# Simplified sales prospectus

## DWS Technology Typ O

DWS Technology Typ O is a Directive-compliant investment fund established under German law. This simplified sales prospectus summarizes the most important information about the investment fund. The simplified sales prospectus contains all other regulations, supplemented by the annual and semiannual reports.

### Investor Profile

The investment fund is intended for the risk-tolerant investor who, in seeking investments that offer targeted opportunities to maximize returns, can tolerate the unavoidable, and occasionally substantial, fluctuations in the values of investments. The high risks from volatility, as well as high credit risks, make it probable that the fund will lose value from time to time, and expectations of high returns and tolerance of risk are offset by the possibility of incurring significant losses of capital invested.

### Acceptance of orders

All buy, sell and exchange orders are submitted on the basis of an unknown net asset value per unit. Orders received at or before 4:00 PM CET on a valuation date are processed on the basis of the net asset value per unit on the next valuation date. Orders received after 4:00 PM CET are processed on the basis of the net asset value per unit on the valuation date immediately following that next valuation date.

### DWS TECHNOLOGY TYP O AT A GLANCE

#### Investment objective

The fund's investment objective is to achieve the highest possible appreciation of capital and, in addition, a reasonable annual distribution in euro.

#### Investment policy

The Company acquires and sells the assets permitted under the German Investment Act (InvG) and the Terms of Contract in accordance with its assessment of economic and capital market conditions and of future prospects on the exchanges.

At least 51% of the investment fund's assets must be invested in equities of companies whose revenues or earnings, as reported in the most recent annual report, were generated primarily from activities in the following sectors:

- industrial robotics, mechanical engineering and precision equipment;
- office equipment, IT hardware, software, software development and related services;
- communications services and communications technology, including fiber optics, laser and radar technology;
- drilling, switching, measurement and control technology;
- electronic components and the plants required for manufacturing them;
- aerospace construction, missile construction, defense systems and space exploration;
- consumer and entertainment electronics;
- pharmaceuticals, medical technology, biotechnology and genetic engineering;
- environmental and energy-conservation technology;
- metallurgy, new materials and specialty chemicals;
- seed cultivation and pest control;
- transportation technology;
- Internet infrastructure and Internet services;
- nanotechnology.

The business activity of the issuer can include all activities within these sectors, such as research, development, manufacturing, distribution, relevant plant leasing and services (maintenance, etc.). If the aforementioned annual report does not contain the necessary breakdown of revenues or earnings, the Company may use other suitable documentation from the issuer to assure itself of said issuer's compliance with the previously specified preconditions for investment.

If subsequent annual reports or other suitable documents of the issuer show that the requirements specified above are no longer met, the securities must be sold within an appropriate period while safeguarding the interests of the investors.

Up to 20% of the investment fund's assets may be invested in interest-bearing securities. Convertible bonds and warrant-linked bonds do not constitute interest-bearing securities in this respect.

The fund may additionally acquire bank balances, money market instruments and investment fund units, as well as all the permitted assets specified in the Terms of Contract and the German Investment Act. Derivative financial instruments may be used for both investment and hedging purposes. When using derivatives, the investment fund's potential market risk may be no more than doubled. The base currency is the euro.

<b>Benchmark</b>	MSCI World IT (RI); this benchmark covers only some of the investment options of the investment fund. It is therefore possible that the benchmark may not coincide with the investment focus of the investment fund.
<b>ISIN</b>	DE0008474149
<b>Security code</b>	847 414
<b>Fund currency</b>	EUR
<b>Inception date</b>	October 14, 1983
<b>Calculation of the NAV per unit</b>	Each bank business day in Frankfurt/Main
<b>Initial sales charge</b> (payable by the unitholder)	0%
<b>Distribution policy</b>	Distribution
<b>Issue price</b>	Net asset value per unit plus initial sales charge
<b>Redemption price</b>	Net asset value per unit

