Investment objective

The objective is to outperform the compounded €STR, the representative index of the money-market rate in the Eurozone, after deducting ongoing charges, whilst incorporating ESG criteria into the Fund's security analysis and selection criteria. However, under certain market conditions, such as a very low €STR rate, the net asset value of your Fund may experience a structural decline and may have a negative effect on your Fund's performance, which could prejudice your Fund's capital preservation objective.

Benchmark index

The benchmark index is the compounded €STR.

The €STR (Euro Short Term Rate) represents the overnight euro money-market rate. It is calculated by the European Central Bank and represents the risk-free rate for the eurozone.

The compounded €STR also takes into account the impact of the reinvestment of interest using the OIS (Overnight Indexed Swap) method.

The administrator of the benchmark index is the ECB (European Central Bank). As a central bank, this administrator benefits from the exemption under Article 2.2 of the benchmark regulation and, as such, does not need to be registered in the ESMA register.

Investment strategy

1. Strategies used

The UCI qualifies as an Article 8 financial product under Regulation (EU) 2019/2088 on sustainabilityrelated disclosures in the financial services sector (the "Disclosure Regulation"). Information on environmental and social characteristics can be found in the appendix to this prospectus.

The principal adverse impacts of investment decisions (within the meaning of Regulation (EU) 2019/2088 on sustainability-related disclosures in the financial services sector (the "Disclosure Regulation")) are the negative, material or likely-to-be-material effects on sustainability factors that are caused or aggravated by or directly linked to investment decisions. Annex I of the Delegated Regulation supplementing the Disclosure Regulation lists the indicators of the principal adverse impacts.

The mandatory principal adverse impacts of Annex I of the Delegated Regulation are taken into account in the investment strategy through a combination of exclusions (normative and sector-based), integration of the ESG rating into the investment process, engagement and voting.

More detailed information on the principal adverse impacts can be found in the Management Company's Sustainable Finance Disclosure Statement available on its website: www.amundi.com.

The Fund is comprised of high-quality money market instruments and derivatives. It is in line with the principles of Socially Responsible Investment (SRI). To select stocks eligible for the Fund, the management team relies on a credit analysis combined with a non-financial analysis based on environmental, social and governance (ESG) criteria. The non-financial analysis process is used to assign an ESG rating ranging from A (best rating) to G (lowest rating).

Sequencing of the stages of the investment process

The investment process includes three successive stages:

- The first step is to monitor the investment universe in advance through a detailed analysis of the issuers. The internal process leads to a preliminary outline of the investment universe focusing on two main areas:
 - o A system, notably defining the list of authorised instruments and limits by issuer and instrument type;
 - o An eligible investment universe, notably comprising the issuers selected by the Management Company. This assessment is based on a specific appraisal performed by a credit analysis team working independently from the management, following an internal credit quality assessment procedure.
- The second stage involves integrating both financial constraints (regulatory ratios, internal credit assessment process) and non-financial constraints (ESG rating and exclusion) within these analyses.
- The third stage is the construction of the portfolio:
- a) Analysis of asset liquidity and liquidity management: this is ensured by using various interest rate instruments available on the markets. The Fund includes assets of varying maturities which are adjusted based on inflows and outflows to ensure its liquidity.
- b) Choice of a weighted average maturity: this reflects our forecasts on changes to the €STR and moneymarket yield curves. Euro fixed income and credit Managers establish together, during a monthly meeting attended by Amundi Asset Management's strategists, forecasts for changes in interest rates and the European Central Bank's monetary policy.
- c) Selection of issues and the diversification of securities (bonds, negotiable debt securities) from public and private issuers. This selection is made based on compliance with various parameters:
 - studies carried out by the credit analysis team on behalf of the fixed income management team or other market financial institutions. o the management team's assessment of the premium on the securities of this issuer to cover the credit and/or liquidity risk.
 - the more diversification a new issuer can bring to the portfolio, the more interest will be shown in its contribution. Diversification rules governing private issuers are systematically applied to investments according to securities' rating and maturity.
 - each security held in the portfolio is subject to prior agreement by the Risk Department (which is independent of the Management Company) which defines maximum amounts and maturities for each issuer.
 - moreover, the analysis and stock-picking of securities meet socially responsible investment (SRI) principles which include extra-financial ESG (Environmental, Social and Governance) criteria, in addition to the traditional financial criteria described above.

- d) Arbitrage: the Management Company systematically sources investment opportunities among money market instruments and bonds with yields in line with or outperforming the €STR depending on the type of instrument and the security's maturity. The managers rely on a proactive trading team to invest in an issuer or a security with selected counterparties.
- e) Management of the portfolio's average ESG rating by optimising the issuers' ESG rating/return profile. This internal process leads to a preliminary outline of the investment universe focusing on two main areas:
- A system, notably defining the list of authorised instruments and limits by issuer and instrument type;
- An eligible investment universe, notably comprising the issuers selected by the Management Company. This assessment is based on a specific appraisal performed by a credit analysis team working independently from the management, following an internal credit quality assessment procedure.

The Fund's investment strategy is based on the choice of negotiable debt security or bond issuers, which ensures the most regular increase in NAV possible. To this end, the management team selects securities with a maturity of less than 397 days.

More particularly, the ceilings respected by this fund are as follows:

Weighted Average Maturity ⁽¹⁾ (WAM)	less than or equal to 60 days
Weighted Average Life ⁽²⁾ (WAL)	less than or equal to 120 months
1-day liquidity	more than 7.5% of net assets
7-day liquidity	more than 15 % of net assets
Maximum residual life of securities and instruments	Securities and instruments: 397 days
Credit worthiness of instruments	To evaluate the creditworthiness of securities, at the time of their acquisition, the Management Company may rely, although not exclusively, on investment-grade ratings from recognised rating agencies that it deems most appropriate; however, the Management Company strives to avoid any automatic dependence on such ratings throughout the securities' holding period.

1 WAM = it is used to measure the average term until the maturity of all assets held by the UCITS, weighted to reflect the relative weight of each instrument, and considering the maturity of an adjustable-rate security as the remaining period before the next money-market rate revision rather than the remaining term until the initial principal repayments on the instrument. In practice, the WAM is used to measure the sensitivity of a monetary fund to changes in money market interest rates. 2 WAL = this is the weighted average residual life of each asset held by the UCITS, i.e. the term left to run until the initial principal repayments on the security (without taking into account interest payments and reductions in the principle value). WAL is used to measure credit risk and liquidity risk.

Non-financial analysis

- 1) Types of ESG criteria
- Private issuers

The analysis of private issuers uses a framework of criteria based on regulations that have universal scope (Global Compact, International Labour Organization, Human Rights, ISO standards, etc.). This framework includes a set of generic criteria applicable to all issuers as well as criteria specific to each sector.

Among the generic criteria, we analyse in particular:

- Energy consumption and greenhouse gas emissions, the protection of biodiversity and water, for the environmental aspect.
- Human capital development, management of work and restructuring, health and safety, social dialogue, relations with clients and suppliers, local communities and respect for human rights, for the social aspect.
- Independence of the board, quality of audits and controls, remuneration policy, shareholders' rights, global ethics and ESG strategy, for the governance aspect.

Depending on the sector, additional assessments of specific criteria may be carried out with regard to environmental and social aspects. Examples include the production of renewable energy for energy suppliers, ecological vehicles and passenger safety for the automotive industry, or green finance and efforts made to promote greater access to financial services in the banking sector.

- Public issuers

The non-financial analysis of States aims to assess and compare the levels of integration of the three ESG criteria in institutional systems and public policies. It is based on around one hundred indicators, divided into 3 aspects: Compliance (e.g. ratification of international treaties), Action (public expenditure related to ESG policies) and Results (quantifiable and measurable).

In the context of socially responsible management (SRI management), the ESG analysis of the investment universe seeks to conduct a more comprehensive assessment of sector-related opportunities and risks specific to each issuer.

2) ESG approach

To reconcile the search for performance with the development of socially responsible practices, ESG criteria are considered according to a combination of approaches: normative and sector-based exclusions, Best-in-Class and engagement.

By seeking to select issuers with the best environmental, social and governance (ESG) practices, the Fund incorporates sustainability factors into its investment process by implementing socially responsible management (SRI management).

- 1. The Fund applies the Amundi exclusion policy, which includes the following rules:
- legal exclusions on controversial weaponry (anti-personnel mines, cluster bombs, chemical weapons, biological weapons and depleted uranium weapons, etc.);
- companies that seriously and repeatedly contravene one or more of the ten principles of the Global Compact*, without credible corrective action;
- Amundi's sector-based exclusions on Coal and Tobacco; (details of this policy are available in Amundi's Responsible Investment Policy available on www.amundi.fr).
- * United Nations Global Compact (UN Global Compact): The Global Compact calls on businesses to adopt, support and implement within their sphere of influence a set of core values in the areas of human rights, labour and environmental standards, and anti-corruption.
- 2. Using a best-in-class approach, the Fund seeks to give priority to issuers that are sector-leading in terms of ESG criteria, as identified by the Management Company's team of non-financial analysts.

The Fund also applies the following ESG integration rules:

- exclusion of issuers rated F and G at the time of purchase; if an issuer's rating is downgraded to F while it is already in the portfolio, the manager will seek to sell the security in question. However, in the interest of holders, holding the securities until maturity is authorised if they cannot be sold under good conditions;
- a so-called "rating upgrade" approach: the weighted average ESG rating of the portfolio must be higher than the weighted average ESG rating of the investment universe of the Fund after elimination of the worst 20% of issuers:
- at least 90% of the securities in the portfolio are ESG rated.

Limit of the approach adopted

The best-in-class approach does not in principle exclude any business sector. All economic sectors are therefore represented with this approach and the UCI may thus be exposed to certain controversial sectors. To limit the potential non-financial risks of these sectors, the UCI also applies the Amundi exclusion policy for coal and tobacco (details of this policy can be found in the Amundi Responsible Investment Policy available on the website at www.amundi.fr) as well as the Group's commitment policy.

