KEY INVESTOR INFORMATION

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

UBAM - Dynamic Euro Bond, a sub-fund of UBAM

Class: I+HD GBP (Distribution) LU2258285043

UBAM is managed by UBP Asset Management (Europe) S.A.

Objectives and investment policy

The Fund seeks to grow capital and generate income by investing primarily in investment grade bonds with a minimum rating of BBB- (S&P or Fitch) or Baa3 (Moody's). The Fund can invest in interest rate and credit derivatives.

The Fund is actively managed and invests mainly in EUR denominated securities.

The Fund may invest up to 15% of its net assets in non-rated products/issuers.

A minimum of 50% of the bond investments will be in issuers deemed to maintain sustainable characteristics with a minimum Environmental, Social and Governance (ESG) rating of BBB for developed market issuers and BB for emerging market issuers as measured by MSCI ESG research or if such rating is not available an equivalent internal rating assigned by the Investment Manager. ESG investment strategy is based on three pillars: (i) Sector exclusion according to the UBP Responsible Investment policy; (ii) ESG integration to select issuers through the analysis of ESG and financial factors; (iii) a preference for Green, Social and Sustainability bonds.

The Fund uses the €STR (Hedged GBP) (the "Benchmark") for performance comparison. The Benchmark is not representative of the risk profile of the Fund and the performance of the Fund is likely to be significantly different from that of the Benchmark because the Investment Manager has significant discretion to deviate from its securities and weighting.

The Fund may invest its net assets up to:

- 20% in High yield
- 10% in Emerging countries.

The average maturity of the bond portfolio excluding cash can be expected to range between 1 and 2.5 years but will not exceed 3 years at any time. As such, this Fund cannot be considered as a money market fund. The Fund's investments are expected to carry on average a higher risk than a typical money market investment, in particular in terms of credit risk (maturity profile, ratings profile, average spread duration) and due to the before mentioned use of derivative instruments.

The Fund's base currency is EUR.

The share currency risk in relation to the Fund's base currency is mainly hedged.

Any income received by the Fund is distributed (distribution share class).

Investors in the Fund can subscribe and redeem units on any business day in Luxembourg except days where the decisive markets are closed: United Kingdom (UK), Eurex.

Details of the closing days are available here: <https://www.ubp.com/en/our-offices/ubp-asset-management-europe-sa>.

The recommended holding period is minimum 1 years.

Risk and reward profile

This indicator represents the annual historical volatility of the Fund over a 1-year period.

Risk Category 2 reflects low potential gain and/or loss in the value of the portfolio.

Historical data such as that used to calculate the synthetic indicator cannot be considered as a reliable indication of the Fund's future risk profile.

The risk category associated with the Fund is not guaranteed and may change over time.

The lowest risk category does not mean "risk free".

Your initial investment is not guaranteed.

Significant risk(s) for the Fund not taken into account in this indicator include the following:

Counterparty risk: The use of over-the-counter derivatives exposes the Fund to a risk that the counterparty to the transactions will fully or partially fail to honour its contractual obligations. This may result in a financial loss for the Fund.

Credit risk: The Fund invests in bonds, cash or other money market instruments. There is a risk that the issuer may default. The likelihood of this happening will depend on the credit-worthiness of the issuer. The risk of default is usually greatest with bonds that are rated as sub-investment grade.

ESG and Sustainability risk: It may result in a material negative impact on the value of an investment and performance of the Fund. Assessment of sustainability risks is complex and requires subjective judgments, which may be based on data which is difficult to obtain and/or incomplete, estimated, out of date or otherwise materially inaccurate. All or part of said data may come/originate from third parties.

Liquidity risk: Liquidity risk exists when particular investments are difficult to purchase or sell. This can reduce the Fund's returns because the Fund may be unable to trade at advantageous times or prices.

Full details of risks are disclosed in the chapter "Risk Factors" in the prospectus.
