

# ALLIANZ VALEURS DURABLES - RC - EUR

Equity

**Allianz**   
Global Investors

## Investment Objective

The mutual fund's objective is to provide a medium and long-term performance through investments in equities which meet the following criteria of sustainable development: the social policy, the respect of the human rights, the corporate governance, the environment policy and ethics. The consideration of these extra financial criteria will be added to the classic financial criteria in order to build a portfolio which offers a better financial / extra-financial qualities couple

## Fund Manager

Christine Clet-Messadi  
(since 06/12/2002)

	<b>ESG Rating</b>	<b>2.90</b>

## Opportunities

- + High return potential of stocks in the long run
- + Move towards economically responsible and sustainable companies
- + Investments specifically in the eurozone stock markets
- + Expanded monitoring via different securities
- + Possible extra returns through security analysis and active management

## Risks

- High probability of fluctuation of stocks, decline in prices possible. The volatility (fluctuation) of the value of the units may increase
- Risk of fairly poor stock market performance in the eurozone
- Limited participation in certain potential securities
- Success of active management and security analysis not guaranteed

## FOR FUND DISTRIBUTORS AND PROFESSIONAL INVESTORS ONLY

- 1) Calculated at the net asset value, excl. front-end load, distributions reinvested. Calculation according to method as defined by BVI, the German Fund Companies Association. **Any front-end loads reduce the capital employed and the performance.**
- 2) Benchmark history: until 31/12/2010 B\_1CI: ALLIANZ VALEURS DURABLES
- 3) SFDR: EU Sustainable Finance Disclosure Regulation. Information accurate at time of publishing.
- 4) The Sharpe ratio states the relationship between the return generated by the fund and the investment risk. The fund's excess return versus the risk-free market rate is compared to volatility. Negative values are not meaningful.
- 5) Volatility measures the fluctuation range of the fund's performance over a specified period of time.
- 6) Measure of the proportion of fund assets that is invested differently from the benchmark.
- 7) The dividend yield corresponds to the expected dividend divided by the current price of the share, expressed as a percentage. (eDiv/share price) where: eDiv = product of the last dividend payment and the number of expected dividend payments per year (e.g. the expected dividend for a share with quarterly dividend payment corresponds to the dividend for the last quarter times four). The dividend yield depends both on the amount of the dividend and the current price of the share. Both these key variables may be subject to constant change. The dividend yield is only a snapshot based on the current amount of the dividend and the current share price; **as a result, it is not suitable as an indicator of the future performance of an equity fund.**
- 8) This is for guidance only and not indicative of future allocation.
- 9) If the acquisition of Fund units is subject to a sales charge, up to 100% of such sales charge may be collected by the distributor; the exact amount shall be mentioned by the distributor as part of the investment advisory process. This also applies to any payment by the Management Company of an ongoing distribution fee from the all-in fee to the distributor. The all-in fee includes the expenses previously called management, administration and distribution fees.
- 10) TER generally: Total cost (except transaction costs) charged to the fund during the last financial year. TER for funds-of-funds: The costs incurred by the fund itself (except transaction costs). Since the fund held other investment units ("target funds") in the reporting period, further costs, charges and fees may have been incurred at the level of the target fund.
- 11) Notation scale from 0 to 4. At least 100% of portfolio assets must comply with our human rights standards (an ex ante filter is applied) and at least 95% of portfolio asset must have an ESG rating of 2 or more (the ESG rating being calculated on the basis of a weighted average of the other four criteria – weightings varying according to the sector of the issuer).

### Disclaimer

Investing involves risk. The value of an investment and the income from it may fall as well as rise and investors might not get back the full amount invested. ALLIANZ VALEURS DURABLES is an open-ended investment company with variable share capital organised as SICAV under the laws of France. The value of the fund units/shares may be subject to highly elevated volatility. Past performance does not predict future returns. If the currency in which the past performance is displayed differs from the currency of the country in which the investor resides, then the investor should be aware that due to the exchange rate fluctuations the performance shown may be higher or lower if converted into the investor's local currency.