## DWSTECHNOLOGYTYPE O AT A GLANCE (CONTINUED)

<b>All-in fee</b> (payable by the investment fund)	<p>1.7% p.a.</p> <p>The following fees and expenses are included in the all-in fee, and will not be charged separately to the investment fund:</p> <ul style="list-style-type: none"> <li>– fees for managing the investment fund (fund management, administrative functions, distribution costs);</li> <li>– custodian fees;</li> <li>– customary bank custody fees including, where applicable, the customary bank expenses for holding foreign securities in custody abroad;</li> <li>– the costs incurred for printing and mailing the annual and semiannual reports intended for the unitholders;</li> <li>– the cost of publishing the annual reports and semiannual reports, the issue and redemption prices and, if applicable, the distributions;</li> <li>– the cost of having the investment fund audited by the auditors of the Company;</li> <li>– the cost of publishing the information required for taxation and publishing the certificate confirming that the tax information was prepared in compliance with German tax law.</li> </ul> <p>In addition, the Company may receive out of the investment fund a daily performance-based fee for the management of the investment fund of up to one quarter of the amount by which the net asset value per unit outperforms the MSCI World IT (RI). The performance-based fee is calculated through comparison of the performance of the index, converted into euro, with that of the net asset value per unit (see article 18 (1) of the General Terms of Contract). In accordance with the result of the daily comparison, any performance-based fee incurred is deferred in the fund. If the performance of the units during any fiscal year falls short of the index, any performance-based fee amounts already deferred in that fiscal year shall be eliminated in accordance with the daily comparison. The amount of the deferred performance-based fee existing at the end of the fiscal year may be withdrawn. If the benchmark index should cease to be applicable, the Company shall establish a different comparable benchmark index to take the place of the named benchmark index.</p> <p>The MSCI World IT (RI) benchmark used for calculating the performance-based fee covers only some of the investment options of the investment fund. It is therefore possible that the benchmark may not coincide with the investment focus of the investment fund. This can result in a fee that no longer reflects the actual success of the management of the investment fund.</p> <p>Other costs that may be charged to the fund, services received, and performance-based fee for securities lending are described in the simplified sales prospectus.</p>
<b>Total expense ratio (TER)</b>	<p>The total expense ratio was 1.45% p.a. for the period from October 1, 2008, through September 30, 2009.</p> <p>The TER expresses total expenses and fees (excluding transaction costs) as a percentage of the fund's average net assets for a given fiscal year.</p> <p>Moreover, the additional income from securities lending resulted in a performance-based fee of 0.008% p.a. calculated based on the fund's average net assets.</p>
<b>Maturity date</b>	No fixed maturity
<b>Investor Profile</b>	Risk-tolerant

The Company prohibits all activities connected with market timing and similar practices, and it reserves the right to refuse buy, sell and exchange orders if it suspects that such practices are being applied. In such cases, the Company will take all measures necessary to protect the other investors in the fund.

### Publication of the issue and redemption prices

The issue and redemption prices are calculated on each bank business day in Frankfurt/Main by the Custodian with the participation of the Company. They are published daily in daily newspapers and business publications with sufficient circulation and/or on the Internet at [www.dws.com](http://www.dws.com).

## Derivatives

**The fund may use derivatives. Their use need not be limited to hedging the fund's assets; they may also be part of the investment strategy.**

Trading in derivatives is conducted within the confines of the investment limits and provides for the efficient management of the fund's assets, while also regulating investment maturities and risks. The use of derivatives does not change the fund's risk profile.

In this context, the following risks may be associated with derivatives:

- the time-limited rights acquired may expire or suffer a fall in value,
- the risk of loss cannot be predicted and may exceed margins,
- transactions intended to eliminate or reduce risks may not be possible or may only be possible at market prices resulting in a loss,
- the risk of loss may increase if the claims and obligations associated with these transactions are denominated in a foreign currency.

### Total expense ratio

The effective total expense ratio (TER) is calculated annually and published in the annual report and in the simplified sales prospectus.

### Purchase/Sale

Units may be purchased from the Company, the Custodian or through an intermediary. Deutsche Bank AG and Deutsche Bank Privat- und Geschäftskunden AG will act as secondary paying agents in Germany; in this capacity, they too will accept buy and sell orders.

The Company is obliged to redeem units at the applicable redemption price, which is equal to the net asset value per unit less any redemption fee. Units are redeemed by the Custodian. Additional conditions governing the purchase of units are contained in the "Selling restrictions" section on the back page of this prospectus.

