Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

U Access (IRL) Bain Capital Global Equity LS Responsible UCITS ("Fund") A sub-fund of U ACCESS (Ireland) UCITS P.L.C ("Company")

Class: B USD, ISIN: IE0009PLO304

The Fund is managed by Carne Global Fund Managers (Ireland) Limited (the "Manager")

Objectives and Investment Policy

The investment objective of the Fund is to seek to achieve consistent, positive absolute returns over a market cycle, typically a three to four year period, with moderate correlation to global public equity markets while reducing the market risk of the portfolio through targeted short exposure and tactical hedging.

The Fund is actively managed and not with reference to a benchmark. In order to achieve its investment objective, the Fund may invest in U.S. and non-U.S. equity instruments i.e. common stocks, preferred stocks, American Depositary Receipts (ADRs) or Global Depositary Receipts (GDRs), warrants, listed or over-the-counter (OTC) options, equity swaps, index swaps, basket swaps, total return swaps and FX forward contracts. Synthetic short positions related to equity instruments will be achieved through using exchange traded, OTC cleared or bilateral financial derivative instruments (FDIs). Synthetic short positions are positions which are in economic terms equivalent to short positions. The fund will not invest more than 10% in securities which are not listed, traded or dealt in on permitted markets.

The Portfolio Manager utilizes a fundamental long/short equity strategy and will generally invest in the consumer (discretionary and staples), financial (including banks, asset managers, insurance, brokerage, fintech/global payment companies), healthcare (pharmaceuticals and biotechnology) and technology (software, internet), media and telecom sectors, without any specific geographical allocation. The Fund promotes certain environmental, social characteristic and invests in companies with good governance (ESG) practices, but it does not have as its objective a sustainable investment objective. The assessment of ESG considerations will consist of i) Sustainable growth and reducing climate impact, ii) Diversity, Equity and Inclusion and iii) Transparency and Disclosure. The Portfolio Manager seeks to avoid investment in companies in the following sectors: adult entertainment, energy and natural resources, basic materials, mining, controversial weapons, munitions and firearms, tobacco, and utilities (revenue threshold may apply). For more detail on ESG considerations please refer to the Fund's supplement.

FDIs may be used for investment purposes, hedging and efficient portfolio management purposes. The level of leverage (calculated as a sum of the notional exposure of FDI being

utilised by the Fund) is expected to be between 0% and 190% of the Net Asset Value (NAV) under normal market conditions. It is possible that leverage may exceed this range from time to time.

The Fund may invest either directly or indirectly through FDIs, up to 20% of its NAV in the stocks of companies which are listed or traded on emerging markets which includes indirect exposure to China A-shares through equity swaps. The Fund may also have exposure to Russian securities listed and/or traded on the Moscow Exchange. It is not anticipated that exposure to Russian securities will exceed 10% of the NAV. The Fund may gain exposure to financial indices indirectly through the use of FDIs.

The Fund shall not exceed in aggregate 10% of its NAV in investments in collective investment schemes. If considered appropriate to the investment objective or where market or other factors so warrant, the Fund may be partially or fully invested in cash and in money market instruments.

The base currency of the Fund is U.S. Dollars. It is intended that any non-base currency share classes will be currency hedged to hedge against the currency exposure between the denominated currency of the share class and the base currency of the Fund.

The Fund is an accumulating fund. All income will be reinvested in the Fund.

You can buy, sell and exchange shares each day (other than Saturday and Sunday) on which commercial banks are open for business in Dublin, Ireland, London, United Kingdom and New York, U.S.A. You must submit your application to the Fund's Administrator before 2.00p.m. (Irish time) on the business day that is two business days prior to the dealing day.

The Fund is suitable for investors seeking a long-term investment who are willing to accept a high volatility due to the Fund's investment policy. Investors should note holding a substantial proportion of their investment policy in the Fund may not be appropriate.

For further information, please refer to the section entitled "Funds – Investment Objective and Policies" in the Prospectus and the sections entitled "Investment Objective" and "Investment Policies" in the Supplement for the Fund.

Risk and Reward Profile

The indicator above illustrates the position of this Fund on a standard Risk/Reward category scale. The category is chosen based on the volatility of returns. The category shown is not guaranteed to remain unchanged and may vary over time. Historical data is used in calculating the synthetic risk and reward indicator, and may not be a reliable indication of the future risk profile of the Fund. The Fund does not provide its investors with any capital guarantee on performance, nor the monies invested in it, so investors can lose the whole of their investment.

A category 1 fund is not a risk-free investment - the risk of losing your money is small, but the chance of making gains is also limited. With a category 7 fund, the risk of losing your money is high but there is also a chance of making higher gains. The seven-category scale is complex. For example, a category 2 fund is not twice as risky as a category 1 fund.

Risks materially relevant to the Fund which are not captured by the Indicator:

Emerging and Developing Markets Risk: Investing in emerging and developing markets involves additional risks not typically associated with investing in more established economies and markets. Such risks may include greater social, economic and political uncertainty.

Operational Risk: The Fund and its assets may experience material losses as a result of technology/system failures, human error, policy breaches, and/or incorrect valuation of units.

Liquidity Risk: The Fund can from time to time be invested in financial instruments that may have low levels of liquidity.

Currency Risk: The Fund has exposure to securities that are issued in currencies other than the base currency of the Fund. The Fund is therefore subject to currency risk, which arises from changes in exchange rates. The Fund will attempt to hedge against exchange rate risk in non-USD denominated classes, however there is no guarantee that such attempts at hedging will be successful.

Derivative and Counterparty Risk: The Fund may enter into various financial contracts (derivatives) with other parties. There is a risk that the other party to a derivative will become insolvent or fail to make its payments which may result in the Fund and the investment suffering a loss. Investments in a derivative will not necessarily generate the same return as a direct investment in the underlying asset on which the derivative is based.

Sustainability Risk: Sustainability risk means an environmental, social or governance event or condition that, if it occurs may have a material negative impact on the value of the investment. This could cause the Fund to avoid or sell stocks that otherwise meet the financial criteria in the Fund's investment policy.

For more information on risks, please see the section entitled "Risk Factors" in the Prospectus of the Company and the section entitled "Risk Factors" in the Supplement for the Fund.
