# BNY Mellon Global High Yield Bond Fund

## Euro A (Acc.)

### INVESTMENT OBJECTIVE

The investment objective of the Fund is to achieve a total return comprised of income and long term capital growth through investment primarily (meaning at least 80% of the Fund's assets) in a broadly diversified portfolio of high yield bonds and in derivatives.

### PERFORMANCE DISCLOSURE

Past performance is not a guide to future performance. The value of investments can fall. Investors may not get back the amount invested. Income from investments may vary and is not guaranteed.

Source: Lipper as at 30 April 2023. Fund performance Euro A (Acc.) calculated as total return, based on net asset value, including charges, but excluding initial charge, income reinvested gross of tax, expressed in share class currency. The impact of the initial charge, which may be up to 5%, can be material on the performance of your investment. Performance figures including the initial charge are available upon request.

Returns may increase or decrease as a result of currency fluctuations.

Effective 2 June 2017, the Performance Benchmark changed to the Bank of America Merrill Lynch Developed Markets High Yield Constrained Index (HYDC) hedged to US Dollar from Bank of America/Merrill Lynch Global High Yield constrained TR Index.

Alcentra is an asset management group focused on developed markets sub-Investment Grade (sub-IG) debt. Alcentra has a track record dating back to 2002 of investing in sub-IG instruments and is one of the largest institutional participants in these markets.

### PERFORMANCE BENCHMARK

The Fund will measure its performance against ICE BofA Developed Markets High Yield Constrained Index (hedged to US Dollars) (the "Benchmark").

The Fund is actively managed, which means the Investment Manager has absolute discretion to invest outside the Benchmark subject to the investment objective and policies disclosed in the Prospectus. While the majority of the Fund's holdings are expected to be constituents of, and have similar weightings to, the Benchmark, the investment strategy does not restrict the extent to which the Investment Manager may deviate from the Benchmark.

† In most cases the initial charge is not applicable in Spain, however in specific situations an initial charge may be included at the discretion of the Investment Manager (BNY MGM)

KEY RISKS ASSOCIATED WITH THIS FUND

- There is no guarantee that the Fund will achieve its objectives.
- This Fund invests in international markets which means it is exposed to changes in currency rates which could affect the value of the Fund.
- Derivatives are highly sensitive to changes in the value of the asset from which their value is derived. A small movement in the value of the underlying asset can cause a large movement in the value of the derivative. This can increase the sizes of losses and gains, causing the value of your investment to fluctuate. When using derivatives, the Fund can lose significantly more than the amount it has invested in derivatives.
- Investments in bonds/money market securities are affected by interest rates and inflation trends which may negatively affect the value of the Fund.
- Bonds with a low credit rating or unrated bonds have a greater risk of default. These investments may negatively affect the value of the Fund.
- The issuer of a security held by the Fund may not pay income or repay capital to the Fund when due.
- Emerging Markets have additional risks due to less-developed market practices.
- Subordinated Debt carries a greater level of risk compared to unsubordinated debt because it receives a lower priority level in terms of its claims on a company's assets in the case of the borrower's default.
- The Fund takes its charges from the capital of the Fund. Investors should be aware that this has the effect of lowering the capital value of your investment and limiting the potential for future capital growth. On redemption, you may not receive back the full amount you initially invested.
- If this share class is denominated in a different currency from the base currency of the Fund. Changes in the exchange rate between the share class currency and the base currency may affect the value of your investment.
- For hedged share classes the hedging strategy is used to reduce the impact of exchange rate movements between the share class currency and the base currency. It may not completely achieve this due to factors such as interest rate differentials.
- The insolvency of any institutions providing services such as custody of assets or acting as a counterparty to derivatives or other contractual arrangements, may expose the Fund to financial loss.
- A complete description of the risk factors is set out in the Prospectus in the section entitled "Risk Factors".

RISK AND REWARD PROFILE - EURO A (ACC.)

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you. We have classified this product as 3 out of 7, which is a medium-low risk class. This rates the potential losses from future performance at a medium low level, and poor market conditions are unlikely to impact the capacity of BNY Mellon Fund Management (Luxembourg) S.A. to pay you.

Please refer to the prospectus and the KIID before making any investment decisions. Documents are available in English and an official language of the jurisdictions in which the Fund is registered for public sale. Go to [www.bnymellonim.com](http://www.bnymellonim.com).

If you are unsure which type of investment is right for you, please contact a financial adviser.

IMPORTANT INFORMATION