- 3. Lastly, an active engagement policy promotes dialogue with issuers and supports them in the improvement of their socially responsible practices. Engagement activity takes place in four forms:
- Ongoing engagement with companies with the objective of meeting with companies to better understand the ESG issues they face and to encourage companies to increase their consideration of ESG issues and adopt good practice.
- Thematic engagement, which aims to better understand issues that are sometimes underestimated and to bring out good practices.
- Collaborative engagement, which also mobilises other investors in order to achieve a stronger impact and increase the receptivity and responsiveness of companies.
- Pre-GM voting and dialogue, to build deeper relationships with companies, to initiate their thinking on ESG issues and to contribute to the improvement of their practices.

Credit Analysis of issuers

'High quality' is defined according to an internal assessment process that considers various factors, in particular the instrument's credit quality, the instrument's asset class, its liquidity profile and, for structured financial instruments, operational risks and counterparty risks inherent to the investment's structure.

Internal credit quality assessment procedure

I) Description of the scope of the procedure

The Management Company has set up an internal credit quality assessment procedure for money market UCIs. Its purpose is to establish the principles and methodologies that will ensure that these UCIs invest in assets that have a positive evaluation with regard to credit quality.

The internal credit quality assessment procedure, which is conducted systematically and continuously for all Amundi Group money market management, establishes:

- the principles of prudence, suitability and relevance at all key stages affecting the investment cycle, and
- the analysis methodologies used both to determine the eligibility of credit for purchase by the money market UCI and to monitor any deterioration in the current credit investments in order to avoid keeping assets that are likely to default.

II) Description of parties involved in the procedure

The Amundi Group Risk Committee and the Credit Risk Committee that stems from it are responsible for defining the risk policy applicable to all Amundi Group entities (risks taken on behalf of third parties and on their own account). In this context, the Amundi Group Risk Committee has full jurisdiction for the following:

- defining Amundi's risk policy;
- determining the risk framework for each product or activity;
- approving the risk oversight for management strategies and investment processes;
- approving the methodologies for calculating risk indicators;
- approving credit limits;
- making decisions regarding the use of new financial instruments by the UCIs;
- reviewing the results of the controls that are performed;
- making the necessary decisions to resolve any anomalies detected.

The Group Risk Committee delegates the specific duties entrusted to it to several subcommittees.

The Credit Risk Committee therefore approves the limits per issuer for the UCIs overseen, and the sole-risk and counterparty limits for all UCIs in the Amundi Group. The decisions of the Credit Risk Committee are made by its Chair, based on discussions within the Committee, and are not subject to a vote.

The decisions of the Group Risk Committee and the Credit Risk Committee are enforced through the use of a maximum risk framework for each subsidiary of the Amundi Group, with the understanding that each subsidiary retains its full autonomy and independence to judge the appropriateness of these framework decisions, and can impose additional credit restrictions for money market UCIs, if deemed necessary by the heads and competent bodies defined by the governance of each subsidiary.

The Group Risk Committee and the Credit Risk Committee are chaired by the Deputy CEO in charge of the Business Support and Control Division, and in his or her absence, by the Chief Risk Officer. The other permanent members of the Group Risk Committee are the heads of the following business lines: Investment, Sales (Individual Clients, Institutional Clients), Operations, Services and Technology, and Control (Compliance, Audit and Risks, including the heads of the expertise, investment and operational Risk Divisions). The Credit Risk Committee also has permanent guests, these being the head of the credit risk analysis and risk oversight team and the team's analysts.

The Credit Risk Committee is convened every month, and if necessary, at any time on an ad hoc basis, and declares the terms of its approval.

III) Description of the methodology

At all key stages of the investment cycle, at the request of management, an independent credit analysis and credit management team linked to Amundi's Risk team implements the applicable methodologies:

- collection of information;
- analyses and assessments of credit quality, recommendation of the terms of investment (risk code, amount and maximum maturity limits) to the Credit Risk Committee for approval;

- monitoring of credit risks as approved by the Credit Risk Committee, including placing deteriorating credit on watch and monitoring alerts;
- management of cases exceeding the amount and/or duration limits. Information used for analysis must be reliable and come from multiple sources:
- primary sources: annual reports and publications on issuers' websites, presentation and meeting notes from one-on-ones, roadshows or net roadshows with issuers:
- market sources: verbal and/or written presentations by rating agencies and/or sell-side analyses, public information published by the media.

The criteria used for analysis are:

- quantitative: published operational and financial data, which is analysed not only when accounts are closed but also over time, in order to evaluate trends, and restated, if necessary, in order to estimate the most representative profitability, solvency and liquidity ratios possible;
- qualitative: financial access, operations, strategy, management, governance and reputation, which are evaluated in relation to their coherence, credibility or sustainability in the short and medium term.

Based on the methodologies set out in the procedure to be applied, analyses must focus on profitability, solvency and liquidity, using analytical methods specific to the types of issuers and business sectors concerned (Corporate, Financial, Public Administration, etc.), and in accordance with their asset classes/instruments (non-rated, securitisations, covered, subordinated, etc.). Ultimately, they must make it possible to assess the short- and medium-term visibility in terms of the viability of the issuer, both from an intrinsic point of view and within the context in which it operates.

At the end of the analysis, the assessment is represented by a risk code, and the credit management is represented by a set of limits with regard to amount and maximum maturity, which the credit analysis and management team recommends to the Credit Risk Committee.

The risk code represents the credit quality on a scale from 1 (solid) to 6 (low) in terms of a medium to long-term investment, with monitoring reports and alerts for actions on outstanding amounts in the event of downgrading. The minimum risk code level required for investment in a money market UCI is code 4. However, for very short-term investments (less than six months), credit at risk code 5 (which is at the upper end of the scale) may be exceptionally and selectively authorised.

The amount and maximum maturity limits are calculated taking into account the credit quality, issuer size and the percentage holding of the issuer's consolidated debt. In the event of an overrun, the procedure provided for this purpose is applied in order to remedy the situation:

- either by an immediate sale of excess outstanding amounts, reducing outstanding amounts to within the limits;
- or by a run-off of the outstanding amounts, for which the overrun is then monitored, if justified;
- or by an increase in the limit absorbing the overrun, if justified (in particular, depending on the credit quality and the percentage holding of the issuer's total debt).

These decisions are recorded in writing in accordance with Article 7 of the Delegated Regulation (EU) 2018/990.

Individual credit entered into the universe of eligible investments is reviewed at least once a year, and as many times as required by events and/or developments impacting the assessment to be carried out on credit quality.

IV) The framework for reviewing methodology

The credit management methodologies for money market UCIs are reviewed and approved by the Risk Committee and Credit Risk Committee at least once a year and as often as necessary, with a view to adapting them to the current portfolio and external conditions in accordance with the regulatory provisions governing money market UCIs.

2. Description of the assets used (excluding derivatives)

Money market instruments:

The portfolio includes:

up to 100% of the net assets

- government securities in the form of repurchase agreements or short-term securities.
- Treasury notes or short-term bonds issued by the States
- London CDs
- Floating Rate Notes (FRN) and bonds
- Euro Medium Term Notes (EMTNs)
- Euro Commercial Paper
- US Commercial Paper
- Short-term and medium-term negotiable securities
- Asset-Backed Commercial Paper

Holding of shares or units of other UCIs

The Fund may hold up to 10% of its assets in shares or units of the following short-term money market UCIs:

French or European UCITS

☑ French or European AIFs that comply with the criteria defined by the French Monetary and Financial Code

These UCIs may invest up to 10% of their assets in UCITS or AIFs. They may be managed by the Management Company or an affiliated company. The risk profile of these UCIs is compatible with that of the UCITS.

3. Derivatives used

Information about the counterparties of OTC derivative contracts:

Amundi AM relies on the expertise of Amundi Intermédiation in the context of providing services regarding the selection of counterparties.

Amundi Intermédiation provides Amundi AM with an indicative list of counterparties, the eligibility of which is approved beforehand by the Amundi (Group) Credit Risk Committee, concerning the aspects of counterparty risk

This list is then approved by Amundi AM at ad-hoc meetings of its "Broker Committees". The purpose of the Broker Committees is to:

- monitor volumes (share broking and net amounts for other products) by intermediary/counterparty, instrument type and market, where applicable;
- express their opinion on the quality of the service provided by the Amundi Intermédiation trading desk;
- out a review of the brokers and counterparties, and to draw up the list for the coming period. Amundi AM may decide to limit the list or ask to extend it. If Amundi AM proposes to extend the list of counterparties, at a committee meeting or subsequently, the Amundi Credit Risk Committee must analyse and approve the list once again.

The Amundi AM Broker Committees include Management Directors or their representatives, representatives of the Amundi Intermédiation trading desk, an operations manager, a Risk Control manager and a Compliance manager.

manager.
The manager may invest in the following derivatives: • Type of markets: □ regulated ☑ organised ☑ over-the-counter
 Types of risks in which the manager intends to trade: equity interest rate currency credit other risks

 Types of transactions and description of all operations that must be limited to the achievement of the investment objective: ☑ hedging ☑ exposure ☑ arbitrage ☑ other
 Types of instruments used: ☑ Futures: interest rates ☑ Options: interest rates ☑ currency and interest rate swaps ☑ currency futures ☐ other
 Strategies for using derivatives to achieve the investment objective: ☑ derivatives are used as inexpensive and liquid substitutes for actual securities to hedge the overall exposure of the portfolio against interest rate risk. ☑ options on the forward-based markets for interest rates are used to hedge the portfolio against any increase in interest rates. The commitment to this type of instrument should not exceed 10% of the net assets. ☑ interest rate swaps are used to reduce the average weighted maturity in order to mitigate the impact of changes in interest rates. ☑ currency swaps are used to hedge securities issued and denominated in a currency other than the euro.
 4. Embedded derivatives Categories of risks in which the manager intends to trade: □ equity ☑ interest rate ☑ foreign exchange ☑ credit
 Types of positions and description of all transactions, which must be limited to the achievement of the investment objective: □ hedging ☑ exposure □ arbitrage
 Types of instruments used: □ Puttable bonds ☑ Callable bonds
 Strategy for using embedded derivatives to achieve the investment objective: □ general portfolio hedging and hedging of certain risks and/or securities □ reconstitution of synthetic exposure to assets and risks ☑ exposure to the credit market (callable and puttable only)
5. <u>Deposits</u> The UCITS can lodge deposits for a maximum 12-month period. These deposits contribute to achieving the investment objective of the UCITS by allowing it to manage cash flows. They are refundable on request or may be withdrawn at any time. Deposits are made by credit institutions with registered offices in a member state or, if their registered office is in a non-member country, they are subject to prudential rules considered equivalent to those set out in European Union law.
6. <u>Cash borrowings</u>

Cash borrowings are prohibited. However, in situations such as, for example, substantial redemptions or transactions credited to the account that are not settled for technical reasons, the Fund may exceptionally become a temporary debtor. The debtor situation will be resolved as promptly as possible and in line with the

best interests of the unitholders.

