Fidelity Sustainable Global Corporate Bond Paris-Aligned Multifactor UCITS ETF

a sub-fund of Fidelity ICAV II

Fidelity Sustainable Global Corporate Bond Paris-Aligned Multifactor UCITS ETF EUR Hedged Acc

(ISIN:IE0006QCIHM0)

This fund is managed by FIL Investment Management (Luxembourg) S.A.

Objectives and Investment Policy

Objective: The fund aims to align with the Paris Agreement long-term global warming objectives by restricting the carbon emission exposure of its portfolio and to achieve income and capital growth.

Investment Policy: The fund invests in a portfolio primarily made up of high-yielding, sub-investment grade corporate debt securities of issuers globally.

The fund is aligned with the Paris Agreement's climate targets on greenhouse gas emission reduction.

The fund may use derivatives for efficient portfolio management and currency hedging purposes.

Investment Process: The fund is actively managed and references the Solactive Paris Aligned Global Corporate High Yield Index (the "Benchmark") as part of its investment process. The reduction of carbon emission objective of the fund will be aligned with the Benchmark.

The fund uses a combination of quantitative, fundamental and sustainability research to select securities which are: (a) weighted with a view to maximising portfolio return relative to the Benchmark; (b) aligned with the carbon emission performance of the Benchmark; and (c) sustainable investments.

In addition, the fund adheres to the Fidelity Sustainable Family of Funds standards. For more information, see "Sustainable Investing Policy and ESG Integration" and the Sustainability Annex sections of the Prospectus.

Benchmark: Solactive Paris Aligned Global Corporate High Yield Index, an index that takes into account ESG characteristics. Used for: alignment of reduction of carbon emission objective of the fund.

The Benchmark tracks the performance of high yield, sub-investment grade corporate debt securities publicly issued globally while at the same time aiming to align with the Paris Agreement's climate targets on greenhouse gas emission reduction. As a result of complying with these targets and the minimum technical requirements for EU Paris-aligned benchmarks, the Benchmark will be labelled as an EU Paris Aligned Benchmark.

In addition, the Benchmark excludes issuers based on their involvement in activities with significant externalities (tobacco, fossil fuels, controversial weapons etc.), breaches of international norms and with a significant negative impact on certain sustainable development goals.

The governance practices of issuers are assessed as part of the Benchmark construction process with the exclusion of companies with verified failure to respect established norms.

Further details regarding the Benchmark are available on the index provider's website at www.solactive.com/indices.

Base Currency: EUR.

Distribution: As this is a non-distributing share class, dividends are re-invested.

Risk and Reward Profile

Historical data may not be a reliable indication for the future.

The risk category shown is not guaranteed and may change over time.

The lowest category does not mean a "risk free" investment.

The risk and reward profile is classified by the level of historical fluctuation of the Net Asset Values of the share class, and within this classification, categories 1-2 indicate a low level of historical fluctuations, 3-5 a medium level and 6-7 a high level.

The value of your investment may fall as well as rise and you may get back less than you originally invested.

The fund may invest in instruments denominated in currencies other than the fund base currency. Changes in currency exchange rates can therefore affect the value of your investment.

This Fund is categorised in risk class 4 because, in accordance with the investment policy, the value of the investments may fluctuate moderately. Consequently, both the expected return and the potential risk of loss may be average.

Additional risks: Currency, hedging, credit.
