For further information, please see the "Investment Objective" and "Investment Policy" sections of the Fund's Supplement.

RISK AND REWARD PROFILE

The synthetic risk reward indicator (the SRRI) rating shows what risk and reward characteristics the Fund has, based on the Fund's historical performance over the last 5 years. Where a 5-year performance history is not available, the history has been simulated on the basis of representative data.

Lower Risk ← Higher Risk
Typically Lower Rewards Typically Higher Rewards

1	2	3	4	5	6	7
---	---	---	---	---	---	---

On a scale of 1 (less risky) to 7 (more risky), this Share Class has a rating of 5 due to its past performance (or representative data) and the nature of its investments which include the risks listed below. These factors may impact the value of the Fund's investments or expose the Fund to losses.

Risk is taken in order to make a higher potential return; the more risk a fund takes, the higher the potential return but the greater the risk of loss. This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund. The risk category shown is not guaranteed and may change over time. The lowest category does not mean risk free.

The Fund does not offer the investor a guaranteed return. Nor does it guarantee the fixed repayment of the money invested in the Fund by the investor.

The indicator takes account of those risks which are entailed in the Fund's net asset value. These mainly involve fluctuations in the value of investments. In addition to the risks expressed through the indicator, the Fund's net asset value may also be significantly affected by the following factors:

Debt securities: There is a risk that issuers of debt securities held by the Fund may not be able to repay the investment or pay the interest due on it,

leading to losses for the Fund. Debt securities values are affected by the market's view of the above risk, and by changes in interest rates and inflation. Changes in interest rates may negatively affect the value of the Fund. Typically as interest rates rise, debt securities values fall.

Market Volatility: The value of the Fund and any income from it can fall or rise because of movements in stockmarkets, currencies and interest rates, each of which can move irrationally and be affected unpredictably by diverse factors, including political and economic events.

Currency: The Fund can invest in other currencies. Changes in exchange rates will therefore affect the value of the investment.

Counterparties: The Fund may suffer losses if the parties that it trades with cannot meet their financial obligations.

Emerging Markets: A significant portion of the Fund's assets may be invested in emerging market assets. Emerging markets generally carry greater political, legal, counterparty and operational risk. In exceptional circumstances the Fund may encounter difficulties when buying and selling these investments.

Equities: The fund invests in equities and equity related securities. These are sensitive to variations in the stock markets which can be volatile and change substantially in short periods of time.

Convertibles: Convertible securities are investments that can be changed into another form upon certain triggers. As such, they can exhibit credit, equity and fixed interest risk. Contingent convertible securities (CoCos) are similar to convertible securities but have additional triggers which mean that they are more vulnerable to losses and volatile price movements and hence become less liquid.

For further information on risks, please refer to the Risk Factors section in the Funds prospectus and supplement.

CHARGES

The charges are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	5.00%
Exit charge	3.00%
This is the maximum that might be taken of your money before it is invested or before proceeds of your investments are paid out.	
Charges taken from the fund over a year	
Ongoing charges	0.88%
Charges taken from the fund under certain specific conditions	
Performance fee	0.00%

The entry and exit charges shown are the maximum you will need to pay. In some cases you might pay less - you can find out the actual entry and exit charges from your financial adviser or distributor.

The ongoing charges figure shown here is an estimate of the charges based on a projection of the expenses of the Fund for the first twelve months of operation of the Fund. This figure may vary from year to year. It excludes portfolio trade-related costs, except costs paid to the custodian and any entry/exit charge paid by the fund when buying or selling units/shares in another collective investment undertaking (if any).

A switching charge of up to a maximum of 1.00% of the NAV may be applied.

You will find more details about the calculation of the charges by checking the respective part of the prospectus and of the relevant supplement.

PAST PERFORMANCE

The Fund does not yet have performance data for one complete year. Therefore a useful indication of past performance cannot be provided. The Class has not yet launched. It is intended to launch the Class in March 2024. The Fund was launched in May 2023.
