Benjamin LE ROUX

INVESTMENT POLICY

The objective is to achieve a performance of more than 2.50% annualized net of fees as of June 30, 2022 over an investment horizon of 5 years, through exposure to the market for bonds with maturities close to that date. This objective is based on the assumption that the Fund's units will be held throughout the recommended investment period and on the market assumptions made by the Management Company. The Fund may invest in bonds and other monetary debt securities issued by private or public and similar issuers, to which the net assets will be permanently exposed between 0% and 100%. Investments will take into account environmental, social and governance criteria.

FUND MANAGERS COMMENT

March was marked by a solid performance from bond asset classes, with spreads tightening and yields falling slightly. Credit spreads tightened across all segments and sectors, ranging from -9bp for IG credit to -70bp for AT1 bonds, with the exception of HY corporate credit, which widened slightly over the month (+4bp). Macroeconomic figures and central bank meetings also reassured the market about future rate movements: the Fed, the ECB and the BoE all talked about an easing cycle that could begin in June, and the Swiss National Bank cut its key rate by -0,25%. Interest rates fell slightly, with the Eurozone outperforming. The German 10-year yield fell by 11bp to 2,30%, while the US 10-year yield fell by only 5bp to 4,20%. The rebound in Brent crude oil of almost 8% over the month, which went unnoticed, had very little impact on inflation expectations, which remained broadly stable on both sides of the Atlantic. Initial concerns about German banks' exposure to commercial real estate quickly dissipated after the publication of their results.

The IG primary market remained active, with €69 billion issued despite a high level of activity in February. At about €40 billion, corporate supply continued to outstrip last year's level (+25% year-on-year). On the whole, this primary market supply was well absorbed, despite limited or even negative premiums in some cases, driven by inflows into credit funds.

The bond portfolio's structure changed marginally as benchmark rates eased and credit spreads tightened.

As a reminder, the subscription period ended on December 29th, 2023.

CONTACTS AND ADDITIONAL INFORMATION

Glossary :

Alpha represents the return of a portfolio that is attributable to the manager's investment decisions.
Beta measures a fund's sensitivity to movements in the overall market.
Information ratio represents the value added by the manager (excess return) divided by the tracking error.
Sharpe ratio measures return in excess of the risk free rate for every unit of risk taken.
Tracking error measures the volatility of the difference between a portfolio's performance and the benchmark.
Volatility is a measure of the fund's returns in relation to its historic average.
Yield to Maturity indicates the rate of return generated if a security is held to its maturity date.
Coupon Yield is the annual coupon value divided by the price of the bond.
Average Credit Spread is the credit spread of a bond over LIBOR, taking into account the value of the embedded option.

Average Rating is the weighted average credit rating of bonds held by the Fund.
Modified Duration is the percentage change in the value of a bond resulting from a 1% interest rate change.
Average Maturity is the average time to maturity of all bonds held by the Fund.
Spread Duration is the sensitivity of a bond price to a change in spreads.
Yield is the internal rate of return of a bond if held to maturity, but not accounting for conversion features of a convertible bond.
Delta represents the sensitivity of convertible bonds held by the Fund to a change in the underlying security price.