7. Transactions involving temporary acquisition/disposal of securities

Types of transactions used:

☑ repurchase and reverse repurchase agreements in accordance with the French Monetary and Financial Code;
 ☐ lending and borrowing in accordance with the French Monetary and Financial Code: prohibited;
 ☐ other

These transactions may be cancelled at any time with two working days' notice.

Repurchase transactions have a temporary maturity of up to seven working days. These assets are held with the Depositary.

 Types of transactions and description of all operations that must be limited to the achievement of the investment objective:

☑ cash management

☐ optimisation of Fund's income

☐ potential contribution to the leverage effect of the UCITS

□ other

• Possible leverage effects: n/a.

Fees: See Costs and Fees section.

Summary of proportions used:

Types of transactions	Reverse repurchase agreements	Repurchase agreements	Securities lending	Securities borrowing
Maximum proportion of net assets	100%	10%	Prohibited	Prohibited
Expected proportion of net assets	25%	1%	Prohibited	Prohibited

8. <u>Information relating to collateral (temporary purchases and sales of securities and/or over-the-counter (OTC) derivatives including total return swaps (TRS))</u>

Type of collateral:

In the context of temporary purchases and sales of securities and/or OTC derivative transactions, the UCITS may receive

securities and cash as collateral.

Securities received as collateral must adhere to the criteria defined by the Management Company. They must be:

- liquid.
- transferable at any time,
- diversified in compliance with the eligibility, exposure and diversification rules of the UCITS,
- issued by an issuer that is not an entity of the counterparty or its group.

For bonds, the securities will also be issued by high-quality issuers located in OECD countries whose minimum rating may be AAA to BBB- on the scale of Standard & Poor's or with a rating deemed equivalent by the Management Company. Bonds must have a maximum maturity of 50 years.

The criteria described above are detailed in a Risk Policy available on the Management Company's website at www.amundi.com and may be subject to change, particularly in the event of exceptional market circumstances.

The discounts that may be applied to the collateral received will take into account the credit quality, the price volatility of the securities and the results of the stress tests performed.

Reuse of cash received as collateral:

Cash received as collateral, subject to a limit of 10% of the net assets, may be reinvested in deposits or securities issued or guaranteed by a public or parapublic entity of a member country of the European Union or an authorised non-member country, in accordance with the Risk Policy of the Management Company.

Reuse of securities received as collateral:

Not authorised: Securities received as collateral may not be sold, reinvested or provided as collateral.

Risk profile

Your money shall be invested primarily in financial instruments selected by the Management Company. These financial instruments are subject to market fluctuations.

The main risks related to this type of investment are:

Interest-rate risk

The principal specific management-related risks are:

Credit risk

Other risks are:

Capital risk
Counterparty risk
Liquidity risk linked to temporary purchases and sales of securities
Legal risk
Sustainability risk

Activity report

Juillet 2022

Monetary policy: The ECB decided to raise its key rates by 50 basis points in accordance with its mandate of ensuring price stability so as to bring inflation down toward its medium-term target of 2%. It therefore raised the interest rate on the main refinancing operations and the interest rates on the marginal lending facility and the deposit facility to respectively 0.50%, 0.75% and 0.00% with effect from July 27, 2022. This interest-rate normalization will be continued at upcoming meetings of the Governing Council. Investment policy: - Liquidity: Instantaneous liquidity was essentially provided by overnight transactions.- Interest rate risk: The weighted average maturity (WAM) of the portfolio was of one day at the end of the period.- Credit risk: Short-term spreads remained stable at the end of the period. At the short end of the curve, they stood at respectively €STR +13bp to €STR +20bp on maturities of three months to one year. At month-end, the bond weighting was about 2% of fund assets.- Average life and average rating: The weighted average life (WAL) of this money-market portfolio is 42 days. Its average long-term rating remains good at AA-. The portfolio benefits from Fitch's highest rating for money market funds: AAA-mmf. The issuers that make up the 1.32% with a median A2 rating are MUFG and Proximus. It has a short-term rating equivalent to at least F1 and is therefore eligible for the fund.- SRI profile: The portfolio had an average SRI rating of C+ at month-end, which is better than that of its investment universe adjusted for 20% of the worst-rated issuers C- (rating of investment universe is D+).

Août 2022

Monetary policy: The European Central Bank (ECB) has left its key rates unchanged; the refi rate remains at 0.50% with the deposit facility and marginal rates at respectively 0.00% and 0.75%.In expectation of upcoming hikes in the ECB's official interest rates, yields continued to climb strongly during the month. Thus, 3-month Euribor rose by 48.75 basis points to end the month at 0.79% while 12-month Euribor rose by 85.2 basis points to end August at 1.778%. Investment policy: - Liquidity: Instantaneous liquidity was essentially provided by overnight transactions.- Interest rate risk: The weighted average maturity (WAM) of the portfolio was of one day at the end of the period.- Credit risk: Short-term spreads widened towards the end of the period. At the short end of the curve, they stand at respectively €STR +7bp to €STR +25bp on maturities of three months to one year. At month-end, the bond weighting was about 2% of fund assets.- Average life and average rating: The weighted average life (WAL) of this money-market portfolio is 28 days. Its average long-term rating remains good at AA-. The portfolio benefits from Fitch's highest rating for money market funds: AAA-mmf. The issuers that make up the 3.32% with a median A2 rating are MUFG, PROXIMUS, ENGIE and LBW. They have a short-term rating equivalent to at least F1 and are therefore eligible for the fund.- SRI profile: The portfolio had an average SRI rating of C+ at month-end, which is better than that of its investment universe adjusted for 20% of the worst-rated issuers C- (rating of investment universe is D+).

Septembre 2022

Monetary policy: The ECB raised its key rates by 75 basis points in September, an unprecedented hike that momentarily reduces the gap against the US Federal Reserve's rates. High inflation has triggered this strong response and another hike of the same size in October cannot be ruled out. The deposit facility rate has been raised to 0.75%, with the refi rate at 1.25% and the marginal lending facility rate at 1.50%. Investment policy:

- Liquidity: Instantaneous liquidity was essentially provided by overnight transactions.- Interest rate risk: The portfolio's weighted average maturity (WAM) was of two days at the end of the period.- Credit risk: Short-term spreads widened towards the end of the period. At the short end of the curve, they stand at respectively €STR +5bp to €STR +22bp on maturities of three months to one year. At month-end, the bond weighting was about 1% of fund assets.- Average life and average rating: The weighted average life (WAL) of this money-market portfolio is 42 days. Its average long-term rating remains good at AA-. The portfolio benefits from Fitch's highest rating for money market funds: AAA-mmf. The issuers that constitute the 9.38% with a median rating of A2 have a short-term rating equivalent to at least F1 and are therefore eligible for the fund.- Social responsibility: The portfolio had an average SRI rating of C+ at month-end, which is better than that of its investment universe adjusted for 20% of the worst-rated issuers C- (rating of investment universe is D+).

Octobre 2022

Monetary policy: The ECB raised its key rates by 75bp for the third time running - a decision that was widely expected by economists given that inflation currently runs at close to 10%. The interest rate on the main refinancing operations and the interest rates on the marginal lending facility and the deposit facility have been raised to respectively 2.00%, 2.25% and 1.50% with effect from 11/2/2022. The ECB also decided to adjust the interest rates applicable to TLTRO III operations. From 23 November 2022 until the maturity date or early repayment date of each respective outstanding TLTRO III operation, the interest rate on TLTRO III operations will be indexed to the average applicable key ECB interest rates over this period. Investment policy: - Liquidity: Instantaneous liquidity was essentially provided by overnight transactions.- Interest rate risk: The weighted average maturity (WAM) of the portfolio was of one day at the end of the period.- Credit risk: Short-term spreads remained stable at the end of the period. At the short end of the curve, they stood at respectively €STR +5bp to €STR +23bp on maturities of three months to one year. At month-end, the bond weighting was about 1% of fund assets.- Average life and average rating: The weighted average life (WAL) of this moneymarket portfolio is 57 days. Its average long-term rating remains good at AA-. The portfolio benefits from Fitch's highest rating for money market funds: AAA-mmf. The issuers that constitute the 5.06% with a median rating of A2 have a short-term rating equivalent to at least F1 and are therefore eligible for the fund.- Social responsibility: The portfolio had an average SRI rating of C+ at month-end, which is better than that of its investment universe adjusted for 20% of the worst-rated issuers C- (rating of investment universe is D+).

Novembre 2022

Monetary policy: The European Central Bank (ECB) raised its key rates on October 27, bringing the refi rate to 2.00% with the deposit facility and marginal rates at respectively 1.50% and 2.25%. This movement with effect from November 3 was visible in the €STR of November 4. Since that date, the € short-term rate (€STR) has been fixed at around 1.40%. The outstanding event of the period was undoubtedly the repayment of TLTRO loans (on November 23) by the banks. As the financial conditions changed on the same date, these operations have become less attractive. Surplus liquidity will diminish with this movement, but it will remain high and have no effect on €STR, which will remain below the deposit facility rate. Inflation in the Eurozone dropped from 10.6% in October to 10.0% in November, falling more than the markets had expected (10.4%). The easing of inflationary pressures could lead the ECB to moderate the scale of its next interest-rate hikes at its December 15 meeting and opt for a 50bp hike rather than the 75bp initially foreseen. Investment policy: - Liquidity: Instantaneous liquidity was essentially provided by overnight transactions.- Interest rate risk: The portfolio's weighted average maturity (WAM) was of one day at the end of the period.- Credit risk: Short-term spreads remained stable at the end of the period. At the short end of the curve, they stood at respectively €STR +6bp to €STR +24bp on maturities of three months to one year. At month-end, the bond weighting was about 2% of fund assets.- Average life and average rating: The weighted average life (WAL) of this money-market portfolio is 64 days. Its average long-term rating remains good at AA-. The portfolio benefits from Fitch's highest rating for money market funds: AAA-mmf. The issuers that constitute the 2.14% with a median rating of A2 have a short-term rating equivalent to at least F1 and are therefore eligible for the fund. - Social responsibility: The portfolio had an average SRI rating of C+ at month-end, which is better than that of its investment universe adjusted for 20% of the worst-rated issuers C- (rating of investment universe is D+).

