## **INVESTMENT UNIVERSE**

The sub-fund invests mainly (without any sectoral restrictions whatsoever) in bonds and/or other debt securities (including perpetual bonds and/or structured products), at fixed or floating rates, denominated in any currency and issued by issuers (public and/or private) throughout the world. The majority of these securities (or, failing that, their issuers) must have a rating of at least BBB-/Baa3 ("investment grade") according to the S&P/Moody's rating agency scale. The sub-fund may use derivatives in order to take advantage of or hedge against market fluctuations, or for efficient portfolio management. The sub-fund is actively managed and no benchmark is used.

DPAM is signatory of the United Nations Principles for Responsible Investment (UN PRI). Please read the important information at the end of this document.

#### RISKS

The risk indicator assumes that you will hold the product for at least 4 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less.

Other important risks partly or completely unreflected in the risk indicator:

- If your currency as an investor is different from the subscription currency of this product, changes in currency exchange rates could reduce any investment gains or increase any investment losses.
- Unusual market conditions or unforeseeable events may magnify risks or trigger other risks such as counterparty, liquidity and operational risks (a full description of these risks is available in the prospectus).
- If you place a request to sell (redeem) shares at a time when this product has received many other sell requests, the processing of your order may be delayed, which could affect the price you receive for your shares.
- We refer to the prospectus and KID for more explanation and a complete overview of the risks.
