Investors should read the Key Investor Information Document and Prospectus prior to investing.

FUND OVERVIEW

The investment objective of the Fund is to achieve long-term capital growth. The Fund will invest directly or indirectly up to 100% of its NAV in a diversified portfolio of equities and equity-related securities of companies, which are either listed, incorporated, domiciled, or derive 50% or more of their total revenue or profits from goods that are produced or sold, investments made, or services performed in Japan. These securities include, but are not limited to, common stock, rights and warrants, closed-ended units in investment companies (including REITs), units comprised of any of the foregoing securities and participations in Initial Public Offerings (IPOs), secondary offerings of listed securities (i.e. new or closely held shares listed on a Recognised Market and eligible assets for a UCITS sold by a company that has already made an IPO) and private placements of listed securities (i.e. transferable securities listed on a Recognised Market and eligible assets for a UCITS which shall include IPOs available to institutional investors prior to such issuances becoming widely available). Secondary offerings and private placements of listed securities may include issuances where the securities are sub-underwritten, issued or lead-managed by companies that are affiliated with the Investment Manager, subject to a maximum of 10% of the Fund's NAV. The Fund may have exposure of up to 5% of NAV in closed-ended investment companies including in REITs. The Fund may have an exposure of up to 10% of its NAV in rights and warrants in aggregate. The Fund may also invest in CIS (up to 10% of NAV) and may use investment techniques and FDIs for EPM and/or hedging purposes. The Fund may also hold cash (including in currencies other than the Base Currency) or ancillary liquid assets. The amount of cash and /or ancillary liquid assets that the Fund will hold will vary, however it is possible that up to 100% of the NAV of the Fund may be held in such cash, assets or securities at any time (e.g. for defensive purposes).

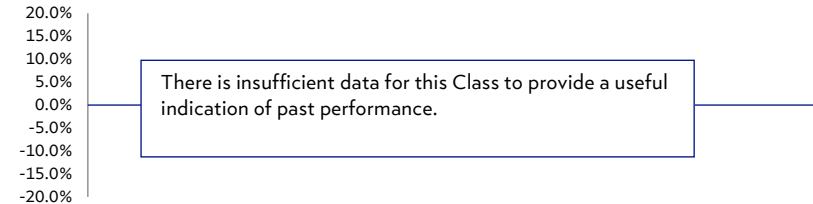

FUND OPPORTUNITIES

This actively managed fund invests in core Japanese large-cap companies that are priced at a discount to their underlying business value.

RISK FACTORS

The value of the Fund and any income from it can fall or rise because of movements in stockmarkets, currencies and interest rates, each of which can move irrationally and be affected unpredictably by diverse factors, including political and economic events. Investment risk within the Fund is concentrated in specific sectors, countries, currencies or companies. This means the Fund is more sensitive to any localised economic, market, political or regulatory events. The Fund may invest in financial derivative instruments which can result in greater fluctuations of the Fund's value and may cause the Fund to lose as much as or more than the amount invested. The fund invests in equities and equity related securities. These are sensitive to variations in the stock markets which can be volatile and change substantially in short periods of time.