Décembre 2022

Monetary policy: The ECB raised its key rates by 50 basis points, bringing the deposit facility, the refinancing rate and the marginal lending rate to respectively 2%, 2.50% and 2.75% with effect from December 21, 2022. This decision brings the rise in interest rates in the Eurozone since July to a cumulative total of 250 basis points, which is an unprecedented level of monetary tightening. Although the ECB has moderated the scale of its hikes, it remains determined to continue to raise its interest rates over the coming months in order to bring inflation down. Investment policy: - Liquidity: Instantaneous liquidity was essentially provided by overnight transactions.- Interest rate risk: The portfolio's weighted average maturity (WAM) was of one day at the end of the period.- Credit risk: Short-term spreads remained stable at the end of the period. At the short end of the curve, they stood at respectively €STR +6bp to €STR +26bp on maturities of three months to one year. At month-end, the bond weighting was about 2% of fund assets.- Average life and average rating: The weighted average life (WAL) of this money-market portfolio is 69 days. Its average long-term rating remains good at AA-. The portfolio benefits from Fitch's highest rating for money market funds: AAA-mmf. The issuers that constitute the 5.33 % with a median rating of A2 have a short-term rating equivalent to at least F1 and are therefore eligible for the fund.- Social responsibility: The portfolio had an average SRI rating of C+ at monthend, which is better than that of its investment universe adjusted for 20% of the worst-rated issuers C- (rating of investment universe is D+).

Janvier 2023

Monetary policy: The European Central Bank (ECB) has left its key rates unchanged; the deposit facility, the refinancing rate and the marginal rate remain at respectively 2.0%, 2.50% and 2.75%. It plans to continues to raise its interest rates significantly at the next monetary policy meetings in February and March, with the aim of bringing inflation down to its 2% target over the medium term. Investment policy: - Liquidity: Instantaneous liquidity was essentially provided by overnight transactions.- Interest rate risk: The portfolio's weighted average maturity (WAM) was of one day at the end of the period.- Credit risk: Short-term spreads remained stable at the end of the period. At the short end of the curve, they stood at respectively €STR +6bp to €STR +26bp on maturities of three months to one year. At month-end, the bond weighting was about 2% of fund assets. - Average life and average rating: The weighted average life (WAL) of this money-market portfolio is 68 days. Its average long-term rating remains good at AA-.The portfolio benefits from Fitch's highest rating for money market funds: AAA-mmf. The issuers that constitute the 3.92% with a median rating of A2 have a short-term rating equivalent to at least F1 and are therefore eligible for the fund.- SRI profile: The portfolio had an average SRI rating of C+ at month-end, which is better than that of its investment universe adjusted for 20% of the worst-rated issuers C- (rating of investment universe is D+).

Février 2023

Monetary policy: The ECB's Governing Council decided to raise its three key rates by 50bp and plans to continue to raise them significantly at a regular pace and keep them at sufficiently restrictive levels to bring inflation down to its medium-term target of 2% as soon as possible. This brought its deposit facility, refinancing and marginal lending facility rates to respectively 2.50%, 3.00% and 3.25%.Investment policy: - Liquidity: Instantaneous liquidity was essentially provided by overnight transactions.- Interest rate risk: The portfolio's weighted average maturity (WAM) was of one day at the end of the period.- Credit risk: Short-term spreads remained stable at the end of the period. At the short end of the curve, they stood at respectively €STR +7bp to €STR +26bp on maturities of three months to one year.- Average life and average rating: The weighted average life (WAL) of this money-market portfolio is 56 days. Its average long-term rating remains good at AA-The portfolio benefits from Fitch's highest rating for money market funds: AAA-mmf. The issuers that constitute the 3.62% with a median rating of A2 have a short-term rating equivalent to at least F1 and are therefore eligible for the fund.- SRI profile: The portfolio had an average SRI rating of C+ at month-end, which is better than that of its investment universe adjusted for 20% of the worst-rated issuers C- (rating of investment universe is D+).

Mars 2023

Monetary policy: The ECB raised its key rates by 50 basis points, reaffirming its goal of combating inflation, despite the recent financial turbulence. This raised its deposit facility, refinancing and marginal lending facility rates to respectively 3%, 3.50% and 3.75%.Investment policy: - Liquidity: Instantaneous liquidity was essentially provided by overnight transactions.- Interest rate risk: The portfolio's weighted average maturity (WAM) was of one day at the end of the period.- Credit risk: Short-term spreads remained stable at the end of the period. At the short end of the curve, they stood at respectively €STR +7bp to €STR +30bp on maturities of three months to one year.- Average life and average rating: The weighted average life (WAL) of this moneymarket portfolio is 54 days. Its average long-term rating remains good at AA-. The portfolio benefits from Fitch's highest rating for money market funds: AAA-mmf. The issuers that constitute the 3.84% with a median rating of A2 have a short-term rating equivalent to at least F1 and are therefore eligible for the fund.- SRI profile: The portfolio had an average SRI rating of C+ at month-end, which is better than that of its investment universe adjusted for 20% of the worst-rated issuers C- (rating of investment universe is D+).

Avril 2023

Monetary policy: The European Central Bank (ECB) has left its key rates unchanged; the deposit facility, the refinancing rate and the marginal rate have been maintained at respectively 3.0%, 3.50% and 3.75%. After a few weeks of strong volatility triggered by the crisis in the banking sector, the markets have reassessed the ECB's terminal rate. A hike of 75 basis points is now again expected, which bring the deposit facility rate to 3.75% in the third quarter of 2023. Investment policy: - Liquidity: Instantaneous liquidity was essentially provided by overnight transactions.- Interest rate risk: The portfolio's weighted average maturity (WAM) was of one day at the end of the period.- Credit risk: Short-term spreads remained stable at the end of the period. At the short end of the curve, they stood at respectively €STR +9bp to €STR +30bp on maturities of three months to one year. - Average life and average rating: The weighted average life (WAL) of this money-market portfolio is 57 days. Its average long-term rating remains good at AA-.

The portfolio benefits from Fitch's highest rating for money market funds: AAA-mmf. The issuers that constitute the 2.76% with a median rating of A2 have a short-term rating equivalent to at least F1 and are therefore eligible for the fund.- SRI profile: The portfolio had an average SRI rating of C+ at month-end, which is better than that of its investment universe adjusted for 20% of the worst-rated issuers C- (rating of investment universe is D+).

Mai 2023

Monetary policy: The European Central Bank raised its interest rates by another 25bp, bringing the deposit facility rate to 3.25% - its highest level since October 2008. This was the seventh consecutive hike and brought the refinancing and marginal lending facility rates to respectively 3.75% and 4%. Christine Lagarde also repeated that interest rates would be kept at sufficiently restrictive levels for as long as it takes to bring inflation down to its medium-term target of 2%. Investment policy: - Liquidity: Instantaneous liquidity was essentially provided by overnight transactions.- Interest rate risk: The portfolio's weighted average maturity (WAM) was of one day at the end of the period.- Credit risk: Short-term spreads remained stable at the end of the period. At the short end of the curve, they stood at respectively €STR +9bp to €STR +30bp on maturities of three months to one year.- Average life and average rating: The weighted average life (WAL) of this money-market portfolio is 61 days. Its average long-term rating remains good at AA-. The portfolio benefits from Fitch's highest rating for money market funds: AAA-mmf. The issuers that constitute the 3.19% with a median rating of A2 have a short-term rating equivalent to at least F1 and are therefore eligible for the fund.- SRI profile: The portfolio had an average SRI rating of C+ at month-end, which is better than that of its investment universe adjusted for 20% of the worst-rated issuers C- (rating of investment universe is D+).

Juin 2023

Monetary policy: The ECB raised its key rates yet again, by 25 basis points, bringing the deposit facility, refinancing rate and marginal lending rate to respectively 3.50%, 4% and 4.25%. This decision brings its cumulative interest-rate hikes since July 2022 to 400 basis points, which is an unprecedented level of monetary tightening. Investment policy: - Liquidity: Instantaneous liquidity was essentially provided by overnight transactions.- Interest rate risk: The portfolio's weighted average maturity (WAM) was of three days at the end of the period.- Credit risk: Short-term spreads remained stable at the end of the period. At the short end of the curve, they stood at respectively €STR +8.5bp to €STR +31bp on maturities of three months to one year. - Average life and average rating: The weighted average life (WAL) of this money market portfolio is 60 days. Its average long-term rating remains good at AA-.The portfolio benefits from Fitch's highest rating for money market funds: AAA-mmf. The issuers that constitute the 3.39 % with a median rating of A2 have a short-term rating equivalent to at least F1 and are therefore eligible for the fund.- SRI profile: The portfolio had an average SRI rating of C+ at month-end, which is better than that of its investment universe adjusted for 20% of the worst-rated issuers C- (rating of investment universe is D+).

e) Type and quality of collateral

Amundi Asset Management undertakes to accept only securities of a high credit quality and to increase the value of its collateral by applying valuation discounts to securities loaned to it. This process is regularly reviewed and updated.

i) Reuse of collateral

- « The regulations governing UCIT forbid the reuse of collateral securities. Cash collateral received is:
 - o reinvested in short-term money market funds (as defined by ESMA in its 'Guidelines on ETFs and other UCITS issues')
 - o placed on deposit;
 - o reinvested in high-quality long-term government bonds
 - o reinvested in high-quality short-term government bonds
 - used for the purpose of reverse repurchase transactions.»

The maximum proportion of received collateral that may be reused is 0% in the case of securities and 100% in the case of cash.

The effective usage amounts to 0% for collateral securities and 100% for cash collateral.

k) Custody of collateral provided by the UCI

Amundi Asset Management undertakes to do business with a limited number of depositaries, selected to ensure the adequate custody of securities received and cash.

