Man GLG RI Sustainable Water & Circular Economy Class I C EUR Shares

(ISIN:IE000N8O3582) Man GLG RI Sustainable Water & Circular Economy (the 'Fund') is a sub-fund of Man Funds plc (the 'Company').

Man Asset Management (Ireland) Limited, part of Man Group plc, is the Manager of the Company.

Objectives and investment policy

- The Fund investment objective is to support the financing of companies that provide solutions and technologies related to the fight against water scarcity, that improve the supply and treatment of high quality water, and/or address the challenges of the circular economy. The Portfolio also aims to provide long-term appreciation of the investor's capital through investment in the equity of those companies.
- In addition to investing at least two thirds of its net assets in equities, the Fund may also invest in a number of other assets including currencies, money market instruments, investment grade and non-investment grade bonds (including government and corporate bonds), other fixed income investments, eligible collective investment schemes and other liquid assets.
- The Fund will invest substantially all of its assets in companies that contribute to the United Nations Sustainable Development Goals ("UN SDGs"), predominantly focusing on companies that contribute to the following UN SDGs: Clean water and sanitation (goal 6), Life below water (goal 14), Life on land (goal 15) and Goal 12 on Responsible consumption and production. The investee companies will offer an exposure to sustainable supply and treatment of water, the optimisation of water use, the prevention of pollution and the activities related to the circular economy including waste reduction, re-use and recycling and the sustainable disposal of waste.
- The Fund may actively use financial derivative instruments (ie instruments whose prices are dependent on one or more underlying assets) ("FDI") which may multiply the gains or losses made by the Fund on a given investment or on its investments generally.
- The Fund may increase its holdings of cash and other liquid assets in times of exceptional market circumstances or where it is of the opinion that there are insufficient investment opportunities.
- Benchmarks. The Fund is actively managed and does intend to outperform the MSCI World Net Dividend Total Return (the "Benchmark"). Although the Benchmark may be used for performance comparison purposes, the Fund's investment policy is not constrained by the Benchmark. The Fund can deviate substantially from the issuer, country and sector weightings of the Benchmark, and there are no restrictions on the deviation from the

Benchmark. The Investment Manager is expected to maintain a diversified portfolio, holding approximately 30-60 stocks selected from the universe of stocks.

- The Fund may actively use FDI to achieve the investment objective, for efficient portfolio management purposes and for hedging against anticipated movements in a market or security.
- The Fund has a sustainable investment objective within the meaning of Article 9 of the Sustainable Finance Disclosure Regulation (SFDR). The investment strategy for the Fund integrates sustainability criteria in each step of the investment process. The Investment Manager will also ensure that all companies in the Fund comply with the "do not significantly harm" principle under SFDR. The Investment Manager will apply an exclusion list of controversial stocks or industries which may be related to arms and munitions, nuclear weapons, tobacco and coal-oriented activities.
- The Fund may actively use FDI to provide investors with the currency risk associated with the underlying investments of the Fund, or of an appropriate benchmark.
- Any income earned on investments will be added to the value of investors' shares and investors can buy and sell their shares on each dealing day of the Fund.
- Investment in the Fund is suitable for investors who can hold for the hold for the medium to long term.
- The Fund's reference currency is EUR.

Risk and reward profile

- The lowest category does not mean 'risk free'.
- The risk and reward profile is not guaranteed and may change over time.
- Historical data may not be a reliable indication for the future.
- The risk category for this share class is 5 as funds of this nature engage in strategies that typically have a moderate to high volatility. The calculation is based on the historical volatility of the Fund's performance. Where there is insufficient Fund performance the calculation is based on either the historical volatility of a relevant benchmark for the investment strategy or the Manager's Value at Risk limit for the Fund. Please refer to the prospectus for further information relating to the Value at Risk.

The following risks may not be fully captured by the risk and reward profile:

- The Fund may make investments or hold trading positions in markets that are volatile and which may become illiquid. Timely and cost efficient sale of trading positions can be impaired by decreased trading volume and/or increased price volatility.
- The Fund will be exposed to credit risk on counterparties with which it trades in relation to on-exchange traded instruments such as futures and options and where applicable, 'over-the-counter' ("OTC", "non-exchange") transactions. OTC instruments may also be less liquid and are not afforded

the same protections that may apply to participants trading instruments on an organised exchange.

- The value of investments designated in another currency may rise and fall due to exchange rate fluctuations. Adverse movements in currency exchange rates may result in a decrease in return and a loss of capital. It may not be possible or practicable to successfully hedge against the currency risk exposure in all circumstances.
- The Fund may invest in financial derivative instruments ("FDI") (instruments whose prices are dependent on one or more underlying asset) typically for hedging purposes. The use of FDI involves additional risks such as high sensitivity to price movements of the asset on which it is based. The use of FDI may multiply the gains or losses.
- Whilst the Fund aims to provide capital growth over 5 years a positive return is not guaranteed over any time period and capital is in fact at risk.
- The Fund may invest a significant proportion of its assets in securities with exposure to emerging markets which involve additional risks relating to matters such as the illiquidity of securities and the potentially volatile nature of markets not typically associated with investing in other more established economies or markets.
- The Fund invests in a limited number of investments which can increase the volatility of performance.
- The Fund is subject to normal market fluctuations and the risks associated with investing in international securities markets and therefore the value of your investment and the income from it may rise as well as fall and you may not get back the amount originally invested.

A complete description of risks is set out in the prospectus section entitled 'Certain Investment Risks'.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge	None
Exit charge	None

This is the maximum that might be taken out of your money before it is invested / before the proceeds of your investment are paid out.

Charges taken from the fund over a year

Ongoing charges	0.95%
------------------------	-------

Charges taken from the fund under certain specific conditions

Performance fee	None
------------------------	------

The entry and exit charges shown are maximum figures and in some cases you might pay less. Please refer to your financial advisor or the distributor for the actual charges.

As this share class has not had a full year of performance, the ongoing charges figure is an estimated figure.

This figure may vary from year to year. It excludes performance fees (where applicable) and portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling units in another sub-fund.

For detailed information on charges and fees please see the 'Fees and Expenses' section of the prospectus.

Past performance

- The Fund was authorised in 2022.
- The Fund is not an index-tracker and does not seek to track the benchmark shown in the past performance chart. The benchmark performance data is shown for performance comparison purposes and is share class specific.
