Investors should read the Key Investor Information Document and Prospectus prior to investing.

FUND OVERVIEW

The investment objective of the Fund is to provide a stable income stream while maintaining prospects of capital appreciation.

The Fund may invest up to 100% of NAV in fixed or floating rate debt securities, specifically bonds, emerging market bonds, convertible bonds, warrant bonds, inflation-linked bonds, Rule 144A and Regulation S securities (each up to 60% of NAV), hybrid bonds (specifically perpetual bonds and contingent convertible securities ("CoCos")), Payment-in-Kind (PIK) bonds and Mortgage-Backed Securities ("MBS") and Asset-Backed Securities ("ABS") (MBS and ABS up to 10% of NAV in aggregate), issued or guaranteed by corporate, financial and/or government/supranational issuers worldwide and which are Investment Grade, below Investment Grade or unrated (up to 20% of NAV).

The Fund may invest up to 100% of NAV in equities, equity rights and equity-related securities (including, common shares, preferred shares, Depositary Receipts, rights issues, listed closed-ended REITs (up to 10% of NAV), convertible stock, equity warrants, stock options and IPO equities (up to 5% of NAV).

The Fund may invest up to 15% of NAV in each of the following: preferred shares, rights issues, convertible stock, equity warrants and stock options; up to 20% of NAV in hybrid bonds subject to a limit of 15% of NAV for CoCos; up to 10% of NAV in convertible bonds (excluding CoCos) and warrant bonds in aggregate; up to 20% of NAV in debt securities issued by supranational issuers; up to 10% of NAV in CIS.

The Fund may hold cash (also not in Base Currency) or ancillary liquid assets up to 49% of NAV and may invest up to 100% of NAV in developed markets, up to 40% of NAV in emerging markets, and/or in assets denominated in currencies of emerging market countries and up to 10% of NAV in frontier markets. The Fund may invest up to 20% of NAV in Chinese securities and does not intend to concentrate on any particular industries, sector or region.

The Fund will obtain long exposures (up to 100% of NAV) for capital appreciation and short positions (up to 100% of NAV) only synthetically for hedging and EPM purposes.

FUND OPPORTUNITIES

This actively managed, long-only, multi-asset fund invests globally in bonds and equities. Its focus on income leads to a bond exposure that is tilted towards corporate bonds, typically high-yield and emerging market bonds. Investments in equities provide an additional income stream, as well as capital gains.

The fund leverages Julius Baer's well-established capabilities across equity and fixed income strategies. It is built around the best equity and bond ideas, ending in a conviction portfolio of 140 to 220 single positions.

RISK FACTORS

There is a risk that issuers of debt securities held by the Fund may not be able to repay the investment or pay the interest due on it, leading to losses for the Fund. Debt securities values are affected by the market's view of the above risk, and by changes in interest rates and inflation. Changes in interest rates may negatively affect the value of the Fund. Typically as interest rates rise, debt securities values fall. The value of the Fund and any income from it can fall or rise because of movements in stockmarkets, currencies and interest rates, each of which can move irrationally and be affected unpredictably by diverse factors, including political and economic events. The Fund can invest in other currencies. Changes in exchange rates will therefore affect the value of the investment. The Fund may suffer losses if the parties that it trades with cannot meet their financial obligations. A significant portion of the Fund's assets may be invested in emerging market assets. Emerging markets generally carry greater political, legal, counterparty and operational risk. In exceptional circumstances the Fund may encounter difficulties when buying and selling these investments. The fund invests in equities and equity related securities. These are sensitive to variations in the stock markets which can be volatile and change substantially in short periods of time. Convertible securities are investments that can be changed into another form upon certain triggers. As such, they can exhibit credit, equity and fixed interest risk. Contingent convertible securities (CoCos) are similar to convertible securities but have additional triggers which mean that they are more vulnerable to losses and volatile price movements and hence become less liquid.