### Costs

In addition to the all-in fee indicated in the table, other costs may also be charged to the investment fund. In addition to the remuneration for the management of the investment fund, management fees are charged for the other investment fund units held by the investment fund. Details are contained in the simplified sales prospectus.

### Taxes

The investment fund is not taxed in Germany. The tax treatment of fund income at investor level is dependent on the individual tax regulations applicable to the investor. To gain information about individual taxation at investor level (especially non-resident investors), a tax advisor should be consulted. Detailed information about the tax treatment of this investment fund for investors subject to taxation in Germany is provided in the full sales prospectus.

### Distribution policy

The Company distributes to investors any distributable amounts (less costs) that have accrued for the account of the investment fund during the fiscal year within three months after the close of the fiscal year. If units are held in a securities account with the Custodian, the Custodian's branches will credit distributions free of charge. The same applies for securities accounts maintained with the Company and with Deutsche Bank AG and Deutsche Bank Privat- und Geschäftskunden AG. If the securities account is maintained at banks or savings banks other than the preceding, other costs may be incurred.

### Term/Fiscal year

The term of the fund is not limited. Its fiscal year runs from October 1 through September 30 of each year.

### Performance

#### DWS TECHNOLOGY TYP O vs. benchmark Performance at a glance

"BVI method" performance, i.e., excluding the initial sales charge. Past performance is no guide to future results.

As of June 30, 2009

\* The fund DWS-Technologiefonds has been renamed DWS Technology Typ O effective February 5, 2010.

### Outsourcing

The Company has transferred the following duties to other companies:

- Risk & Control Management
- Business Management Support
- Compliance
- Accounting for the Company
- Human Resources
- IT Operations
- IT Audit
- Legal Department
- Office Administration
- Collateral Management
- Internal safeguarding measures to prevent money laundering and the financing of terrorism

### Risk profile of the investment fund

**Due to its composition and the techniques applied by its fund management, the investment fund is subject to markedly increased volatility, which means that the price per unit may be subject to substantial downward or upward fluctuation, even within short periods of time.**

**The fund is subject to general market risks. The net asset value per unit may fluctuate. It is possible that the investor may not recover all moneys invested.**

**The performance of the investment fund is influenced in particular by the following factors, which give rise to both opportunities and risks:**

- developments in the equity markets,
- company-specific developments,

- exchange rate movements of non-euro currencies in relation to the euro.

**In addition, the investment fund may temporarily concentrate more or less intensively on particular sectors, countries or market segments. This, too, may give rise to both opportunities and risks.**

**Additional risk warnings are contained in the simplified sales prospectus.**

**Selling restrictions**

The units of this investment fund that have been issued may be offered for sale or sold to the public only in countries where such an offer or such a sale is permissible. Unless the Company, or a third party authorized by it, has obtained permission to do so from the local regulatory authorities, this prospectus does not constitute a solicitation to purchase investment fund units, nor may the prospectus be used for the purpose of soliciting the purchase of investment fund units.

The information contained herein and the units of the investment fund are not intended for distribution in the United States of America or to U.S. persons (individuals who are U.S. citizens or whose permanent place of residence is in the United States of America and partnerships or corporations established in accordance with the laws of the United States of America or of any state, territory or possession of the United States). Accordingly, units will not be offered or sold in the United States or to or for the account of U.S. persons. Subsequent transfers of units in or into the United States or to U.S. persons are prohibited.

In cases when the Company receives knowledge that a unitholder is a U.S. person or holds units for the account of a U.S. person, the Company may demand the immediate return of the units to the Company at the last determined net asset value per unit.

This prospectus may not be distributed in the United States of America. The distribution of this prospectus and the offering of the units may also be restricted in other jurisdictions.

Investors that are considered "restricted persons" as defined in Rule 2790 of the National Association of Securities Dealers in the United States (NASD Rule 2790) must report their holdings in the investment fund to the Company without delay.

This prospectus may be used for sales purposes only by persons who have express written authorization from the Company (granted directly or indirectly via authorized sales agents) to do so. Declarations or representations by third parties that are not contained in this sales prospectus or in the documentation have not been authorized by the Company.

These documents are available to the public at the registered office of the Company.
