

# abrdn Emerging Markets Corporate Bond

a sub-fund of Premium Selection UCITS ICAV

Class: 1h acc EUR, ISIN IE000D2B38C6

March 2024 Factsheet

This document is marketing material. Unless otherwise stated all data as at 31/03/2024.

Investors should read the Key Investor Information Document and Prospectus prior to investing.

## FUND OVERVIEW

The investment objective of the Fund is to achieve a combination of income and growth by investing in debt securities.

The Fund will invest at least 67% of NAV in fixed or floating rate (up to 20% of NAV) debt securities and debt-related securities issued by corporate issuers (including government-owned corporate issuers) with their registered office or principal place of business and/or which carry out the preponderance of their business activities in an emerging market, and/or by holding companies that have the preponderance of their assets invested in corporations with their registered office in an emerging market and/or by holding companies that carry out a preponderance of their business activities in an emerging market.

The Fund may invest up to 100% of NAV in debt securities and debt-related securities, specifically bonds, emerging market bonds, high yield bonds, convertible bonds, green bonds, social bonds, sustainability bonds, sustainability-linked bonds, hybrid bonds (specifically perpetual bonds and CoCos) (up to 10% of NAV) and distressed/defaulted debt (up to 5% of NAV). Issuers will be predominantly Emerging Markets Corporate Issuers, but these securities will be issued or guaranteed by corporate, financial and/or government/supranational issuers (up to 33% of NAV) worldwide and will have a rating of at least BBB- by S&P/ Baa3 by Moody's/ BBB- by Fitch or will be considered equivalent by the Investment Manager ("Investment Grade") or will be below Investment Grade or unrated (up to 10% of NAV). The Fund may invest up to 33% of NAV in developed markets and up to 20% of NAV in Chinese securities. The Fund may also invest in CIS (up to 10% of NAV) and hold cash and ancillary liquid assets (up to 10% of NAV) and may use investment techniques and FDIs for EPM and/or hedging purposes.

Investment in corporate bonds will follow the Investment Manager's active management approach of security selection, combining ESG considerations into portfolio construction decisions. In addition, the Investment Manager's proprietary ESG Score is used to exclude those companies exposed to the highest ESG risks. A set of company exclusions related to UN Global Compact, Controversial Weapons, Tobacco Manufacturing and Thermal Coal are applied. The Fund will have a minimum proportion of 15% of sustainable investments and a lower weighted carbon footprint compared to the Benchmark and is subject to Article 8 of the Sustainable Finance Disclosure Regulation.

## FUND OPPORTUNITIES

This actively managed emerging market (EM) corporate bond fund invests in hard currency bonds issued by EM corporates (and quasi-sovereigns) of any credit quality and maturity. It aims to outperform the broad EM corporate bond market with a strategy that focusses on strong fundamental bottom-up research. Duration will usually be relatively close to that of the benchmark.

## RISK FACTORS

There is a risk that issuers of debt securities held by the Fund may not be able to repay the investment or pay the interest due on it, leading to losses for the Fund. Debt securities values are affected by the market's view of the above risk, and by changes in interest rates and inflation. Changes in interest rates may negatively affect the value of the Fund. Typically as interest rates rise, debt securities values fall.

The Fund can invest in other currencies. Changes in exchange rates will therefore affect the value of the investment.

A significant portion of the Fund's assets may be invested in emerging market assets. Emerging markets generally carry greater political, legal, counterparty and operational risk. In exceptional circumstances the Fund may encounter difficulties when buying and selling these investments.

The fund may invest in lower rated or unrated bonds of similar quality, which carry a higher degree of risk than higher rated bonds.

Convertible securities are investments that can be changed into another form upon certain triggers. As such, they can exhibit credit, equity and fixed interest risk. Contingent convertible securities (CoCos) are similar to convertible securities but have additional triggers which mean that they are more vulnerable to losses and volatile price movements and hence become less liquid.
