

CANDRIAM BONDS EURO GOVERNMENT

Quarterly report at 30|06|2021

*Sub-fund of the Luxembourg-law SICAV
Candriam Bonds
Class: Classic
Unit type: Acc(EUR) & Dis*

The risk level (3) indicated here reflects the volatility of the fund's past performance, plus the volatility of its benchmark where applicable. Volatility indicates how much the fund's value can fluctuate higher or lower.

- The indicated category may vary over time.
- The historical data give no indication of a future risk profile.
- The lowest category does not mean "risk-free".
- There is no guarantee or mechanism to protect the capital.

A description of risks not included in the SRRI scale is provided on page 4.

Morningstar is an independent investment analysis provider. A Morningstar rating is a quantitative assessment of a fund's past performance, factoring in risk and costs incurred. It does not include qualitative criteria and its calculation is based on a mathematical formula. Funds are classified by category and compared to similar funds, based on their score, and they receive a rating of one to five stars. The top 10% in each category receive five stars, the next 22.5% four stars, the next 35% three stars, the next 22.5% two stars and the bottom 10% one star. The rating is determined monthly, based on past performances over 3, 5 and 10 years, and does not take the future into account.

INVESTMENT STRATEGY

Candriam Bonds Euro Government, a sub-fund of the Candriam Bonds sicav, invests principally in euro-denominated bonds and related securities at fixed or variable rates, indexed, subordinated or backed by assets. The selected bonds are issued by governments, international and supranational entities, and public sector entities from the Euro zone. The fund carries out an active currency hedging policy versus the EUR, and may use currency, volatility, interest rate or credit derivatives for efficient portfolio management purposes (hedge, exposure, arbitrage).

Benchmark :

The fund is managed as **active** and the investment process involves reference to a benchmark (the index).

ANNUAL RETURN OF THE 10 LAST YEARS IN EUR (%)*

RISK PROFILE OF THE SUB-FUND

To better understand the fund's risk profile, investors are asked to consider, in addition to their risk category, the risks that are inherent to the investment strategy as described in the prospectus. Investors should be aware that the fund's value may decrease, particularly due to its exposure to the following main risks:

- Interest rate risk, i.e., fluctuations in interest rates.
- Credit risk: default or downgrade of the credit rating of a fund issuer or counterparty. Because higher yields are sought via partial investment in high yield bonds, the fund will invest in issuers having a higher probability of default.
- Liquidity risk: some market conditions can prevent the sale of fund positions at valuation prices. This is all the truer as high yield bonds are generally less liquid than high grade bonds.
- Derivatives and related risks, such as their sophistication, higher volatility and possible use of leverage.
- Investors may not receive back the full amount invested.

INFORMATION RELATING TO BELGIUM

Based on the tax legislation currently in force, which may be subject to change, the tax regime applied to private investors subject to Belgian personal income and revenues taxes is as follows:

- Withholding tax:
 - for distribution shares: 30% withholding tax levied on dividends.
 - for capitalisation and distribution shares, capital gains are subject to 30% withholding tax levied on funds investing over 10% in bonds and other debt securities.
 - TOB tax on stock exchange transactions: 1.32 % (max. EUR 4,000) on capitalisation share redemptions, or the conversion of capitalisation shares into shares of the same or another sub-fund
- For further information relative to withholding tax and TOB tax on stock exchange transactions, please contact your financial advisor. Investors who are not subject to Belgian personal tax must seek advice regarding their applicable tax regime.

or via the website <http://contact.candriam.com>
Client dissatisfied with the resolution of claims via the above means can contact the Ombudsman at the following address:
OMBUDSFIN,
Financial conflicts Ombudsman,
Avenue du Roi Albert II, 8 1000, Brussels.
Tel. +32 2 545 77 70;
Fax +32 2 545 77 79;
email: ombudsman@ombudsfm.be;
website: www.ombudsfm.be.

FURTHER INFORMATION PROVIDED BY THE DISTRIBUTOR

The distributor will provide any further information required enabling investors to make informed investment decisions, notably regarding the fees paid to, or received by, the distributor in the context of the transaction concerned, and with regard to the suitability of the fund with investors' risk profiles.