I) Breakdown of revenue and expenses

For securities lending transactions and repurchase agreements, BFT Investment Managers has entrusted Amundi Intermédiation, acting on behalf of the UCIs, with the following responsibilities: selecting counterparties, ordering the implementation of market agreements, monitoring counterparty risk, performing qualitative and quantitative monitoring of collateralisation (dispersion checks, ratings, liquid assets), repurchase agreements and securities lending. Income generated from these transactions is paid into the UCIs. Costs generated by these transactions are incurred by the UCIs. Charges by Amundi Intermédiation must not exceed 50% of the income generated by these transactions.

Significant events during the financial period None.

Specific details

Voting rights

The exercise of voting rights attached to the securities included in the fund's assets and the decision on the contribution in securities are defined in the fund regulations.

Group funds and instruments

In order to obtain information on the financial instruments held in the portfolio that are issued by the Management Company or by its affiliates, please refer to the sections:

- · Additional information,
- Group financial instruments held in the portfolio in the annual financial statements for the year ended, attached hereto.

Calculating overall risk

Specify the method used to measure the overall risk:

Commitment calculation method

Futures contracts are recorded at their market value as off-balance-sheet commitments, at the settlement price. Conditional forward transactions are translated to the underlying equivalent. Over-the-counter interest rate swaps are evaluated based on the nominal amount, plus or minus the corresponding estimation difference.

- Overall risk calculation method: the mutual fund uses the commitment calculation method to calculate the mutual fund's overall exposure to financial contracts.
- Leverage Funds to which the risk calculation method is applied Indicative leverage level: 32.18%

Regulatory information

Selection procedure for brokers and counterparties

Our Management Company and its "Trading" subsidiary attaches great importance to the selection of transactional service providers that are brokers or counterparties.

Its selection methods are as follows:

- Brokers are selected by geographical area and then by business. Counterparties are selected by business.
- Brokers and counterparties are provided with a quarterly internal memorandum. The company departments involved in the rating process are directly concerned by the services rendered by these service providers. The "Trading" subsidiary organises and determines this rating based on the scores provided by each team leader concerned, using the following criteria:

For teams of managers, financial analysts and strategists:

- general commercial relations, understanding of needs, relevance of contracts,
- quality of market and opportunities advice, consultancy monitoring,
- quality of research and publications,
- universe of securities covered, company and management visits.

For teams of traders:

- quality of personnel, market knowledge and information on companies, confidentiality,
- price proposals,
- quality of execution,
- quality of transactions processing, connectivity, technical standards and responsiveness.

Our Company's Compliance and Middle Office departments have a right of veto.

Accreditation of a new transactional service provider (broker or counterparty)

The Trading subsidiary is in charge of processing authorisation dossiers and obtain approval from the Risk and Compliance departments. When the transactional service provider (broker or counterparty) is authorised, it is rated in the following quarter.

Monitoring committees for transactional service providers (brokers and counterparties)

These monitoring committees meet every quarter under the chairmanship of the Trading subsidiary manager. The purpose of the meetings is to:

- validate past activity and the new selection to be implemented in the following quarter,
- decide on whether service providers will form part of a group that will be assigned a certain number of transactions.
- define the business outlook.

In this perspective, the monitoring committees review the statistics and ratings assigned to each service provider and take decisions accordingly.

Report on broking fees

A report on broking fees is available for bearers. It can be viewed at the following web address: www.amundi.com.

Remuneration Policy

Remuneration policy and practices of the AIFM/Management company

The remuneration policy implemented by Amundi Asset Management is compliant with the rules in terms of remuneration specified in the Directive 2011/61/UE of the European Parliament and of the Council of June 8th 2011 on Alternative Investment Fund Managers (the "*AIFM Directive*"), and in the Directive 2014/91/UE of July 23rd 2014 on undertakings for collective investment in transferable securities (the "*UCITS V Directive*"). These rules, about remuneration policies and practices, have for objective to promote sound and effective risk management of fund managers and the funds they manage.

Moreover, the remuneration policy is compliant with Regulation (EU) 2019/2088 ("SFDR"), integrating sustainability risk and ESG criteria in Amundi control framework, with responsibilities spread between the first level of controls performed by the Investment teams and second level of controls performed by the Risk teams, that can verify the compliance with ESG objectives and constraints of a fund at all time.

This policy is incorporated within the framework of the remuneration policy of Amundi reviewed each year by its Remuneration Committee. The latter checked the application of the remuneration policy in relation to the 2021 fiscal year, its compliance with the AIFM/UCITS Directives' principles and approved the policy applicable for the 2022 exercise at its meeting held on February 1st 2022.

In 2022, the implementation of the Amundi remuneration policy was subject to an internal, central and independent audit, driven by the Amundi Internal Audit.

1.1 Amounts of remuneration paid by the Management companies to its employees

In 2022, Amundi Asset Management's headcount increased due to the integration of Lyxor's employees.

During fiscal year 2022, the total amount of compensation (including fixed, deferred and non-deferred variable compensation) paid by Amundi Asset Management to its employees (1 673 employees at December 31st 2022) is EUR 202 172 869. This amount is split as follows:

- Total amount of fixed remuneration paid by Amundi Asset Management in 2022: EUR 134 493 396, which represents 67% of the total amount of compensation paid by Amundi Asset Management to its staff, were in the form of fixed remuneration.
- Total amount of variable compensation deferred and non-deferred paid by Amundi Asset Management in 2022: EUR 67 679 473, which represents 33% of the total amount of compensation paid by Amundi Asset Management to its staff, were in this form. The entire staff is eligible for variable compensation.

Additionally, some 'carried interest' was paid by Amundi AM with respect to fiscal year 2022, and is taken into account in the total amount of bonus referred to here above.

Of the total amount of remuneration (fixed and variable compensation deferred and non-deferred) paid during the fiscal year, EUR 19 393 477 were paid to the 'executives and senior managers' of Amundi Asset Management (31 employees at December 31st 2022), and EUR 16 540 119 were paid to the 'senior investment managers' whose professional activities have a material impact on Amundi Asset Management's risk profile (50 employees at December 31st 2022).

1.2 Alignment of remuneration policy and practices with risk profile of the AIFs/UCITS

The Amundi Group has adopted and implemented remuneration policy and practices compliant with the latest norms, rules, and guidelines issued from the regulatory authorities for its management companies (AIFM/UCITS).

The Amundi Group has also identified all of its 'Identified Staff', that include all the employees of the Amundi Group having a decision authority on the UCITS/AIFM management companies or the UCITS/AIFs managed and consequently likely to have a significant impact on the performance or the risk profile.

The variable remuneration awarded to the Amundi Group staff takes into account the performance of the employee, its business unit and the Amundi Group as a whole, and is based on quantitative and qualitative criteria as well as the respect of sound risk management rules.

The criteria taken into account for performance assessment and remuneration award depends on the nature of the employee's functions :

1. Management and selection of AIFs/UCITS functions

Quantitative criteria:

- IR/Sharpe over 1, 3, 5 years
- Gross/absolute/relative performance of the investment strategies (based on GIPS composites) over 1, 3, 5 years, outlook mainly focused on 1 year, adjusted with long-term figures (3,5 years)
- Performance risk adjusted based on IR/Sharpe over 1, 3, 5 years
- Competitive positioning through Morningstar rankings
- Net inflows / Successful requests for proposals, mandates
- Performance fees generation
- ESG rating of the funds according to different providers when applicable (Morningstar, CDP...
- Respect of ESG beat the benchmark, ESG exclusion policies and climate transition index.

Qualitative criteria:

- Compliance with risk policy, compliance and legal rules
- Quality of management
- Innovation/product development
- Collaboration/Sharing of best practices
- Commercial engagement including the ESG component of commercial effort and flows
- ESG
 - Compliance with ESG policy and participation to the ESG and net-zero offering
 - Integration of ESG into investment processes
 - Capacity to promote and project ESG knowledge internally and externally
 - Extent of proposition and innovation in the ESG space
 - Demonstrates capacity to manage well the combination of risk return and ESG (the risk and ESG adjusted return).

2. Sales and marketing functions

Quantitative criteria:

- Net inflows, notably on ESG and impact denominated products
- Revenues
- Gross Inflows
- Client base development and retention; product mix
- Number of commercial activities per year, notably prospection activities
- Number of clients approached on their net zero strategy.

Qualitative criteria:

- Compliance with risk policy, compliance and legal rules
- Joint consideration of Amundi's interests and of client's interests
- Securing/developing the business
- Client satisfaction
- Quality of management
- Cross-functional approach and sharing of best practices
- Entrepreneurial spirit
- Capacity to explain and promote ESG policies and capabilities as well as solutions of the firm.

3. Control and support functions

For control and support functions, performance assessment and remuneration award are independent from the performance of the business they oversee.

Common criteria taken into account are:

- Mainly criteria related to the meeting of objectives linked to their functions (risk management, quality of controls, completion of projects, tools and systems improvement etc.)
- When financial criteria are used, these are mainly related to management/ optimization of expenses.

The above-mentioned performance criteria, and specifically those applicable to Identified staff in charge of the management of AIFs/UCITS, comply with the applicable regulation as well as to the AIF's/UCITS investment policy. These internal rules of Amundi Group contribute to a sound and effective risk management.

Furthermore, Amundi Group has adopted and implemented, for its entire staff, measures aiming to align remuneration with long-term performance and risks in order to avoid conflicts of interest.

In this respect, notably:

- The deferral policy has been adapted to comply with the AIFM and UCITS V Directives' requirements.
- The deferred portion of variable compensation for identified staff members is awarded at 100% in instruments indexed on the performance of a representative basket of AIFs and/or UCITS funds.
- The actual payment of the deferred portion is linked to the financial situation of Amundi Group, to the continued employment within the group and to a sound and effective risk management over the vesting period.

Fund Compliance with criteria relating to environmental, social, and governance quality (ESG) objectives

AMUNDI uses targeted exclusion rules as a basis of its fiduciary responsibility. They are applied in all active management strategies and consist in excluding companies that are not compliant with either our own ESG policies or the international agreements and internationally-recognised or national regulatory frameworks. These targeted exclusions are implemented subject to compliance with the applicable laws and regulations, unless otherwise stipulated in dedicated products or services contracts.

AMUNDI excludes the following activities:

All direct investment in companies involved in the production, sale, or storage of, or services for, anti-personnel mines or cluster bombs, pursuant to the Ottawa Treaty and the Oslo Convention on Cluster Munitions.

Companies that produce, store, or sell chemical, biological, and/or depleted-uranium weapons.

