

Key Investor Information for Investors in the United Kingdom

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Xtrackers MSCI China UCITS ETF

Share class: 1D, ISIN: LU2456436083, Security code: DBX0SC, Currency: USD

a sub-fund of Xtrackers. The management company is DWS Investment S.A., a member of the DWS Group.

Objectives and investment policy

The fund is passively managed. The aim is for your investment to reflect the performance of the MSCI China TRN Index (index) which is designed to reflect the performance of the shares of certain companies in or connected to China. The companies making up the index are large and medium sized companies, based on the combined value of a company's readily available shares as compared to other companies. The index includes companies incorporated in the People's Republic of China (PRC), and listed on eligible stock exchanges as well as companies which are not incorporated in the PRC, but are controlled by individuals or state or other public entities in the PRC, or derive 80% of their revenue or hold 60% of their assets in the PRC and are listed on the Hong Kong Stock Exchange. The index is calculated on a total return net basis which means that all dividends and distributions by the companies are reinvested in the shares after tax. The index is reviewed and rebalanced at least quarterly. To achieve the aim, the fund will attempt to replicate the index, before fees and expenses,

by buying all or a substantial number of the securities in the index. The fund may employ techniques and instruments in order to manage risk, reduce costs and improve results. These techniques and instruments may include the use of financial contracts (derivatives). The fund may also engage in secured lending of its investments to certain eligible third parties to generate additional income to offset the costs of the fund. Certain information (including the latest share prices of the fund, indicative net asset values, full disclosure on the composition of the fund's portfolio and information on the index constituents) are available on your local DWS website or at www.Xtrackers.com. Transaction costs and taxes, unexpected fund costs and market conditions such as volatility or liquidity issues may affect the ability of the fund to track the index. The anticipated level of tracking error in normal market conditions is 2 per cent. The currency of the fund is USD. The fund distributes up to four times per annum. You may request the redemption of shares generally on a daily basis.

Risk and reward profile

The calculation of the risk and reward profile is based on simulated data that cannot be used as a reliable indicator for the future risk profile. This risk indicator is subject to changes; the classification of the fund may change over time and cannot be guaranteed. Even a fund that is classified in the lowest category (category 1) does not represent a completely risk-free investment. The fund is classified in category 6 because its share price may fluctuate strongly and the likelihood of both losses and gains may therefore be high. The following risks could be of particular significance for the fund: The fund will attempt to replicate the performance of the index less costs, but your investment is not expected to match the performance of the index precisely. Exceptional circumstances may arise, such as, but not limited to, disruptive market conditions, additional costs/taxes or extremely volatile markets, which may cause the fund's performance to be substantially different from the performance of the index. DWS entities and related companies

may act in several roles in relation to the fund such as distributor and management company which may involve conflicts of interest. The fund is not guaranteed, and your investment is at risk. The value of your investment may go down as well as up. The fund is exposed to less economically developed economies (known as emerging markets) which involve greater risks than well developed economies. Political unrest and economic downturn may be more likely and will affect the value of your investment. The fund may use derivatives to try to manage its investments more efficiently. This may not always be successful and may result in greater fluctuations in the value of the fund. The fund is exposed to liquidity, operational, clearing, settlement and custody risks linked to investments in PRC and the Stock Connect. The fund may suffer difficulties or delays in enforcing its rights in securities given the securities regimes in the PRC and Hong Kong are different. The fund and the depositary cannot ensure that the fund's ownership of the securities in the PRC or title thereto is assured in all circumstances. This may negatively affect the value of the fund and your investment.

A more detailed description of risks and other general information can be found in the risk section(s) of the prospectus.

Charges

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	None
Exit charge	None
This is the maximum that might be taken out of your money before it is invested (entry charge) and before the proceeds of your investment are paid out (exit charge).	
Charges taken from the fund over a year	
Ongoing charges	0.28 %
Charges taken from the fund under certain specific conditions	
Performance fee	None
Securities lending fees	0.00 %

Secondary market investors (those who buy or sell shares on a stock exchange) may be charged certain fees by their stock broker. These charges, if any, can be obtained from such stock broker. Authorised participants dealing directly with the fund will pay the transaction costs related to their subscriptions and redemptions.

The ongoing charges shown here are a cost estimate. It excludes portfolio transaction costs and performance fees, if any.

Additional information on costs can be found in the cost section(s) of the prospectus.

To the extent the fund undertakes securities lending to generate revenue, the fund will ultimately be allocated 70% of the associated revenue, the securities lending agent, which will be a DWS entity or other Deutsche Bank entity, will be allocated 15% and the remaining 15% will be allocated to the DWS entity which monitors such activities, as set out in the prospectus. As securities lending revenue sharing does not increase the costs of running the fund, this has been excluded from the composition of costs.

Past performance

There is not yet sufficient data available to provide you with useful information regarding earlier performance.

The 1D share class of Xtrackers MSCI China UCITS ETF was launched in 2022.
