March 2024 Factsheet

This document is marketing material. Unless otherwise stated all data as at 31/03/2024.
Investors should read the Key Investor Information Document and Prospectus prior to investing.

FUND OVERVIEW

The Fund's investment objective is capital appreciation. In addition, the Fund has Sustainable Investment as its objective as per Article 9 of the SFDR by investing in companies that contribute positively to the environment.

The Fund will seek to achieve its investment objective by investing in a portfolio of equity and equity-related securities of companies that contribute positively to the environment and constitute Sustainable Investments by providing products and services that serve to aid in the adaptation towards or mitigation of global environmental challenges.

The Fund will focus on investing in equities and equity-related securities of companies with exposure to the following Environmental Themes that are defined in the Investment Policy of the Supplement: Biodiversity Protection, Circular Economy, Energy Transition, Sustainable Finance, Resource Efficiency and Sustainable Cities.

At least 70% of the Fund's holdings will be subject to coverage by the MSCI ESG Ratings, which is an agency rating designed to measure a company's resilience to long-term material ESG risks. Each of the Fund's holdings covered by the MSCI ESG Ratings will have a minimum MSCI ESG Rating of BB. Furthermore, the Fund's aggregate MSCI ESG Rating, calculated via the MSCI ESG Ratings methodology, will be at least BBB.

The Fund will take a diversified investment approach with the primary focus of investing in a globally diversified portfolio of equities of companies that contribute positively to the environment with exposure to the Environmental Themes. The Fund will not otherwise be restricted to any particular industry or sector.

The Fund may invest up to 100% of its NAV in developed markets and up to 50% of its NAV in emerging markets worldwide, including up to 25% in China A-Shares. The Fund may invest up to 10% of its NAV in frontier markets, being the markets of countries that are in the process of developing into emerging markets countries.

FUND OPPORTUNITIES

The fund invests in global equities that aim to make a positive contribution to the environment in six science-based environmental themes: energy transition, sustainable cities, biodiversity protection, resource efficiency, circular economy, and sustainable finance.

RISK FACTORS

A significant portion of the Fund's assets may be invested in emerging market assets. Emerging markets generally carry greater political, legal, counterparty and operational risk. In exceptional circumstances the Fund may encounter difficulties when buying and selling these investments. The application of ESG and sustainability criteria in the investment process may result in the exclusion of securities within the Fund's benchmark or universe of potential investments. The interpretation of ESG and sustainability criteria is subjective, meaning that the Fund may invest in companies which similar funds do not (and thus perform differently) and which do not align with the personal views of any individual investor.
