the weighting of each pillar may vary. The Analyst Rating scale is Gold, Silver, Bronze, Neutral, Negative. A Morningstar Analyst Rating of Gold, Silver, or Bronze reflect an Analyst's conviction in a fund's prospects for outperformance. Analyst Ratings are continuously monitored and reevaluated at least every 14 months. For more detailed information about Morningstar's Analyst Rating, including its methodology, please go to <http://corporate.morningstar.com/us/documents/MethodologyDocuments/AnalystRatingforFundsMethodology.pdf>. The Morningstar Analyst Rating should not be used as the sole basis in evaluating a mutual fund. Morningstar Analyst Ratings are based on Morningstar's current expectations about future events; therefore, in no way does Morningstar represent ratings as a guarantee nor should they be viewed by an investor as such. Morningstar Analyst Ratings involve unknown risks and uncertainties which may cause Morningstar's expectations not to occur or to differ significantly from what we expected Morningstar rates mutual funds from one to five stars based on how well they've performed (after adjusting for risk and accounting for all sales charges) in comparison to similar funds. Within each Morningstar Category, the top 10% of funds receive five stars, the next 22.5% four stars, the middle 35% three stars, the next 22.5% two stars, and the bottom 10% receive one star. Funds are rated for up to three time periods—three-, five-, and 10 years—and these ratings are combined to produce an overall rating. Funds with less than three years of history are not rated. Ratings are objective, based entirely on a mathematical evaluation of past performance. They're a useful tool for identifying funds worthy of further research, but shouldn't be considered buy or sell recommendations. Morningstar Rating metrics. Morningstar, Inc.© 2022. SUSTAINABILITY CHARACTERISTICS

Sustainability Characteristics can help investors integrate non-financial, sustainability considerations into their investment process. These metrics enable investors to evaluate funds based on their environmental, social, and governance (ESG) risks and opportunities. This analysis can provide insight into the effective management and long-term financial prospects of a fund.

The metrics below have been provided for transparency and informational purposes only. The existence of an ESG rating is not indicative of how or whether ESG factors will be integrated into a fund. The metrics are based on MSCI ESG Fund Ratings and, unless otherwise stated in fund documentation and included within a fund's investment objective, do not change a fund's investment objective or constrain the fund's investable universe, and there is no indication that an ESG or Impact focused investment strategy or exclusionary screens will be adopted by a fund. For more information regarding a fund's investment strategy, please see the fund's prospectus.

MSCI ESG Fund Rating (AAA-CCC)	A	MSCI ESG Quality Score (0-10)	6.98
MSCI ESG Quality Score - Peer Percentile	-	MSCI ESG % Coverage	94.70%
Fund Lipper Global Classification	-	MSCI Weighted Average Carbon Intensity (Tons CO2E/\$M SALES)	266.48
Funds in Peer Group	-		

All data is from MSCI ESG Fund Ratings as of **07-Jan-2022**, based on holdings as of **31-Aug-2021**. As such, the fund's sustainable characteristics may differ from MSCI ESG Fund Ratings from time to time.

To be included in MSCI ESG Fund Ratings, 65% of the fund's gross weight must come from securities covered by MSCI ESG Research (certain cash positions and other asset types deemed not relevant for ESG analysis by MSCI are removed prior to calculating a fund's gross weight; the absolute values of short positions are included but treated as uncovered), the fund's holdings date must be less than one year old, and the fund must have at least ten securities. For newly launched funds, sustainability characteristics are typically available 6 months after launch.

ESG GLOSSARY:

MSCI ESG Fund Rating (AAA-CCC): The MSCI ESG Rating is calculated as a direct mapping of ESG Quality Scores to letter rating categories (e.g. AAA = 8.6-10). The ESG Ratings range from leader (AAA, AA), average (A, BBB, BB) to laggard (B, CCC).

MSCI ESG Quality Score - Peer Percentile: The fund's ESG Percentile compared to its Lipper peer group.

Fund Lipper Global Classification: The fund peer group as defined by the Lipper Global Classification.

Funds in Peer Group: The number of funds from the relevant Lipper Global Classification peer group that are also in ESG coverage.

MSCI ESG Quality Score (0-10): The MSCI ESG Quality Score (0 - 10) for funds is calculated using the weighted average of the ESG scores of fund holdings. The Score also considers ESG Rating trend of holdings and the fund exposure to holdings in the laggard category. MSCI rates underlying holdings according to their exposure to industry specific ESG risks and their ability to manage those risks relative to peers.

MSCI ESG % Coverage: Percentage of a fund's holdings that have MSCI ESG ratings data.

MSCI Weighted Average Carbon Intensity (Tons CO2E/\$M SALES): Measures a fund's exposure to carbon intensive companies. This figure represents the estimated greenhouse gas emissions per \$1 million in sales across the fund's holdings. This allows for comparisons between funds of different sizes.