SWING PRICE

On valuation days when the difference between total subscription and redemption amounts within a sub-fund (i.e. net transactions) exceeds a threshold previously set by the Board of Directors, the sub-fund has the right to:

- establish net asset value by adding to total assets (in the case of net subscriptions) or deducting from total assets (in the case of net redemptions) a flat-rate percentage for commissions corresponding to market practices reflecting fees and/or liquidity conditions during the purchase or sale of securities;
- value security portfolios based on bid or ask prices;
- establish net asset value using spreads which are representative of the market concerned;
- **the swing price may not exceed 2% of net asset value, except in exceptional circumstances, including a sharp decline in liquidity, which would then be detailed for the sub-fund concerned in the interim or annual fund report.**

IMPORTANT INFORMATION

This document is provided for information purposes only, it does not constitute an offer to buy or sell financial instruments, nor does it represent an investment recommendation or confirm any kind of transaction, except where expressly agreed. Although Candriam selects carefully the data and sources within this document, errors or omissions cannot be excluded a priori. References to particular industries, sectors or companies are for general information and are not necessarily indicative of a fund's holding at any one time. Negative weightings may result from specific circumstances (including timing differences between trade and settlement dates of securities purchased by the funds) and/or the use of certain financial instruments, including derivatives, which may be used to gain or reduce market exposure and/or risk management. Allocations are subject to change. Total are not always equals to 100% due to derivatives, cash or rounding. The investor is invited to review the description of significant risks that are set forth in the fund's prospectus and the Key Investor Document. The value of investment may decline due in particular to the fund's exposure to such main risks are not necessarily adequately taken into account into the SRRI.

Candriam cannot be held liable for any direct or indirect losses as a result of the use of this document. The intellectual property rights of Candriam must be respected all times, contents of this document may not be reproduced without prior written approval.

Warning: Past performances of a given financial instrument or index or an investment service, or simulations of past performances, or forecasts of future performances are not reliable indicators of future performances. Gross performances may be impacted by commissions, fees and other expenses. Performances expressed in a currency other than that of the investor's country of residence are subject to exchange rate fluctuations, with a negative or positive impact on gains. If the present document refers to a specific tax treatment, such information depends on the individual situation of each investor and may change.

The present document does not constitute investment research as defined by Article 36, paragraph 1 of the Commission delegated regulation (EU) 2017/565. Candriam stresses that this information has not been prepared in compliance with the legal provisions

promoting independent investment research, and that it is not subject to any restriction prohibiting the execution of transactions prior to the dissemination of investment research.

Candriam consistently recommends investors to consult via our website www.candriam.com the key information document, prospectus, and all other relevant information prior to investing in one of our funds. These documents are available either in English or in local languages for each country where the fund's marketing is approved.

GLOSSARY

BETA

Beta measures the sensitivity of fund returns to changes in returns of its reference index. A beta greater than 1 indicates the fund is more volatile, thus more risky than the reference index.

VOLATILITY*

The Volatility is the statistical measure of dispersion of returns for a fund around the mean. A higher volatility means that a fund's value can potentially be spread out over a larger range of values and makes the fund a riskier investment.

TRACKING ERROR*

The Tracking Error is a statistical measure of dispersion of the excess returns of the fund around the mean, making it the volatility of the difference between the fund's return and its reference index return. A higher tracking error indicates a higher deviation from the reference index.

* based on weekly data over 3 Years (1 year if too little history)

SHARPE RATIO*

The Sharpe Ratio measures the level of compensation an investment in the fund offered for the risk taken. It is calculated by subtracting the risk-free rate from the return of the fund and dividing that result by the volatility. The higher the Sharpe ratio the better, a negative ratio has no significance other than that the fund underperformed the risk-free rate.

YIELD TO WORST

The Yield To Worst (YTW) is the lowest potential yield that can be received on all fixed income instruments in a fund without the issuers actually defaulting. It represents the lowest of all yields computed at each call date for callable bonds. The YTW for the fund is calculated as the weighted average YTW of all underlying fixed income instruments.

MODIFIED DURATION TO WORST

The Modified Duration is a formula that expresses the measurable change in the value of a fixed income instrument in response to a change in interest rates. The Modified Duration to Worst is calculated taking into account the call date for callable bonds and the scenario that would provide the worst yield to the holders of fixed income instruments. The Modified Duration to Worst for the fund is calculated as the weighted average MDTW of all underlying fixed income instruments.
