Investment Objective

Carmignac Credit 2027 is a target date fund implementing a carry strategy that includes both private and public issuers. The Fund benefits from both the strong expertise of its management team and a disciplined investment process that enables a rigorous selection of securities. Carmignac Credit 2027 targets appreciation of invested capital in line with its carry strategy on a five-year horizon, while giving investors the opportunity for early recovery of their investment if the Fund's internal rate of return hits one of the thresholds stated in the prospectus before maturity. The investment objective differs depending on the category of units subscribed.

Variable Management Charge: -. (1) Ongoing charges are based on the expenses for the last financial year ended. They may vary from year to year and do not include performance fees or transaction costs. (2) Entry charges paid to distributors. No redemption fees. (3) Please refer to the prospectus for the minimum subsequent subscription amounts. The prospectus is available on the website: www.carmignac.com.

GLOSSARY

Active Management: An investment management approach where a manager aims to beat the market through research, analysis and their own judgement. See also Passive management.

Bottom up investing: Investment based on analysis of individual companies, whereby that company's history, management, and potential are considered more important than general market or sector trends (as opposed to top down investing).

Credit cycle: A credit cycle describes the different phases of access to credit by borrowers. It alternates between periods of easily accessible funds to borrow due to low interest rates and periods of contraction where lending rules are more restrictive and interest rates are higher.

FCP: Fonds commun de placement (French common fund).

Forward financial instruments: A forward contract is a customized contract between two parties to buy or sell an asset at a specified price on a future date. A forward contract can be used for hedging or speculation, although its non-standardized nature makes it particularly apt for hedging. Unlike standard futures contracts, a forward contract can be customized to any commodity, amount and delivery date. A forward contract settlement can occur on a cash or delivery basis.

High yield: A loan or bond rated below investment grade because of its higher default risk. The return on these securities is generally higher.

Investment grade: A loan or bond that rating agencies have rated AAA to BBB-, generally indicating relatively low default risk.

Modified duration: A bond's modified duration measures the risk attached to a given change in the interest rate. Modified duration of +2 means that for an instantaneous 1% rate increase, the portfolio's value would drop by 2%.

Non-benchmarked: Portfolio construction is a result of Fund manager views and market analysis with no bias to any benchmark.

Rating: The rating measures the creditworthiness of a borrower (bond issuer). Ratings are published by rating agencies and offer the investor reliable information on the risk profile associated with a debt security.

UCITS: Undertakings for Collective Investments in Transferable Securities.

UCITS funds are authorised funds that can be sold in any country in the EU. UCITS III regulations allow funds to invest in a wider range of financial instruments, including derivatives.

Yield to Maturity: Yield to maturity corresponds to the concept of actuarial yield. It is, at the time of calculation, the rate of return offered by a bond in the event it is held until maturity by the investor.

Main risks of the fund

Credit: Credit risk is the risk that the issuer may default. **Interest rate:** Interest rate risk results in a decline in the net asset value in the event of changes in interest rates.

Liquidity: Temporary market distortions may have an impact on the pricing conditions under which the Fund might be caused to liquidate, initiate or modify its positions. **Discretionary management:** Anticipations of financial market changes made by the Management Company have a direct effect on the Fund's performance, which depends on the stocks selected. The Fund presents a risk of loss of capital.