Companies that seriously and repeatedly violate one or more of the Ten Principles of the UN Global Compact without implementing credible corrective measures.

These issuers receive a "G" rating on the AMUNDI scale. In addition, AMUNDI implements specific sectoral exclusions targeting the coal and tobacco industries. These sectoral exclusions apply to all active management strategies that give AMUNDI full discretion over its portfolio management.

Coal Policy

AMUNDI excludes:

- Companies developing or planning to develop new thermal coal capacity within the entire value chain (producers, extractors, power plants, transport infrastructure).

Companies whose income is over 25% the result of thermal coal mining.

- Companies that extract 100 MT or more thermal coal annually with no intention of reducing these quantities.
- All companies that derive over 50% of their total income before analysis from thermal coal mining and coal-fired power generation.
- All coal-fired power generation and coal mining companies with a threshold of 25% to 50% and a deteriorated energy transition score.

Application in passive management:

Passive ESG funds

All ETF and ESG index funds (with the exception of highly-concentrated indices) implement AMUNDI's policy of excluding the coal sector wherever possible.

Passive non-ESG funds

In passive management, it is a fiduciary duty to replicate an index as faithfully as possible.

Limited flexibility is afforded to portfolio managers, which are required to meet contractual objectives to achieve passive management that is entirely in line with the requested benchmark index.

Consequently, AMUNDI's index funds and ETFs that replicate standard (non-ESG) benchmark indices cannot systematically apply sectoral exclusions.

At the same time, in the context of securities excluded from the "thermal coal policy" in AMUNDI's active investment universe but that may be present in non-ESG passive funds, AMUNDI has reinforced its voting and commitment activities, which may translate to a "nay" vote on the management of the companies in question.

Tobacco policy

Since 2018, AMUNDI has limited its ESG ratings for tobacco companies to "E", on a scale of A to G (with Grated companies excluded), in order to take account of concerns, not just around public health, but also the human rights violations, poverty, environmental consequences, and considerable economic cost associated with tobacco, evaluated at over \$1,000 billion per year worldwide, according to World Health Organisation estimates. The reason for this limit is to penalise investment in this type of company, which must be offset by investment in more virtuous companies. AMUNDI's policy applies to the entire the tobacco sector, including suppliers, cigarette manufacturers, and distributors.

In May 2020, AMUNDI became a signatory to the Tobacco-Free Finance Pledge, thereby reinforcing its tobacco exclusion policy. AMUNDI implements the following rules:

- Exclusion rules: companies manufacturing finished tobacco products are excluded (application thresholds: income of over 5%).
- Limitation rules: Companies involved in the manufacture, supply, and distribution of tobacco are limited to an ESG rating of E (on a scale of A to G) (thresholds: income of over 10%).

Further information on how AMUNDI takes ESG criteria into account is available at https://legroupe.amundi.com

SFDR and Taxonomy Regulations

Article 8 – concerning Taxonomy

In accordance with its investment objective and policy, the Fund promotes environmental characteristics as defined under Article 6 of the Taxonomy Regulation. It may partially invest in economic activities that contribute to one or more of the environmental objective(s) set out in Article 9 of the Taxonomy Regulation. However, the Fund does not currently make any commitment in terms of a minimum proportion.

The Taxonomy aims to identify economic activities considered to be environmentally sustainable. The Taxonomy identifies such activities according to their contribution to six major environmental objectives: (i) climate change mitigation, (ii) climate change adaptation, (iii) the sustainable use and protection of water and marine resources, (iv) the transition to a circular economy (waste, prevention, and recycling (v) pollution prevention and reduction, and (vi) the protection and restoration of biodiversity and ecosystems.

In order to determine an investment's degree of environmental sustainability, an economic activity is considered to be environmentally sustainable where it contributes substantially to one or more of the environmental objectives set out in the Taxonomy Regulation, where it does no significant harm (the "do no significant harm" or "DNSH" principle) to one or more of these environmental objectives, where it is carried out in accordance with the minimum safeguards provided for in Article 18 of the Taxonomy Regulation and where

^{*} Active management: excluding indexed funds and ETFs subject to constraints by their benchmark index.

it complies with the technical screening criteria established by the European Commission in accordance with the Taxonomy Regulation.

In accordance with the current iteration of the Taxonomy Regulation, the Asset Manager ensures that investments do no significant harm to any other environmental objective by implementing exclusion policies covering issuers with controversial environmental and/or social and/or governance practices.

Notwithstanding the preceding, the "Do No Significant Harm" (DNSH) principle is applied solely to the underlying investments incorporating European Union criteria for environmentally sustainable economic activities.

The investments underlying this financial product do not incorporate European Union criteria for environmentally sustainable economic activities.

Although the Fund may already hold investments in economic activities qualified as sustainable activities without currently undertaking to observe a minimum proportion, the Asset Manager will do every thing it can to communicate the proportion invested in sustainable activities as soon as it is reasonably possible after the entry into force of the Regulatory Technical Standards ("RTS") governing the content and presentation of communications in accordance with Articles 8(4), 9(6) and 11(5) of the Disclosure Regulation, as amended by the Taxonomy Regulation.

This effort will be gradually and continuously rolled out, incorporating the requirements of the Taxonomy Regulation in the investment process as soon as it is reasonably possible. This will lead to a minimum level of portfolio alignment with sustainable activities, and this information will then be made available to investors. Until then, the degree of alignment with sustainable activities will not be disclosed to investors.

Once all the data is available and the appropriate calculation methodologies are finalised, the description of the proportion of underlying investments in sustainable activities will be made available to investors. This information, along with information on the proportion of enabling and transitional activities, will be indicated in a subsequent version of the prospectus.

Article 8 – concerning Article 11 of the SFDR

As required by Article 50 (2 SFDR) of COMMISSION DELEGATED REGULATION, information on the environmental or social characteristics promoted by the financial product is available in an annex to this report.

Auditor's Certification

STATUTORY AUDITOR'S REPORT ON THE FINANCIAL STATEMENTS For the year ended 30 June 2023

AMUNDI EURO LIQUIDITY SHORT TERM SRI

OPCVM CONSTITUE SOUS FORME DE FONDS COMMUN DE PLACEMENT NOURRICIER Governed by the French Monetary and Financial Code (Code monétaire et financier)

Management company AMUNDI ASSET MANAGEMENT 90, boulevard Pasteur 75015 PARIS

Opinion

In compliance with the assignment entrusted to us by the annual general meeting, we conducted an audit of the accompanying financial statements of AMUNDI EURO LIQUIDITY SHORT TERM SRI for the year ended 30 June 2023.

In our opinion, the financial statements give a true and fair view of the assets and liabilities and of the financial position of the fund at 30 June 2023 and of the results of its operations for the year then ended, in accordance with French accounting principles.

Basis of our opinion

Audit standards

We conducted our audit in accordance with professional standards applicable in France. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion. Our responsibilities under these standards are described in the section "Statutory Auditor's responsibilities for the audit of the financial statements" in this report.

Independence

We conducted our audit engagement in accordance with the applicable rules on independence, from 01/07/2022 and up to the date of this report, and in particular we did not provide any non-audit services prohibited by the auditors' professional code of ethics.

PricewaterhouseCoopers Audit, 63, rue de Villiers 92208 Neuilly-sur-Seine Cedex, France T: +33 (0) 1 56 57 58 59, F: +33 (0) 1 56 57 58 60, www.pwc.fr

Justification of our assessments

In accordance with the requirements of articles L.823-9 and R.823-7 of the French Commercial Code relating to the justification of our assessments, we bring to your attention the following assessments that, in our professional judgement, were the most significant for the audit of the financial statements.

These assessments were made in the context of our audit of the financial statements, taken as a whole, and of the opinion we formed which is expressed above. We do not provide an opinion on individual items in the financial statements.

Specific verifications

We have also performed, in accordance with professional standards applicable in France, the specific verifications required by laws and regulations.

We have no matters to report as to the fair presentation and the consistency with the financial statements of the information given in the management report prepared by the management company.

Responsibilities of the management company for the financial statements

It is the management company's responsibility to prepare the fund's financial statements presenting a true and fair view in accordance with French accounting principles and to implement the internal control that it deems appropriate for the preparation of financial statements that do not contain material misstatements, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the fund's ability to continue as a going concern, disclosing in the financial statements, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the fund or to cease operations.

These financial statements have been prepared by the management company.

Statutory auditor's responsibilities for the audit of the financial statements

Audit purpose and approach

It is our responsibility to prepare a report on the financial statements. Our objective is to obtain reasonable assurance about whether the financial statements, taken as a whole, are free of material misstatement. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with professional standards will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As indicated in article L.823-10-1 of the French Commercial Code, our statutory audit of the financial statements is not to guarantee the viability or the quality of your management.

PricewaterhouseCoopers Audit, 63, rue de Villiers 92208 Neuilly-sur-Seine Cedex, France T: +33 (0) 1 56 57 58 59, F: +33 (0) 1 56 57 58 60, www.pwc.fr

As part of an audit conducted in accordance with professional standards applicable in France, the statutory auditor uses professional judgement throughout the entire audit. He also:

- identifies and assesses the risks of material misstatement of the financial statements, whether due to fraud or error, designs and performs audit procedures responsive to those risks, and obtains audit evidence that is sufficient and appropriate to provide a basis for his opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control;
- obtains an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the company's internal control;
- evaluates the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management in the financial statements;
- concludes on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the fund's ability to continue as a going concern. Such conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the company to cease to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are not provided or inadequate, to issue a qualified opinion or a disclaimer of opinion;
- evaluates the overall presentation of the financial statements and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

In accordance with the law, we inform you that we were not able to issue the present report within the statutory deadlines given the late receipt of some necessary documents to finalize our work.

Notes to the annual accounts

1. Accounting rules and methods

The annual financial statements are presented in the format laid down by ANC (French accounting standards authority) Regulation 2014-01, as amended.

The following general accounting principles apply:

- the financial statements shall provide a true and fair view of the current financial position, they shall allow comparability, and observe the going concern principle,
- they shall be produced with consistency and honesty,
- they shall observe the principle of prudence, and
- there shall be consistency in accounting methods from one year to the next.

The accounting method used to record income from fixed income securities is the accrued interest method.

Purchases and sales of securities are recorded excluding fees.

