

## Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

### Emerging Markets

(LU0051440435)

### a Sub-Fund of EDM International

The Fund is managed by MDO Management Company S.A.

#### OBJECTIVES AND INVESTMENT POLICY

##### Investment Objective

The Sub-Fund seeks to achieve capital appreciation by investing principally securities of developing countries, including from the Pacific Basin, Latin America, Emerging Europe and Africa.

##### Investment Policy

For this, the Sub-Fund may principally invest:

- at least 66% of its net assets in equity securities, including common stocks;
- at least 90% of its net assets in convertible bonds, warrants and common stocks on transferable securities.

The Sub-Fund also may invest in clone notes. The Sub-Fund is managed with the following principles: predominantly mid & large caps, growth style, pure stock picking, investment in firms

that could benefit from the development of this part of the world. The portfolio will be concentrated, which means it will contain less than 70 stocks.

It may hold ancillary liquid assets or cash equivalent transferable debt securities and money market instruments with a residual maturity of less than 12 months.

The Sub-Fund may, in accordance with its investment restrictions, invest in Financial derivative products for hedging purpose and/or efficient portfolio management.

##### Income

All income received by the Share Class will be reinvested.

##### Subscription and Redemption

Investors may buy, switch and redeem shares of the Sub-Fund on a daily basis.

#### RISK AND REWARD PROFILE

##### Risk Disclaimer

The risk and reward indicator illustrates where the Sub-Fund is positioned in terms of its possible risks relative to its potential rewards. The higher the Sub-Fund's position on this scale, the greater the possible reward, but also the greater risk of losing money. This risk indicator is calculated using historical data, which cannot be used as a prediction for the future. Therefore the risk classification may change over time. Even if the Sub-Fund is in the lowest risk class you can lose money, as no investments are entirely risk free.

##### Why is this Sub-Fund in this category?

The Sub-Fund is subject to a high level of risk being linked to typical risks of securities markets, such as the macro-economic trends at global level, the level of inflation and interest rates, the evolution of corporate income, the issuers' stability and currency fluctuations. At this time, the level of the risk and reward profile is equal to 6.

**Not all risks affecting the Sub-Fund are adequately captured by the synthetic risk indicator. The following risks may affect the Sub-Fund:**

**Credit risk:** which are linked to the debt securities the Sub-Fund may invest in;

**Liquidity risk:** which may occur when investments are made in financial instruments that could have a lower level of liquidity in some circumstances for example in the case of a market crash or default of issuers; due to massive redemptions of shareholders resulting in a potential decrease of the value of certain of the Sub-Fund's investments;

**Counterparty risk:** which may occur due to the exposure the Sub-Fund might have through contracts with third parties;

**Operational risk:** which may occur due to technical issues for example natural disasters, misunderstandings and fraud;

**Emerging markets risk:** In emerging markets the legal, judicial and regulatory frameworks are still developing so there could be, for local market participants and their counterparties, a high degree of uncertainty.

**Concentration risk:** the Sub-Fund may also be exposed to the concentration risk.

For full details of the risks the Sub-Fund may be exposed to, please refer to the Prospectus of the fund.
