Key Investor Information Document

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

KraneShares Electric Vehicles & Future Mobility ESG Screened UCITS ETF (the <u>"Fund"</u>)

Class USD Shares (ISIN: IE000YUAPTQ0) (the "Class")

A sub-fund of KraneShares ICAV (the "ICAV"). The Fund is managed by Waystone Management Company (IE) Limited (the "Manager").

Objectives and Investment Policy

The Fund seeks to deliver the performance of companies that are engaged in or expected to derive significant revenues from the production of electric vehicles, their components or in other initiatives that may change the future of mobility ("**Electric Vehicle Companies**"). The Fund is passively managed and will seek to achieve its objective by tracking the performance of the Bloomberg Electric Vehicles ESG Screened Index (Total Return version (BBVET)) (the "Index"). The Index aims to represent the performance of Electric Vehicle Companies.

In order to be eligible for the Index, a security must (i) be a constituent of the Bloomberg World Equity Aggregate Index (the "**Base Index**"); (ii) belong to the vehicles, electric vehicle components, batteries, hydrogen fuel cells, or raw materials sectors of the Base Index; (iii) have a minimum capitalisation of US\$500 million; and (iv) have a 90-caledar day average daily traded value of US\$5 million.

The Index also screens out companies involved in environmental, social and governance ("**ESG**") controversies and controversial business activities. The Fund seeks to promote a combination of ESG characteristics, within the meaning of Article 8 of the Sustainable Finance Disclosure Regulation.

The Fund seeks to hold all the securities of the Index with the approximate weightings that they have in the Index. The Fund seeks to create a near mirror image of the Index but may, in certain circumstances purchase securities that are not included in the Index. The Fund does not intend to use financial derivative instruments. The Fund may exclude any security in the Index that the Investment Manager reasonably believes the Fund is not permitted to hold or acquire or reasonably expects not to be permitted to hold or acquire in the future due to legal, regulatory or similar reasons, including US government executive orders.

Save in exceptional circumstances, the Fund will only issue and redeem shares of the Fund ("**Shares**") to certain institutional investors. However, other investors may purchase or sell Shares through brokers on one or more stock exchanges. The Shares trade on these stock exchanges at market prices which may fluctuate throughout the day. Market prices may be greater or less than the daily net asset value of the Fund.

The Fund may engage in securities lending but does not intend to use repurchase agreements or total return swaps. The Fund may invest up to 10% of its net asset value in other regulated collective investment schemes, including other exchange traded funds.

Shareholders may redeem Shares on any business day (a day on which commercial banks are open and settle payments in London, New York and China, including days on which such commercial banks are open only half a day) and any other day at the Directors' discretion provided Shareholders are notified in advance. A list of dealing days for the Fund is published on https://kraneshares.eu/.

The Fund's base currency and the class currency of this Class is U.S. Dollar. The Fund's income will be reinvested and the Fund does not intend to declare dividends. Please refer to the ICAV's prospectus and the supplement in respect of the Fund for more information.

Risk and Reward Profile

- The higher the category, the greater potential for reward, but also the greater the risk of losing the investment.
- The lowest category does not mean risk free.
- The Fund is in category 7. The Fund is in this category due to the nature of its investments and their recent price

Significant risks for the Fund not taken into account in this indicator include the following:

- Concentration Risk: As the Fund focuses its investments in a particular economic area, issues affecting this area will have a greater effect on the Fund than if its investments were more diversified. This concentration may also limit the Shares' liquidity.
- Index Tracking Risk: The Fund's performance may not track the Index exactly. This can result from market fluctuations, changes in the composition of the Index, regulatory issues preventing the Fund from holding certain Index securities, transaction costs, the costs of making changes to the Fund's portfolio and other Fund expenses.
- Smaller Company Risk: Index companies may have smaller market capitalisation and scale than more established companies. Such companies may be subject to wider price fluctuations and lower liquidity than larger companies.

For full details of the relevant risks reference should be made to the risk factors sections of the prospectus and supplement.

	volatility. This means that the Shares may be subject to significant increases and decreases in price.