The portfolio's accounting currency is the euro.

The length of the financial year is 12 months.

Asset valuation rules

Financial instruments are posted to the ledger using the historical cost method and entered on the balance sheet at their present value, determined by taking the last known market value or, where there is no market for the instruments in question, by the use of any external methods or financial models.

Differences between the current values used to calculate net asset value and the historical costs of transferable securities at the time they are added to the portfolio are recorded under "valuation differentials".

Any securities not denominated in the portfolio's reference currency are measured in accordance with the principle described below, then translated into the portfolio's currency at the prevailing exchange rate at the valuation date.

Deposits:

Deposits with a remaining term of three months or less are measured using the straight-line method.

Equities, bonds, and other securities traded on a regulated or similar market:

Equities and other securities traded on a regulated or similar market are valued at their market price on the day known as "D" in each market, depending on the geographic region of each market:

- Asia: closing price on trading day "D"
- Europe: opening price on trading day "D"
- Americas: closing price on trading day "D-1".

Bonds and related securities are assessed at the market price provided by various financial service providers. Accrued interest on bonds is calculated up to the net asset value calculation date.

Equities, bonds and other securities not traded on a regulated or similar market:

Securities not traded on a regulated market are measured under the responsibility of the asset manager using methods based on net asset value and yield, taking into consideration the prices used during major recent transactions.

Negotiable debt securities:

Negotiable debt securities and similar securities not subject to material transactions are assessed using an actuarial method, based on a benchmark interest rate as defined below, and adjusted upward when necessary to take account of the intrinsic features of the issuer:

- Negotiable Debt Securities with a maturity of up to 1 year: Interbank rate in euros (Euribor);
- Negotiable Debt Securities with a maturity of more than 1 year: The rate on coupon-bearing French government bonds (BTAN) and French OAT bonds with a similar maturity for longer periods.

Negotiable Debt Securities with a residual maturity of up to three months may be assessed using the straight-line method.

Treasury bills are valued at the market rate communicated daily by Banque de France or Treasury bond specialists.

The net asset value of Amundi Asset Management's money market funds is calculated. using market prices wherever possible, and, where market prices are unavailable, using a market spread. In order to validate the relevance of the prices used to determine asset valuations, the discrepancy between recorded prices and selling prices is regularly measured by the Risk Department.

Mutual funds:

Fund units or shares are valued at their last known net asset value.

Securities financing transactions:

Securities received under repurchase agreements are recorded as assets under "Receivables on securities received under a repurchase agreement" at the contract amount plus any accrued interest receivable.

Securities sold under repurchase agreements are booked to the buyer's portfolio at their current value. Liabilities on securities sold under repurchase agreements are booked to the seller's portfolio at the value specified in the contract, plus accrued interest payable.

Loaned securities are valued at their current value and recorded on the asset side of the balance sheet under the heading "Receivables representing loaned securities" at current value plus accrued interest receivable.

Borrowed securities are booked to assets under "Borrowed securities" at the amount provided for in the agreement, and to liabilities under "Payables representing borrowed securities" at the amount provided for in the agreement, plus accrued interest payable.

Forward financial instruments:

Forward financial instruments traded on a regulated or similar market:

Forward financial instruments traded on a regulated or similar market are measured as follows for the calculation of net asset value at trading day "D":

- Asia: at the daily clearing price
- Europe: at the opening price on day "D"
- Americas: at the clearing price on day "D-1".

Forward financial instruments not traded on a regulated or similar market:

Swaps:

Interest rate and/or currency swaps are marked to market based on the price determined by discounting future cash flows at market interest rates and/or exchange rates. This price is adjusted for issuer risk.

Index swaps are assessed using an actuarial method based on a benchmark rate provided by the counterparty.

Other swaps are marked to market or measured at a value estimated according to the terms established by the asset manager.

Off-balance sheet commitments:

Forward contracts are marked to market as off-balance sheet liabilities at the price used in the portfolio. Options are converted into their underlying equivalent.

Swap commitments are reported at their par value or, where no par value is available, at an equivalent amount.

Management fees

Management and operating fees cover all of the fees relating to the Fund: financial management, administrative, accounting, custody, distribution, and auditing fees.

These fees are charged to the Fund's income statement.

Management fees do not include transaction fees. For more details about the fees charged to the Fund, please refer to the prospectus.

They are recorded on a pro rata basis each time the NAV is calculated.

The total amount of these fees complies with the maximum fee rate based on net assets, as indicated in the Fund Rules or the prospectus:

Allocation of distributable amounts

Definition of distributable sums

Distributable sums consist of:

Income:

Net income is equal to the amount of interest, arrears, premiums and bonuses, dividends, directors' attendance fees and all other income from the securities comprising the portfolio, plus income from temporary cash holdings, minus management fees and borrowing costs.

To it is added retained earnings, plus or minus the balance of the income adjustment account.

Capital gains and losses:

Realised capital gains, net of costs, less realised capital losses, net of costs, recorded during the financial year, plus net capital gains of the same nature recorded in previous financial years that were not distributed or capitalised, plus or minus the balance of the capital gains adjustment account.

Methods for allocating distributable amounts:

Unit(s)	Allocation of net income	Allocation of net capital gains or losses realized
Units AMUNDI EURO LIQUIDITY SHORT TERM SRI - E-C	Capitalisation	Capitalisation
Units AMUNDI EURO LIQUIDITY SHORT TERM SRI - I2-C	Capitalisation	Capitalisation
Units AMUNDI EURO LIQUIDITY SHORT TERM SRI - I-C	Capitalisation	Capitalisation
Units AMUNDI EURO LIQUIDITY SHORT TERM SRI - LCL P-C	Capitalisation	Capitalisation
Units AMUNDI EURO LIQUIDITY SHORT TERM SRI - LCL PE-C	Capitalisation	Capitalisation
Units AMUNDI EURO LIQUIDITY SHORT TERM SRI - LCL PM-C	Capitalisation	Capitalisation
Units AMUNDI EURO LIQUIDITY SHORT TERM SRI - M-C	Capitalisation	Capitalisation
Units AMUNDI EURO LIQUIDITY SHORT TERM SRI - P-C	Capitalisation	Capitalisation
Units AMUNDI EURO LIQUIDITY SHORT TERM SRI - S-C	Capitalisation	Capitalisation
Units AMUNDI EURO LIQUIDITY SHORT TERM SRI - SG-C	Capitalisation	Capitalisation
Units AMUNDI EURO LIQUIDITY SHORT TERM SRI - Z-C	Capitalisation	Capitalisation

Note(s)

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities.

Sustainable

investments with an environmental objective might be aligned with the Taxonomy or not.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:AMUNDI EURO LIQUIDITY SHORT TERM SRI

Legal entity identifier: 9695003J31VHMAGY0545

Environmental and/or social characteristics

D	Did this financial product have a sustainable investment objective?				
		Yes	● No		
	with	in economic activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportio of 45.46% of sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy with a social objective		
		ade sustainable investments a social objective:%	It promoted E/S characteristics, but did not make any sustainable investments		

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the period, the product promoted environmental and/or social characteristics by targeting an ESG score higher than that of the investment universe represented by ICE BOFA 1-3 YEAR GLOBAL CORPORATE INDEX. To determine the ESG rating of the product and the investment universe, ESG performance is assessed on an ongoing basis by comparing a security's average performance against the sector of the security's issuer for each of the three ESG characteristics (environmental, social, and governance). The investment universe is a broad market universe that does not evaluate or include components based on environmental and/or social characteristics and is therefore not intended to be consistent with the characteristics promoted by the fund. No ESG benchmarks have been assigned.

This product is a certified SRI (Socially Responsible Investment) Throughout the year, it sought to promote all three dimensions (environmental, social, and corporate governance), taking into account the ESG rating of issuers in the construction of the portfolio.

The ESG rating of issuers is intended to evaluate their ability to manage the potential negative impact of their activities on sustainability factors. This analysis assesses their Environmental, Social, and Corporate Governance behaviour and assign them an ESG rating from A (highest rating) to G (lowest

rating), in order to conduct a more inclusive assessment of the risks.

- 1. The portfolio consistently implemented the following Amundi exclusion policy:
 - legal exclusions on controversial weapons
 - companies that seriously and repeatedly violate one or more of the Ten Principles of the UN Global Compact without implementing credible corrective measures;
 - Amundi's sectoral exclusions on Coal and Tobacco (the details of this policy are available
 in Amundi's Responsible Investment Policy available on www.amundi.fr).
- 2. No investment was made in issuers with "F" or "G" ratings. For issuers whose ratings were downgraded to "F" or "G", the securities already present in the portfolio are sold within the time period stipulated in the commitments set out in the product's prospectus.
- 3. The portfolio's weighted average ESG rating was consistently higher than that of the product's investment universe once at least 20% of the lowest-rated issuers were eliminated
- 4. The product favoured the issuers with the highest ratings in their sector of activity according to the ESG criteria identified by the fund manager's non-financial analysis team ("Best in Class" approach). With the exception of the above exclusions, all economic sectors are represented in this approach and the fund could, as a result, be exposed to certain controversial sectors.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Amundi has developed its own internal ESG rating process based on the best-in-class approach. Ratings adapted to each industry sector aim to assess the dynamics in which companies operate.

The sustainability indicator used is the product's average ESG rating, which must be higher than the ESG rating of its investment universe.

At the end of the period:

- The portfolio's weighted average ESG rating is: 0.919 (C).
- The weighted average ESG rating of the reference universe is: **0.044 (D)**.

To determine ESG ratings, the Amundi ESG scoring system uses a quantitative ESG rating translated into seven scores ranging from A (the highest scores in the universe) to G (the lowest). Amundi's ESG scoring system gives securities on the exclusion list a G rating.

The ESG performance of corporate issuers is assessed globally and takes account of relevant criteria via comparison to the average performance of their business sector through a combination of all three ESG dimensions:

- the environmental dimension: this examines the ability of issuers to control their direct and indirect impact on the environment by limiting their energy consumption, reducing their greenhouse gas emissions, combating resource depletion, and protecting biodiversity;
- the social dimension: this measures the way an issuer operates on two different concepts: its strategy on developing human capital and respecting human rights in general;
- the governance dimension: this assesses the issuer's ability to provide the bases for an effective corporate governance framework and generate long-term value.

The ESG rating methodology used by Amundi is based on 38 criteria, either generic (common to all companies regardless of their activity), or sectoral, weighted by sector and considered according to their impact on reputation, operational efficiency, and issuer regulations. Amundi's ESG ratings can either be expressed as a general score covering all three dimensions: E, S, and G, or individually on any environmental or social factor.

...and compared to previous periods?

At the end of the previous period, the portfolio's weighted average ESG score was (), and that of the investment universe was ().

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments were to invest in companies that met two criteria:

- 1. follow best environmental and social practices; and
- 2. do not generate products and services that harm the environment and society.

The definition of a "best performing" company is based on a proprietary Amundi ESG methodology that is designed to measure a company's ESG performance. To be considered as the "best performing", a company must obtain the best rating among the top three (A, B or C, on a rating scale ranging from A to G) in its sector on at least one important environmental or social factor. Significant environmental and social factors are identified at the sector level. The identification of these factors is based on Amundi's ESG analysis framework, which combines extra-financial data with a qualitative analysis of the related sector and sustainability themes. Factors identified as material have a contribution of more than 10% to the overall ESG rating. For the energy sector, for example, material factors are: emissions and energy, biodiversity and pollution, health and safety, local communities, and human rights.

In order to contribute to the above objectives, the investee company should not have significant exposure to activities (e.g. tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticides, single-use plastic production) that are not compatible with these criteria.

The sustainable nature of an investment is assessed at the level of the investee company. Concerning external UCIs, the criteria for determining the sustainable investments that these underlying UCIs may hold and their objectives depend on each company's own management approach.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

To ensure that sustainable investments do not cause significant harm, Amundi uses two tests:

- The first "DNSH" ("Do No Significant Harm") test is based on the monitoring of the mandatory indicators of the Main Negative Impacts in Annex 1, Table 1 of Delegated Regulation (EU) 2022/1288 when reliable data is available (for example, the GHG intensity or greenhouse gas intensity of beneficiary companies) via a combination of indicators (e.g. carbon intensity) and specific thresholds or rules (e.g. The carbon intensity of beneficiary companies is not within the sector's last decile). Amundi already considers specific indicators of the Main Negative Impacts in its exclusion policy as part of the Amundi Responsible Investment Policy (e.g. exposure to controversial weapons). These exclusions, which apply in addition to the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of the principles of the UN Global Compact, coal and tobacco.
- In addition to the specific sustainability factors covered by the first filter, Amundi has defined a second filter that does not consider the mandatory indicators of the Main Negative Impacts above, so as to verify that a company's overall environmental or social performance is not worse than other companies in its sector, corresponding to an environmental or social rating of E or higher according to Amundi's ESG rating system.

Concerning external UCIs, the consideration of the "do no significant harm" principle and the impact of sustainable investments depends on each underlying UCI manager's own methodologies.

How were the indicators for adverse impacts on sustainability factors taken into account?

As detailed above, the negative impact indicators were taken into account in the first DNSH filter (Do No Significant Harm):

This is based on the monitoring of the mandatory indicators of the Main Negative Impacts in Appendix 1, Table 1 of Delegated Regulation (EU) 2022/1288 when reliable data is available via the combination of the following indicators and specific thresholds or rules:

- has a CO2 intensity that is not within the last decile of companies in the sector (only applicable to high-intensity sectors), and
- has board diversity that is not within the last decile of companies in its sector, and
- is free from any controversy regarding working conditions and human rights
- is free from any controversy regarding biodiversity and pollution.

Amundi already takes into account the specific Negative Main Impacts in its exclusion policy as part of its Responsible Investment Policy. These exclusions, which apply in addition to the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of the principles of the United Nations Global Compact, coal and tobacco.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

Yes. The OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights have been incorporated into Amundi's ESG rating methodology. The proprietary ESG rating tool evaluates issuers using data available from data providers. For example, the model includes a dedicated criterion called "Community inclusion and Human rights" that is applied to all sectors in addition to other Human rights criteria, including socially responsible supply chains, working conditions and professional relations. In addition, we monitor controversies at least on a quarterly basis, which includes companies identified for Human rights violations. When controversies arise, analysts assess the situation and give a score to the controversy (using an exclusive, proprietary rating methodology) and determine the best steps to follow. Controversy scores are updated quarterly to track trends and remediation efforts.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The mandatory indicators of the Negative Main Impacts set out in Appendix 1, Table 1 of Delegated Regulation (EU) 2022/1288 were taken into account by implementing exclusion policies (normative and sectoral) and integrating ESG rating into the investment process, engagement and voting approaches:

- Exclusion: Amundi has defined normative exclusion rules, by activity and by sector, covering some of the main sustainability indicators listed in the "Disclosure" Regulation.
- Incorporation of ESG factors Amundi has adopted minimum ESG integration standards applied by default to its actively managed open-ended funds (exclusion of G-rated issuers and best weighted average ESG rating above the applicable benchmark). The 38 criteria used in Amundi's ESG rating approach were also designed to take into account key impacts on sustainability factors along with the quality of mitigation.
- Engagement: engagement is an ongoing and targeted process aimed at influencing companies' activities or behaviour. The objective of the engagement can be divided into two categories: engaging an issuer to improve the way in which it integrates the environmental and social dimension and engaging an issuer to improve its impact on environmental, social and Human rights issues or other sustainability issues that are important to society and the global economy.
- Voting: Amundi's voting policy relies on a holistic analysis of all long-term issues that may influence value creation, including material ESG issues (Amundi's voting policy can be consulted on its website).
- Monitoring controversies: Amundi has developed a controversy monitoring system that relies on three external data providers to systematically monitor controversies and their level of severity. This quantitative approach is then enhanced by an in-depth assessment of each severe controversy conducted by ESG analysts and a periodic review of its

developments. This approach applies to all Amundi funds.

For additional information on how the mandatory indicators of Key Negative Impacts are used, please see the SFDR Statement available at www.amundi.fr.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: from 01/07/2022 to 30/06/2023

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in

specific assets.

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1** Aligned with E/S characteristics covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.
- In which economic sectors were the investments made?

Sector	Sub-sector	% Assets
	Finance	55.46%
	Agencies	8.24%
	Mortgage assets	4.54%
	Supranationals	4.30%
	Government bonds	3.70%
	Other	3.52%
	Consumer staples	3.29%
	Utilities	3.01%
	Local authorities	2.83%
	Consumer discretionary	2.54%
	Industry	0.75%
	Communication services	0.24%
	Secured	0.13%
	Liquid capital	7.44%

Taxonomy-aligned activities are expressed as a share of:

- turnover
 reflecting the
 share of revenue
 from green
 activities of
 investee
 companies.
- capital expenditure (CapEx) showing

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund promotes both environmental and social characteristics. Although the fund does not commit to making Taxonomy-aligned investments, it nevertheless invested 0.23% in Taxonomy-aligned sustainable investments during the period under review. These investments contributed to the climate change mitigation objectives of the EU Taxonomy.

The alignment of investee companies with the aforementioned objectives of the EU taxonomy is measured using data on turnover (or revenue) and/or the use of green bond proceeds.

Neither the fund's auditors nor a third party has verified the percentage alignment of the fund's investments with the EU taxonomy.

the green investments made by investee companies, e.g. for a transition to a green economy. operational

a green economy.

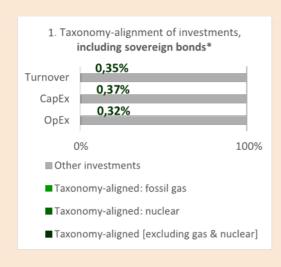

operational
expenditure
(OpEx) reflecting
green operational
activities of
investee
companies.

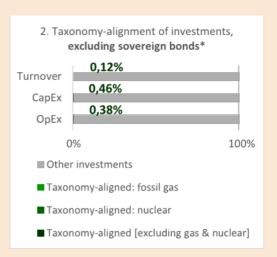

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

☐ Yes:☐ In fossil gas☐ In nuclear energy☑ No

Reliable data on alignment with the EU Taxonomy for fossil gas and nuclear energy was not available during the period.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the share of investments made in transitional and enabling activities?

Using data relating to turnover and/or the use of green bond proceeds as an indicator, 0.00% of the fund's investments were in transitional activities and 0.00% of investments were in enabling activities as at 30/06/2023. Neither the fund's auditors nor a third party has verified the percentage alignment of the fund's investments with the EU taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Alignment with the EU taxonomy was not reported during the previous period because no reliable data was available at the time.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the Taxonomy was **44.14%** at the end of the period.

This is due to the fact that some issuers are considered sustainable investments under the SFDR but some of their activities are not aligned with Taxonomy standards, or data is not yet available for them to perform such an assessment.

What was the share of socially sustainable investments?

The portion of socially sustainable investments at the end of the period was 20.28%.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Cash and/or other instruments held for liquidity and portfolio risk management purposes were included in category "#2 Other". For non-rated bonds and equities, minimum environmental and social guarantees are applied by filtering for controversial issues in relation to the principles of the United Nations Global Compact. Instruments not covered by an ESG analysis may also include securities for which the data necessary to measure the achievement of environmental or social characteristics were not available. Moreover, minimum environmental or social guarantees have not been defined.

economic activities under Regulation (EU) 2020/852.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Sustainability indicators are made available in the portfolio management system, allowing managers to instantly assess the impact of their investment decisions on the portfolio.

These indicators are integrated into Amundi's control framework, with responsibilities being divided between the first level of control carried out by the investment teams themselves and the second carried out by the risk teams, which constantly monitor compliance with the environmental or social characteristics promoted by the product.

In addition, Amundi's responsible investment policy defines an active engagement approach that promotes dialogue with investee companies, including those in this portfolio. The annual engagement report, available on https://legroupe.amundi.com/documentation-esg, provides detailed information on this engagement and its results.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product does not have an ESG benchmark.

- How does the reference benchmark differ from a broad market index?
- How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

This product does not have an ESG benchmark.

How did this financial product perform compared with the reference benchmark?

This product does not have an ESG benchmark.

How did this financial product perform compared with the broad market index?

This product does not have an ESG benchmark.

French Energy Transition for Green Growth Act

This annual report will be supplemented with the information required pursuant to Decree No. 2021-663 of 27 May 2021 implementing Article 29 of the Energy and Climate Act within 6 months of the end of the financial period.
